

Press Release

Kapsch wins two renowned corporate awards

Kapsch TrafficCom is “Austria’s Leading Company” in the “Big Player” category, and Kapsch Components has been awarded the “Green Factory” title in the “Fabrik 2016” competition

Vienna, November 23, 2016 – Not just one but two Kapsch Group companies have been honored with renowned Austrian sector prizes. Kapsch TrafficCom won third place in the “Austria’s Leading Companies” competition in the category of Austrian companies with annual revenue of more than EUR 50 million. In a comparison of Vienna companies, the Kapsch specialist for intelligent transportation systems was awarded first place in the “Big Player” category. The award was bestowed for the 18th time by PwC Austria and the Kreditschutzverband von 1870 (KSV 1870). A weighting system for key indicators was used to compare revenue and earnings growth over the past three years as well as equity ratios and liquidity.

Kapsch Components, the Kapsch Group’s production company, benefits from its many years of experience in the manufacture of high-quality electronic products for the telecommunications, telematics, and industrial electronics sectors. The company’s Vienna production facility was awarded the title of “Green Factory” in connection with the “Fabrik 2016” competition. Kapsch Components succeeded in impressing the experts with the methods implemented in Vienna to boost added value by optimizing resource management and environmental management. The prize has been awarded a total of seven times by Industriemagazin and Fraunhofer Austria. Following an extensive selection process by Fraunhofer Austria, the top ten companies were evaluated on site. At the end, the category winners answered questions posed by a jury of experts at a public event.

Kapsch TrafficCom is a provider of intelligent transportation systems (ITS) in the segments of toll collection, city access control and parking space management, traffic management, traffic monitoring, utility vehicle monitoring, electronic vehicle registration and V2X cooperative systems. The end-to-end solutions of Kapsch TrafficCom cover the entire value creation chain of its customers, from components and design to the installation and operation of systems, all from a single source. The core business comprises the development, installation and operation of electronic toll collection and traffic management systems. Reference projects in more than 50 countries on all continents have made Kapsch TrafficCom a globally recognized ITS provider. As part of the Kapsch Group, an Austrian family-owned technology group founded in 1892, Kapsch TrafficCom is headquartered in Vienna, Austria, and has subsidiaries and branches in 33 countries. It has also been listed since 2007 on the Vienna Stock Exchange (KTCG) and earned revenues of EUR 526 million in the 2015/16 fiscal year. The company employs over 4,600 employees worldwide.
