Kapsch Group

***Discover. Learn. Experience.
Technology as a whole.***

With a technical apprenticeship at Kapsch.

Start your career with a technical apprenticeship.

You are:

- > finished with mandatory schooling or are in the final stages, want to switch to an apprenticeship while attending high school or have already passed your school leaving examination and now want to combine theory and practice?
- > interested in innovations and new technologies?
- > good at the subjects math and physics?
- > proactive, team-minded and have an ability to learn quickly?
- > interested in completing an apprenticeship at a state certified training establishment?
- > open to new things with enthusiasm and commitment?

We offer you:

- > training in multimedia training rooms in Vienna and an insight into the technical world of mechatronics and information technology-system engineering.
- > practice in numerous departments of Kapsch Group following basic training in Vienna.
- > experience of more than 70 years in apprentice training and since 1997 also for partner companies.
- > advanced training courses during your apprenticeship. You can start your school leaving examination alongside your work and in parallel with studies and we offer you career and development opportunities during your future profession at the Kapsch University.
- > varied tasks in an international environment.
- > an appreciative company culture in a family company, where you count as an individual.
- > comprehensive social benefits (such as food aid), premiums for excellent performance, internships abroad and a qualification after 3.5 or 4 years with the final apprenticeship examination.

The following junior positions could be your objective after the apprenticeship:

- > System engineer
- > Technical operations manager
- > Front end support agent
- > Service delivery manager
- > System engineering networks manager
- > System engineering security manager
- > Service desk agent
- > Shift supervisor for automated (system) assembly lines
- > Process engineer
- > Prototyping engineer
- > Quality technician
- > Inspector and repairer

We are:

- > known for our ITS and enterprise solutions, which are based on wide-ranging technological expertise and experience and specifically tailored to the relevant customer benefits.
- > active internationally and represented on all continents.
- > proud of around 6500 employees in our global subsidiaries.
- > customer-oriented and offer high-quality customized solutions.

Your application.

Upload your complete documents (cover letter detailing your career aspiration, apprenticeship trade, résumé with photo, copy of your last certificates) to onestepahead.kapsch.net Click here on jobs, jobfields, then apprenticeship and finally "Apply now" to become an apprentice".

Factbox:

- > Application through the onestepahead.kapsch.net
- > Selection process: Test and job interview
- > Basic training – mechatronics or information technology-system engineering – in the training workshop, practice in the departments
- > Further training opportunities during and after your apprenticeship
- > Social benefits of a modern family company
- > Rewards for your excellent performance
