

Challenging limits for a sustainable future of mobility

Company profile 2025

Who we are

Kapsch TrafficCom (KTC) is a globally renowned provider of intelligent transportation solutions.

With one-stop-shop-solutions, the company covers the entire value chain of customers, from components to design and implementation to the operation of systems.

The mobility solutions supplied by Kapsch TrafficCom enable users to arrive at their destination conveniently, on time, safely, efficiently, and with minimal environmental impact.

What we do

Kapsch TrafficCom technologies have three objectives:

- Ensuring the safety and security of everyone on the road
- Enabling traffic to flow as freely as possible
- Promoting the responsible handling of environmental resources

Tolling: The products and solutions of KTC cover the entire spectrum of toll collection services –from multi-lane free-flow traffic on roads and highways, to traditional toll booths and managed lanes, to V2X tolling (North America only). Kapsch provides the entire infrastructure required and supports the operators with the roll-out and commercial operation of the systems with toll controls.

Traffic Management: Traffic solutions for highways, bridges, tunnels, and managed lanes help to lower CO₂ emissions to enable the most efficient use of infrastructure and a cost-effective development. From connected vehicles to smart mobility platforms, KTC is developing the traffic of the future.

Where we are going

The need for intelligent mobility solutions is increasing and contributes to the further transformation or even disruption of parts of our business and industry.

We are at the forefront of that development, leading the industry and reinventing ourselves to enable the mobility of the future.

Select examples of our work

1

Smart Corridor in Gwinnett County, Georgia

Deployment and operation and maintenance of a 400-intersection smart corridor turnkey project. Some of the use cases are:

- **Emergency Vehicle Preemption (EVP):** prioritizing emergency response vehicles for faster, safer travel
- **Transit Signal Priority (TSP):** reducing delays for public transportation
- **Construction and Maintenance Vehicle Alerts:** enhancing worker safety in active work zones

2

Largest connected infrastructure project in Europe with German Autobahn

Deployment of ITS roadside stations on over 5,300 miles of highways.

- **First use case:** roadworks warnings
- Further use cases to be implemented
- KTC also supplies the software to manage the roadside stations

3

Integrated Mobility Management in Buenos Aires, Argentina

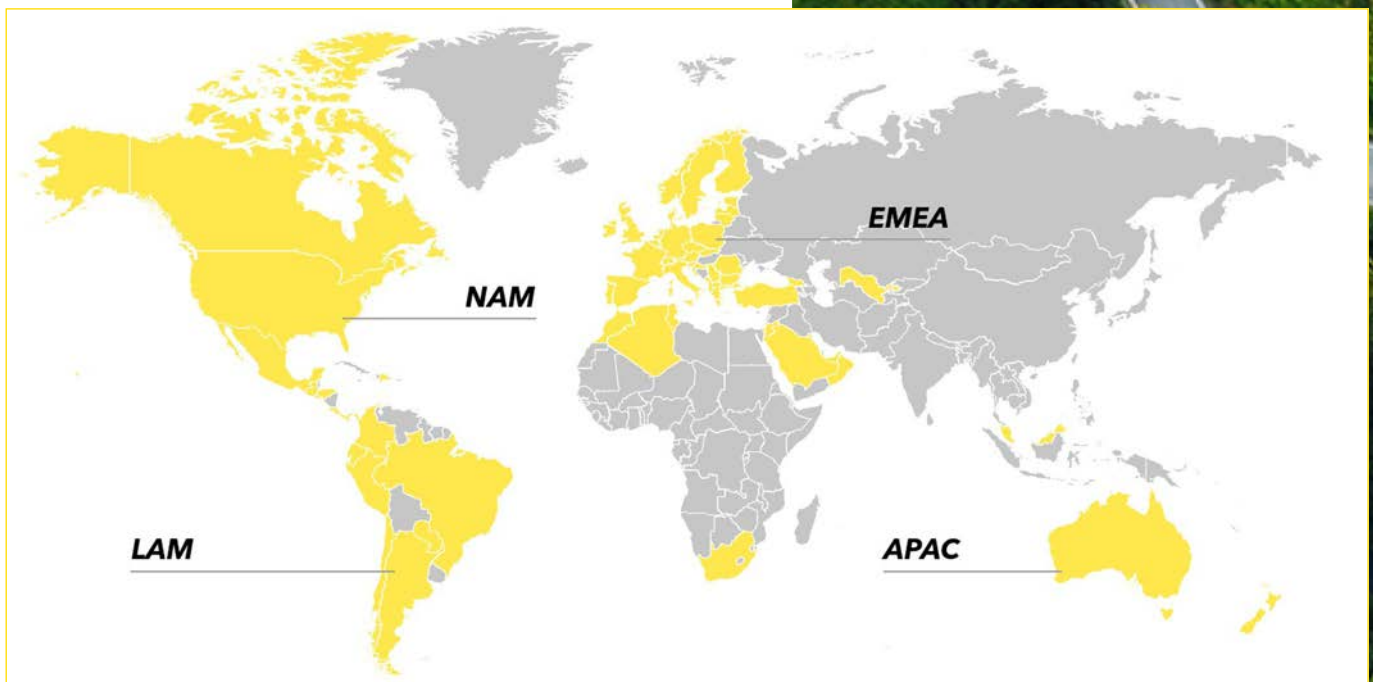

Shifting from reactive to proactive-collaborative Traffic Management

- **Solution:** Implementation of EcoTrafix, integration of information systems and management tools into single Traffic Management Center
- **Outcome:** Traffic agencies in the city manage traffic in Buenos Aires jointly and effectively
