

EN

The future of transportation is an impressive sight.

**Our proven electronic toll systems provide the
infrastructure for innovative ITS applications.**

Annual Report on Fiscal Year 2010/11.

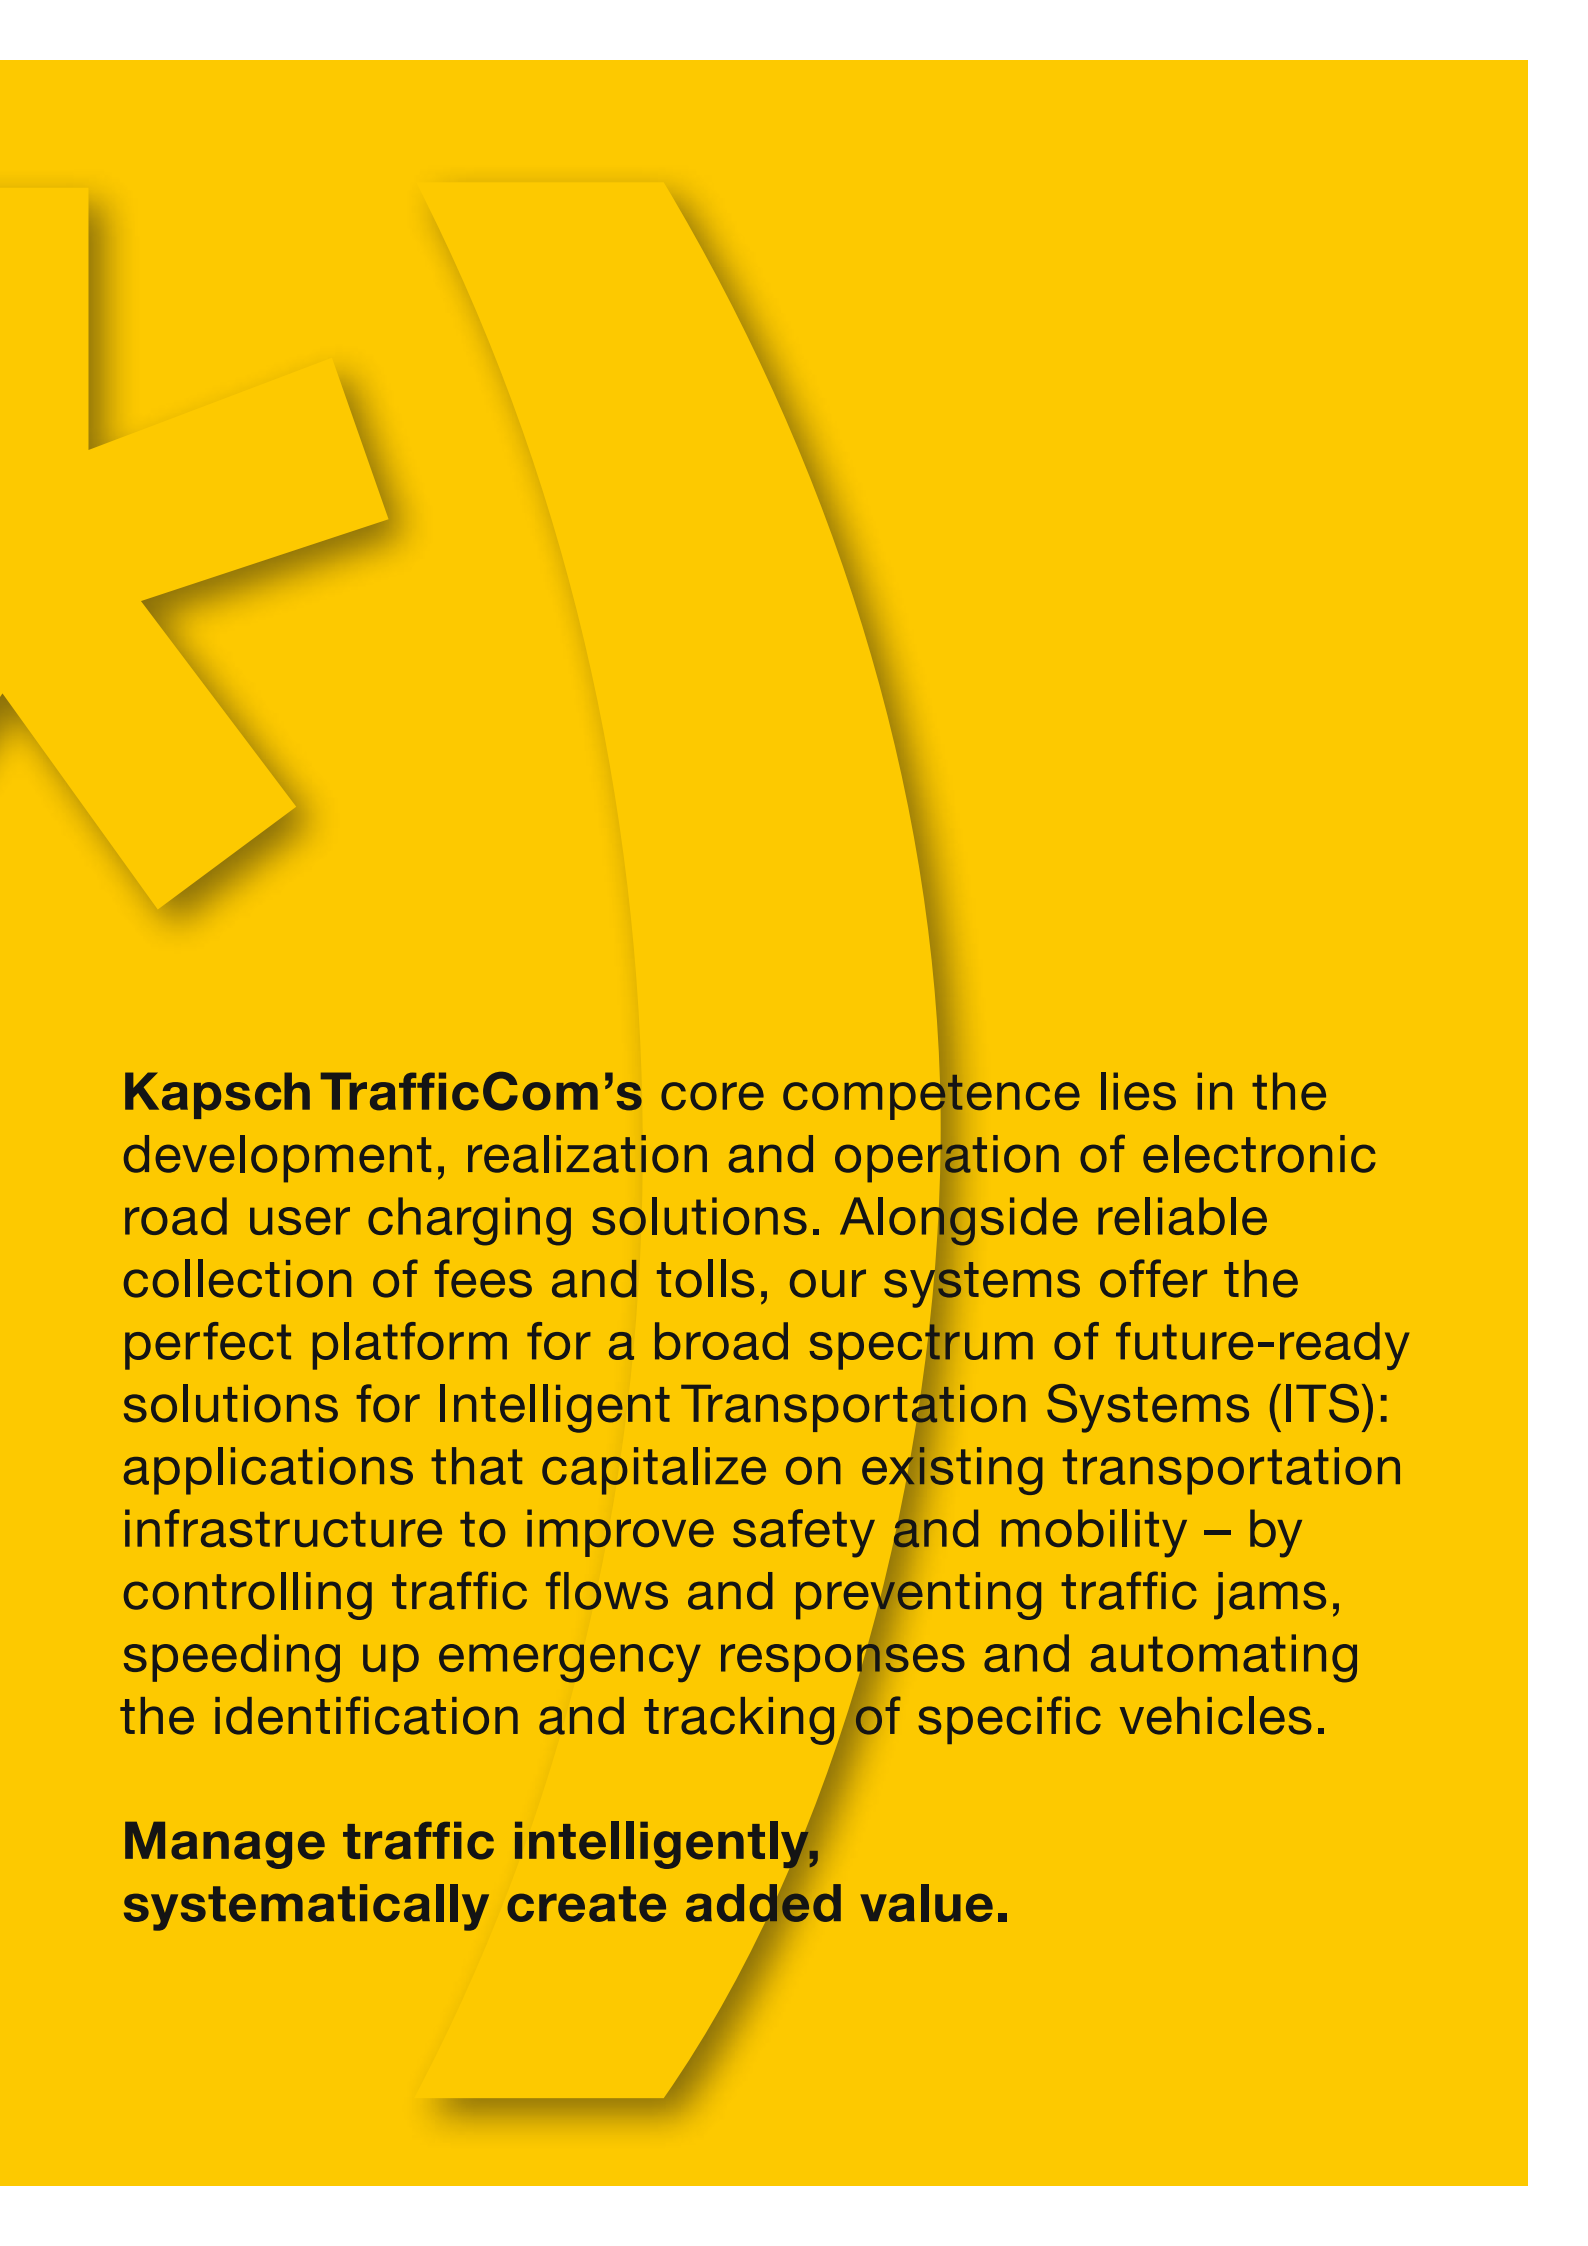

***) What you see here: Vehicles equipped with an on-board unit, enable electronic toll collection systems to charge fees fully automatically – without interfering at all with the traffic flow.**

Toll Collection Systems – Electronic toll collection systems also provide a robust and extensible infrastructure for numerous and diverse Intelligent Transportation Systems (ITS) applications. Our toll collection systems are increasingly used as the basis for advanced ITS solutions that offer road users, road operators and public agencies increased safety, improved services and significant cost savings.

The background is a solid yellow color. On the left side, there are several overlapping, semi-transparent yellow geometric shapes that resemble stylized letters or abstract architectural elements. These shapes are layered, creating a sense of depth and movement. The main text is positioned on the right side of the image, in a clean, sans-serif font.

Kapsch TrafficCom's core competence lies in the development, realization and operation of electronic road user charging solutions. Alongside reliable collection of fees and tolls, our systems offer the perfect platform for a broad spectrum of future-ready solutions for Intelligent Transportation Systems (ITS): applications that capitalize on existing transportation infrastructure to improve safety and mobility – by controlling traffic flows and preventing traffic jams, speeding up emergency responses and automating the identification and tracking of specific vehicles.

**Manage traffic intelligently,
systematically create added value.**

***) What you don't see here:** By recording speed over a defined distance, our 'Section Control' does not allow speeders to simply get away with it.

Section Control – Measuring the average speed over a road section is gaining in importance as a measure for improving traffic safety. Such traffic monitoring systems automatically evaluate whether vehicles are driving within legal speed limits and encourage good driving behavior. Experience has shown that monitoring the driving speed over entire road sections significantly reduces the number of road accidents while helping to improve the environmental situation.

Highlights of Fiscal Year.

Revenues

Revenues increased by 80 % to an all-time high of EUR 388.6 million.

EBIT and EBIT margin

EBIT increased by 99 % to an all-time high of EUR 48.9 million.

Revenues in segment Services, System Extensions, Components Sales (SEC)

Revenues in segment SEC increased by 38 % to EUR 223.3 million.

Revenues in segment Road Solution Projects (RSP)

Revenues in segment RSP increased by 247 % to EUR 158.9 million.

Profit for the period (adjusted)¹

Profit for the period (adjusted)¹ decreased (increased) by 22 % (27 %) to EUR 28.4 million.

Earnings per share² (adjusted)¹

Earnings per share (adjusted)¹ decreased (increased) by 32 % (21 %) to EUR 1.81.

Net working capital

Net working capital increased by EUR 71.3 million (68 %) to EUR 175.9 million.

Total assets and equity ratio³

Equity ratio decreased to 42.5 % widely due to corporate bond issuance.

¹ 2009/10 adjusted for the EUR 14 million fair value adjustment of the share in Q-Free ASA, Norway

² earnings per share relate to 12.2 million shares

³ incl. minority interests

Large contract award in Poland

Consortium led by Kapsch TrafficCom was the best bidder in the tender for a nationwide electronic truck tolling system on a road network of up to 7,600 kilometers, as announced at the beginning of October 2010.

Contract signed on 2 November 2010 for the implementation and operation over eight years of an electronic truck tolling system for an existing road network initially covering about 1,750 kilometers.

Extension of presence in South Africa

Acquisition of 56.81 % in TMT Services and Supplies (Proprietary) Limited, a provider of traffic management solutions.

Contract awarded to implement and subsequently operate an automatic fare collection system on the bus fleet of the City of Johannesburg.

Order of 1.5 million on-board units for the electronic toll collection system in the Gauteng province.

Important steps in the U.S.A.

Acquisition of the Mark IV IVHS businesses in the United States, Canada and Mexico, the largest equipment supplier of electronic toll collection systems based on the established 915 MHz technology in North America.

Port of Hood River as the first road operator in the United States to deploy an electronic toll collection system based on the newly developed 5.9 GHz technology.

First contract in Russia

First contract in Russia to equip traffic crossings with fully automatic applications for red light enforcement, lane control and speed control in the city of Kazan.

System performance¹ in the Czech Republic

Year	Performance Rate (%)
2008	98.20
2009	99.00
2010	99.31

Average performance rate¹ of the nationwide electronic truck tolling system in the Czech Republic increased to an all-time high of 99.31 % in calendar year 2010.

System performance¹ in Austria

Year	Performance Rate (%)
2008	99.77
2009	99.78
2010	99.88

Average transaction rate¹ of the nationwide electronic truck tolling system in Austria increased to an all-time high of 99.88 % in calendar year 2010.

Business with on-board units

Period	Volume (million units)
2008/09	2.7
2009/10	3.5
2010/11	5.2

Volume of on-board units delivered increased to an all-time high of 5.2 million units.

Issuance of a corporate bond

Issuance of a 4.25 % corporate bond with a tenor of seven years and a volume of EUR 75 million on 3 November 2010.

Corporate bond priced at a re-offer spread of mid-swap plus 195 basis points; demand was high, above all from retail investors.

¹ The calculation of the system performance is based on methods agreed upon with the respective customer, meaning that comparisons between the performance rates achieved in different projects are only possible on a limited basis.

The Kapsch TrafficCom Group recorded the highest operating results in its corporate history in the fiscal year 2010/11 ended 31 March 2011: Revenues increased by 80 % as compared to the previous year to an all-time high of EUR 388.6 million. EBIT increased by 99 % year-on-year to another all-time high of EUR 48.9 million. In relation to revenues, the Kapsch TrafficCom Group generated an EBIT margin of 12.6 % compared with 11.4 % during the same period in the previous fiscal year.

The development of the business of Kapsch TrafficCom Group in the last fiscal year was primarily driven by the segment SEC (Services, System Extensions, Components Sales), representing the recurring part of the Group's business, and by the segment RSP (Road Solution Projects), which represents the large-scale project business. In the segment SEC, revenues increased by 38 % year-on-year to EUR 223.3 million. This positive development was primarily attributable to a record volume of 5.2 million on-board units delivered (previous fiscal year: 3.5 million units), the first-time consolidation of acquired companies during the fiscal year 2010/2011 as well as higher operating revenues in the Czech Republic and in Austria. In both countries, performance rates of the nationwide electronic truck tolling systems increased from already high levels, resulting in higher bonus payments to Kapsch TrafficCom Group. In the segment RSP, revenues increased by 247 % year-on-year to EUR 158.9 million. This positive development resulted largely from electronic toll collection system implementations in South Africa and Poland.

Due to a decrease in the financial result by EUR 11.7 million as compared to the previous fiscal year and a one-time fair value adjustment relating to the stake held in Q-Free ASA in the amount of EUR 14.0 million in the previous fiscal year, profit for the period decreased from EUR 36.5 million in the previous fiscal year to EUR 28.4 million in the fiscal year 2010/2011. As a result, earnings per share decreased from EUR 2.64 in the previous fiscal year to EUR 1.81 in the fiscal year 2010/2011. Adjusted for the one-time fair value adjustment relating to the stake held in Q-Free ASA, profit for the period increased by 27 % year-on-year (previous fiscal year as adjusted: EUR 22.5 million). Adjusted earnings per share increased from EUR 1.49 in the previous fiscal year by 21 % to EUR 1.81 in the fiscal year 2010/2011.

The balance sheet of Kapsch TrafficCom Group was influenced by the issuance of a 4.25 % corporate bond with a volume of EUR 75 million on 3 November 2010. Accordingly, with total assets of EUR 450.1 million as of 31 March 2011, up by 53 % year-on-year, Kapsch TrafficCom Group's equity ratio was 42.5 % as of 31 March 2011 (31 March 2010: 57.0 %). Free cash flow for the fiscal year 2010/2011 was negative at EUR 19.9 million (previous fiscal year: positive at EUR 41.6 million), largely due to an increase in net working capital by EUR 71.3 million to EUR 175.9 million resulting from continuing system implementations in South Africa and Poland.

The project business recorded sound performance in the past fiscal year. In particular, Kapsch TrafficCom received a large contract award in Poland for the implementation and operation of a nationwide electronic truck tolling system on a road network of up to 7,600 kilometers. On 2 November 2010, the contract was signed for the implementation and the operation over eight years on an existing road network that will initially cover about 1,750 kilometers. Kapsch TrafficCom also recorded its first success in Russia: In the city of Kazan, traffic crossings will be equipped with fully automatic applications for red light enforcement, lane control and speed control.

Kapsch TrafficCom not only expanded into new markets, but also continued to extend its presence in existing markets: In South Africa, Kapsch TrafficCom acquired a 56.81 % stake in TMT Services and Supplies (Proprietary) Limited, a provider of traffic management solutions, which shortly thereafter was awarded a contract to implement and operate an automatic fare collection system on the bus fleet of the City of Johannesburg. Kapsch TrafficCom also received orders of 1.5 million on-board units for the electronic toll collection system which is in implementation in the Gauteng province.

Kapsch TrafficCom took important steps in the U.S.A.: In addition to the acquisition of the Mark IV IVHS businesses in the United States, Canada and Mexico, the largest equipment supplier for electronic toll collection systems based on the established 915 MHz technology in North America, Port of Hood River was won as the first road operator in the United States to deploy an electronic toll collection system based on the newly developed 5.9 GHz based technology.

Always one step ahead.

The company philosophy of Kapsch TrafficCom is concisely expressed in a single phrase: always one step ahead. Striving for global quality and innovation leadership in the rapidly growing market of intelligent transportation systems, Kapsch TrafficCom is always the decisive step ahead of the competition.

Kapsch TrafficCom is always future-oriented. Visionary ideas combined with entrepreneurial expertise are a high priority at Kapsch TrafficCom. Based on the technology applied in systems around the world, we are helping to define the future for drivers, road operators and commercial service providers with innovative traffic applications. At the same time, we are committed to consistent value creation and we accept holistic responsibility for our endeavors.

Kapsch TrafficCom is always innovative. Taking advantage of the newest technologies in practical applications is an integral part of our company strategy and a key element of our success. The networked international research and development centers of Kapsch TrafficCom are therefore constantly searching for new, forward-looking applications. This has given rise to pioneering projects such as Section Control, Weigh in Motion System, Incident Detection System, Traffic Flow Analysis or Hazardous Goods Transport Tracking, which offer added value to our customers and enable new commercial applications. A system-independent perspective, an international pool of experts and a sound business attitude allow us to develop products and solutions used around the world.

Kapsch TrafficCom is always performance-oriented. Our systems offer customers high return on investment, outstanding transaction performance and system security thanks to state-of-the-art technologies, more than 2,100 dedicated employees and our many years of experience. Around the world, almost 44 million delivered on-board units and more than 18,000 equipped lanes provide for safe and reliable operation. The processes of the Kapsch TrafficCom quality management system are based on ISO 9001 and ISO 20000 for IT service management.

Kapsch TrafficCom is always aware of its responsibilities. With superior intelligent transportation systems, Kapsch TrafficCom makes a meaningful contribution to shaping a sustainable future. Our solutions provide a wide range of benefits: they contribute to the financing of infrastructure projects, improve traffic safety and help to prevent traffic jams, which also reduces CO₂ emissions. You can learn how sustainability and responsibility are addressed by the company in the Kapsch TrafficCom Sustainability Report.

Kapsch TrafficCom is always close to its customers. Solutions from Kapsch TrafficCom accompany people around the world. The international success of the company is exemplified by 260 reference projects in 41 countries on all 5 continents. We offer products, systems and services for superior intelligent transportation systems as a one-stop shop and cover the entire value creation chain of our customers with our end-to-end solution portfolio.

***) What you don't see here: Our 'Weigh in Motion System' can weigh trucks automatically, while driving.**

Letter from the Chief Executive Officer.

Georg Kapsch, Chief Executive Officer

Dear Shareholders.

I am delighted to report about the most successful fiscal year to date in the corporate history of Kapsch TrafficCom. As can be seen from this annual report, the Kapsch TrafficCom Group recorded tremendous increases leading to all-time highs in revenues and EBIT. We can look back to an eventful fiscal year in which we were awarded a large contract in Poland, extended our presence in South Africa, took important steps in the U.S.A. in connection with our continuing global expansion and received our first contract in Russia. In addition, we successfully issued a corporate bond.

This development reflects our continued controlled growth of the business and the extension of our strong position in various markets. At the same time, we built the basis for further internally driven growth and consider ourselves well prepared, even in an economic environment that is expected to remain challenging.

Revenues rose by 80 % as compared to the previous year to an all-time high of EUR 388.6 million in the fiscal year 2010/11. EBIT nearly doubled, which also reflects an all-time high. In relation to revenues, the Kapsch TrafficCom Group generated an EBIT margin of 12.6 %. In this past fiscal year, we continued to invest in the development of future business opportunities and remained true to our philosophy of recognizing such investment as expenses to the greatest extent possible. Our objective is the sustainable advancement of the Kapsch TrafficCom Group.

Reflecting the successful implementation of our strategy, revenues in the segment SEC (Services, System Extensions, Components Sales), which represents the recurring part of our business, increased by 38 % year-on-year to EUR 223.3 million. We delivered more than 5.2 million on-board units, an absolute record, and can now reference to almost 44 million units delivered worldwide to date.

We are particularly pleased that we were able to raise the performance rates in each of our two large system deliveries to date in Austria and in the Czech Republic to new record levels in the past fiscal year. These improvements resulted in higher bonus payments and consequently higher operations revenues. They also confirm our strategy to permanently aim for technological leadership that, in our opinion, can be best measured in performance.

Another important driver for our business was the segment RSP (Road Solution Projects), which contains the large-scale project business. In this segment, we more than tripled revenues year-on-year to EUR 158.9 million. This tremendous improvement was based, above all, on the implementation of electronic toll collection systems in South Africa and in Poland as well as the telematic platform in the Czech Republic. EBIT in this segment turned from negative in the previous two fiscal years to positive.

Due to a decrease in the financial result by EUR 11.7 million as compared to the previous fiscal year and a one-time fair value adjustment relating to the stake held in Q-Free ASA in the amount of EUR 14.0 million in the previous fiscal year, profit for the period decreased from EUR 36.5 million in the previous fiscal year to EUR 28.4 million in the fiscal year 2010/2011. As a result, earnings per share decreased from EUR 2.64 in the previous fiscal year to EUR 1.81 in the fiscal year 2010/2011. Adjusted for the one-time fair value adjustment relating to the stake held in Q-Free ASA, profit for the period increased by 27 % year-on-year (previous fiscal year as adjusted: EUR 22.5 million). Adjusted earnings per share increased from EUR 1.49 in the previous fiscal year by 21 % to EUR 1.81 in the fiscal year 2010/2011. Based on the positive development of the Group's business, the managing board proposes to the shareholders' meeting to be held on 22 August 2011 a dividend of EUR 1.00 per share for the fiscal year 2010/2011 (2009/2010: EUR 0.75 per share). Subject to the resolution of the shareholders' meeting, this represents a pay-out ratio of approximately 55 %, which exceeds the long-term average.

On 3 November, we issued a corporate bond with a volume of EUR 75 million to also support our growth with capital. The high demand and the oversubscription of the order book confirmed the confidence of investors in Kapsch TrafficCom and our strategy. This strengthening of our financial power also changed the balance sheet of the Kapsch TrafficCom Group with an increase in total assets and, against this backdrop, a decrease in the equity ratio from 57.0 % to 42.5 %. However, our balance sheet structure remains solid.

Free cash flow for the fiscal year 2010/2011 was negative at EUR 19.9 million (previous fiscal year: positive at EUR 41.6 million), largely due to an increase in net working capital by EUR 71.3 million to EUR 175.9 million resulting from continuing system implementations in South Africa and Poland.

From a project perspective, the highlight in the reporting period was Poland. Here the consortium led by Kapsch TrafficCom was announced as best bidder of the tender for a nationwide electronic truck tolling system at the beginning of October 2010. The contract, with a value of approximately EUR 560 million, for the implementation and the operation over eight years on an existing road network that initially covers about 1,750 kilometers was signed on 2 November 2010.

We are also particularly pleased over our first success in Russia: In the city of Kazan, we were awarded a contract to equip traffic crossings with fully automatic applications for red light enforcement, lane control and speed control.

We not only expanded into new markets during the reporting year, but also continued to extend our presence in existing markets. In South Africa, Kapsch TrafficCom acquired a 56.81% stake in TMT Services and Supplies (Proprietary) Limited, a provider of traffic management solutions, which shortly thereafter was awarded a contract worth ZAR 175 million (approximately EUR 18 million) to implement and operate an automatic fare collection system on the bus fleet of the City of Johannesburg. In addition, Kapsch TrafficCom received orders totaling 1.5 million on-board units for the electronic toll collection system which is under implementation in the Gauteng province.

These awards should put us in a strong position to take advantage of existing and upcoming opportunities in Russia and South Africa, two of the most dynamic markets in our industry worldwide.

We took very important steps in connection with the continuing global expansion of the Kapsch TrafficCom Group in the U.S.A.: On 30 November 2010, we completed the acquisition of the Mark IV IVHS businesses in the United States, Canada and Mexico for a purchase price of USD 73 million (approximately EUR 55 million). The acquisition of the largest equipment supplier for electronic toll collection (ETC) systems based on the established 915 MHz technology in North America enables us to offer current and future customers in this region an extended end-to-end solution portfolio, above all for intelligent transportation systems and ETC. In addition, Port of Hood River was won as the first road operator in the United States to deploy an electronic toll collection system based on the newly developed 5.9 GHz technology, which we introduced at the ITS America Annual Meeting 2010 in Houston in May 2010.

The project business remains in an exciting cycle: Although our consortium did not succeed in the tender for a nationwide electronic truck tolling system in France, several other projects – among others, the nationwide systems in Hungary, Slovenia and Denmark – are close to the final decision for a tender.

With regard to the current fiscal year 2011/2012, the company's outlook on market developments over the long-term is promising. Key events in the current fiscal year will be the implementation and the start of operations of the electronic toll collection systems in South Africa and Poland. In the United States, Kapsch TrafficCom expects the decision of the pending tender for the award of the E-Z Pass® Group contracts. In addition, developments in the current fiscal year will also be influenced by the preparation for tenders expected in Hungary, Slovenia and Denmark as well as by the continuing integration of Mark IV IVHS.

The success of our company is based on a strong corporate culture and goal-oriented teamwork by all parties. My special thanks go out at first to our more than 2,100 employees all over the world, whose commitment allowed us to record excellent results despite substantial investments in new markets and products. I would also like to thank my colleagues on the managing board, Erwin Toplak and André Laux, for our most intense and constructive cooperation, and the supervisory board for our productive discussions and their efficient handling of all issues. I would further like to thank our customers.

In conclusion, I would like to express my thanks to you, our shareholders, for the trust you have placed in us. We see the 247 % increase in our share price during the last fiscal year not only as a sign of this trust, but also as an obligation for the years to come. Please continue to accompany us on our growth course into a successful future.

Georg Kapsch
Chief Executive Officer

Corporate Governance Report.

In June 2007, the managing board (*Vorstand*) and supervisory board (*Aufsichtsrat*) resolved to apply the rules of the Austrian Code of Corporate Governance (the Code) as far as they are consistent with the specific situation of the company. The Code as amended in January 2010 is available for download under <http://www.corporate-governance.at> on the website of the Austrian Working Group for Corporate Governance. The evaluation of compliance with the Code is made by the compliance officer together with internal audit on an annual basis.

Corporate Governance Declaration.

In the fiscal year 2010/11 ended 31 March 2011, Kapsch TrafficCom AG complied with the L-Rules and C-Rules of the Code in the January 2010 version, with the exception of C-Rule 53 (the company does not intend to establish independence criteria that differ from the general requirement set forth in the Code as it believes such additional criteria are not required) and C-Rule 67 (due to the intense competition in the industry in which the company is active, it will not make available to all shareholders all information it may make available to financial analysts).

Managing Board.

Kapsch TrafficCom AG has a two-tier management and oversight structure in accordance with the Austrian Stock Corporation Act (*Aktiengesetz*), consisting of the managing board (*Vorstand*) and the supervisory board (*Aufsichtsrat*). The managing board is responsible for directing the business and represents the company in dealings with third parties. The supervisory board is responsible for appointing and dismissing the members of the managing board and supervising the business conducted by the managing board. Although the supervisory board does not actively manage the company, the managing board must obtain the consent of the supervisory board before engaging in certain transactions in accordance with the Austrian Stock Corporation Act (*Aktiengesetz*), the company's articles of association and the managing board's internal rules of procedure (*Geschäftsordnung*).

Erwin Toplak, Chief Operating Officer

Georg Kapsch, Chief Executive Officer

André Laux, Executive Board Member

Pursuant to our articles of association, the managing board consists of one to four members appointed by the supervisory board for a term of up to five years. The managing board currently consists of three members.

Name	Area of responsibility	Year of birth	Year first appointed	Year current term expires
Georg Kapsch (CEO)	Finance and Administration, Mergers & Acquisitions, Investor Relations, Legal, International Subsidiaries, Human Resources, Marketing & Communications, International Relations & Affairs, Innovation Management, Production, Telematic Services and North American Market	1959	2002	2014
Erwin Toplak (COO)	Sales Region 1, Business Development, System Engineering, Research & Development and Technical Operations	1961	2002	2014
André Laux (Executive Board Member)	Sales Region 2, Business Development, Product and Project Management	1962	2010	2013

Georg Kapsch was appointed CEO of Kapsch TrafficCom AG in December 2002 and holds functions in certain of its direct and indirect subsidiaries. Since October 2000, Georg Kapsch has also served as the CEO of KAPSCH-Group Beteiligungs GmbH. He has been a member of the managing board of Kapsch AG since July 1989 and was appointed as its CEO in October 2001. Georg Kapsch, who studied business administration at Vienna University of Economics and Business Administration (*Wirtschaftsuniversität Wien*) and graduated in 1981, has been the chairman of the Technikum Wien Academy (*Fachhochschule Technikum Wien*) since September 2002 and of the Austrian Electronic Association (*Österreichischer Elektronikverband*) since December 2002. He has been the vice president of the Association of the Austrian Electrical and Electronics Industries (*Fachverband der Elektro- und Elektronikindustrie*) since January 2003. In December 2008, Georg Kapsch was appointed president of the Federation of Austrian Industries Vienna (*Industriellenvereinigung Wien*).

In addition, Georg Kapsch serves as CEO of DATAX HandelsgmbH, as chairman of the supervisory board of Kapsch CarrierCom AG and as deputy chairman of Kapsch BusinessCom AG as well as member of the supervisory board of Teufelberger Holding AG.

Erwin Toplak has been a member of the managing board of Kapsch TrafficCom AG since June 2002 and holds functions in certain of its direct and indirect subsidiaries. He has been employed by the Kapsch Group since 1991, first as marketing and sales manager of the toll collection start-up of Kapsch AG (1991–1994) and later as senior manager (1994–1999) as well as director (1999–2002) of the traffic control systems division of Kapsch AG. Erwin Toplak graduated from the Polytechnic (*Höhere Technische Lehranstalt*) in Graz in 1984 with a degree in engineering. He is vice president of the Austrian Electrotechnical Association (*Österreichischer Verband für Elektrotechnik*).

André Friedrich Laux has joined Kapsch TrafficCom Group in December 2007 and has been a member of the managing board of Kapsch TrafficCom AG since 1 April 2010 and holds functions in certain of its direct and indirect subsidiaries. He began his professional career in different sales and management functions, both internationally and domestically (1988–1997), after completing a degree in business administration in Germany and England. In 1997, he became director of the German chip maker ODS Landis & Gyr in Munich. In 2000, André Laux transferred within the group to become CEO of Skidata AG in Salzburg. In 2004, he took over as CEO of Winter AG in Munich.

Work Flow. The areas of responsibility of the individual managing board members, the procedures (such as requirements and procedures to pass resolutions) as well as the transactions that require approval by the supervisory board are defined in the articles of association and the internal rules of procedure for the managing board. The managing board holds regular meetings to exchange information and pass resolutions on all issues that fall under the competence of the entire managing board.

Remuneration. In the fiscal year 2010/11, the aggregate fixed and variable remuneration for the members of the managing board, including the cross-charge from Kapsch AG for the services of Georg Kapsch, amounted to EUR 1.57 million (fiscal year 2009/10: EUR 1.46 million). Georg Kapsch is employed by Kapsch AG. His work is part of the management and consulting services provided by Kapsch AG, which are billed to Kapsch TrafficCom AG and disclosed in the notes to the consolidated financial statements under “Related parties”.

The remuneration of Erwin Toplak is based on a compensation system that, in addition to the base compensation, provides for annual variable compensation of up to 28 % of the base compensation. The variable compensation depends primarily on the achievement of certain predefined financial performance indicators. If his managing board contract is terminated at the end of the current term of office, Erwin Toplak is entitled to a severance payment that equals eleven-times his monthly salary. Mr. Toplak is required to comply with a non-competition clause for one year following the termination of his managing board position (unless he is terminated for cause). In addition, he has an individual defined pension scheme for which Kapsch TrafficCom AG pays approximately TEUR 14 annually to an outside pension fund. Erwin Toplak holds 154,528 shares of Kapsch TrafficCom AG.

The remuneration of André Laux is determined based on a compensation system that, in addition to the base compensation, provides for annual variable compensation of up to 34 % of the base compensation. The variable compensation depends primarily on the achievement of certain predefined financial performance indicators. If his managing board contract is terminated at the end of the current term of office, André Laux is required to comply with a non-competition clause for one year following termination of his managing board position (unless he is terminated for cause). André Laux has an individual defined pension scheme for which Kapsch TrafficCom AG pays approximately TEUR 5 annually to an outside pension fund.

Managing board remuneration 2010/11 in TEUR	Fixed	Variable	Total
Georg Kapsch	416	405	821
Erwin Toplak	360	57	417
André Laux	278	56	334
Total	1,054	518	1,573

Directors and officers liability insurance. The members of the managing board are insured against financial losses with a directors and officers liability insurance policy. In addition to the managing board, the members of the supervisory board as well as key managers of the Kapsch TrafficCom Group are also insured. A collective premium is paid, and it is therefore not possible to allocate a specific amount to individual members of the managing board.

Supervisory Board.

Pursuant to the articles of association, the supervisory board consists of three to six members elected by the shareholders' meeting, plus the representatives delegated by the works council (*Betriebsrat*) according to the Austrian Labor Constitutional Act (*Arbeitsverfassungsgesetz*). The current members are:

Name	Position	Year of birth	Year first appointed	Year current term expires
Franz Semmernegg	Chairman	1968	2002	2013
Kari Kapsch	Deputy chairman	1964	2002	2013
William Morton Llewellyn	Member ¹	1965	2008	2011
Christian Windisch	Member ²	1963	–	–
Claudia Rudolf-Misch	Member ^{2,3}	1967	–	–
Werner Dreschl	Member ^{2,4}	–	–	–

¹ member meeting the criteria of rule C-54 of the Code

² delegated by the works council; without information on appointment since the works council may recall a member it has delegated at any time

³ since 20 November 2010

⁴ until 19 November 2010

Franz Semmernegg has been a member of the supervisory board of Kapsch TrafficCom AG since June 2002. Since September 2005, he has been the chairman of the supervisory board. Franz Semmernegg has been the CFO of KAPSCH-Group Beteiligungs GmbH since April 2005. He also serves as the CEO of Kapsch BusinessCom AG and has been a member of the managing board of Kapsch BusinessCom AG since March 2003. He has also been the CFO of Kapsch AG since October 2001 and was a member of the managing board of Schrack BusinessCom AG from 1999 to September 2001. In 1998, Franz Semmernegg was responsible for the successful management buy-out of Schrack BusinessCom AG from Ericsson Austria AG and was previously involved in management functions at Ericsson Austria AG (1998) and Schrack Seconet AG (1997). He graduated with a degree in business administration (1992) and a Ph.D. (1997) from the University of Graz (*Karl-Franzens-Universität*).

In addition, Franz Semmernegg serves as a member of the managing board of CALPANA business consulting GmbH, Kapsch Smart Energy GmbH, Kapsch Cashpooling and Hedging GmbH, Kapsch IT Services for finance and industries GmbH and Kapsch S.R.L., as deputy chairman of Austria Telecommunication International AG and as a member of the advisory board of Kapsch Sp. z.o.o., Kapsch Kft., Kapsch s.r.o. (Prague), Kapsch s.r.o. (Bratislava) and Enso GmbH.

Kari Kapsch has been a member of the supervisory board of Kapsch TrafficCom AG since June 2002. He served as deputy chairman of the supervisory board from June 2002 to December 2002 and as chairman of the supervisory board from December 2002 to September 2005. Kari Kapsch has also been the COO of KAPSCH-Group Beteiligungs GmbH since December 2005. He is also the COO of Kapsch AG and CEO of Kapsch CarrierCom AG. He is involved in several industry-related associations and was the chairman of the management board of Young Industry Vienna (*Junge Industrie Wien*) and vice-chairman of Young Industry Austria (*Junge Industrie Österreich*) from 1996 to 2002. Kari Kapsch graduated with a degree in physics (1988) and a Ph.D. (1992) from the University of Vienna (*Universität Wien*).

In addition, Kari Kapsch is a member of the managing board of Kapsch Immobilien GmbH, chairman of the board of Kapsch BusinessCom AG and of Austria Telecommunication International AG as well as a member of the advisory board of Kapsch Sp. z.o.o., Kapsch Kft., Kapsch s.r.o. (Prague) and Kapsch s.r.o. (Bratislava). Kari Kapsch is the brother of Georg Kapsch, the CEO of Kapsch TrafficCom AG.

William Morton Llewellyn was elected to the company's supervisory board by the annual shareholders' meeting on 10 July 2008. He has worked in the banking industry since 1994, namely in the ING, WestLB and HSBC Groups, where he was involved in corporate, leveraged and project finance as well as debt capital markets. He is currently head of debt capital markets at Evolution Securities Ltd., UK. He qualified as a chartered accountant in 1991 with Robson Rhodes, where he worked in auditing, accounting, and insolvency services. He graduated from London University in 1987 with a BA in Law and Economics.

Christian Windisch has been a member of the supervisory board delegated by the works council since November 2002. He joined Kapsch Group in September 1984 and is currently employed in quality management. Christian Windisch graduated from the Polytechnic (*Höhere Technische Lehranstalt*) in Vienna with a degree in engineering.

Claudia Rudolf-Misch has been a member of the supervisory board of Kapsch TrafficCom AG delegated by the works council since November 2010. She joined Kapsch TrafficCom in June 2004 and is responsible for the integrated management systems HSSEQ (Health, Safety, Security, Environment, Quality). She is a certified manager and auditor according to ISO 9001, ISO 14001, and OHSAS 18001. Claudia Rudolf-Misch received an MBA in 2001.

All members elected by the shareholders' meeting are considered independent as defined by rule C-53 of the Code and the guidelines for independence according to appendix 1 of the Code. William Morton Llewellyn is also independent of the principal shareholder of KAPSCH-Group Beteiligungs GmbH as defined by rule C-54 of the Code.

The supervisory board held four meetings in the past fiscal year. No member of the supervisory board attended fewer than half the meetings. In the past fiscal year, there were no transactions requiring approval in accordance with § 95 para. 5 no. 12 of the Stock Corporation Act (*Aktiengesetz*) with members of the supervisory board or with companies in which a member of the supervisory board has a significant financial interest, with the exception of the transactions listed in the notes to the consolidated financial statements under "Related parties".

Remuneration. The members of the supervisory board and its committees receive reimbursement of actual expenses, including reasonable travel expenses. In addition, the shareholders' meeting may provide for the remuneration of supervisory board members. On 24 June 2009, the annual shareholders' meeting resolved to grant William Morton Llewellyn remuneration of TEUR 3 per meeting. Remuneration of TEUR 21 was paid for the past fiscal year. No other member of the supervisory board receives specific remuneration for such office.

Kapsch AG renders remunerated consulting services, which are performed in part by Franz Semmerneegg and/or Kari Kapsch, to Kapsch TrafficCom AG.

Directors and officers liability insurance. The members of the supervisory board are insured against financial losses with a directors and officers liability insurance policy. In addition to the supervisory board, the members of the managing board as well as key managers of the Kapsch TrafficCom Group are also insured. A collective premium is paid, and it is therefore not possible to allocate a specific amount to individual members of the supervisory board.

Committees of the Supervisory Board.

The supervisory board has established an audit committee (*Prüfungsausschuss*) and a committee for managing board matters (*Ausschuss für Vorstandsangelegenheiten*).

The committee for managing board matters is responsible for the relationship between the company and the members of the managing board (including remuneration issues), except for the appointment or dismissal of members of the managing board. It consists of two members of the supervisory board elected by the shareholders' meeting, including the chairman of the supervisory board. The current members of the committee for managing board matters are Franz Semmernegg (chairman) and Kari Kapsch. The committee for managing board matters held one meeting in the past fiscal year.

The audit committee is responsible for the duties set out in section 92 para 4a Stock Corporation Act (*Aktiengesetz*). These responsibilities include the review and preparation of the approval of the financial statements and consolidated financial statements, the audit of the corporate governance report, the review of the audit process and the auditor's independence, the preparation of a proposal for the distribution of profit and the preparation of a report to the annual shareholders' meeting. Furthermore, the audit committee prepares the proposal of the supervisory board for the selection of an auditor, reviews the accounting process and the effectiveness of the internal control and risk management systems.

One member of the audit committee must be a financial expert (*Finanzexperte*). Persons who were previously members of the managing board, managing directors or auditors of the company or persons who certified the company's annual or consolidated financial statements within the last three years do not qualify as financial experts and may not serve as chairman of the audit committee. The current members of the audit committee are Franz Semmernegg (chairman/financial expert), Kari Kapsch and Christian Windisch (since November 2010, formerly Werner Dreschl). The audit committee held a total of four meetings in the past fiscal year.

In addition to the members of the audit committee, the managing board and a representative of the auditor, if requested by the chairman of the audit committee or required by law, attend the audit committee meetings.

Promotion of Women to the Managing and Supervisory Boards and Senior Positions.

Kapsch TrafficCom AG has no specific plan for promoting women to the managing board, the supervisory board or senior positions in the company and its subsidiaries. Candidates are always selected with a view to identifying the best person for the job, regardless of gender. Women are employed in various senior positions throughout Kapsch TrafficCom AG (such as head of finance and administration) and its subsidiaries. In November 2010 the works council delegated a female representative to the supervisory board.

Women are supported through a flexible working hour scheme that is designed to combine professional and private life. In addition, Kapsch TrafficCom cooperates with schools, universities and colleges in order to increase the female quota. It also engages in gender mainstreaming through participation in specific programs such as "FIT *Frauen in die Technik*" or "FemTech". A specific trainee program "Women into sales" has been established. The Kapsch TrafficCom Group has established a committee for gender mainstreaming.

Report of the Supervisory Board.

Franz Semmernegg, Chairman of the Supervisory Board

The Kapsch TrafficCom AG supervisory board held a total of four meetings during the fiscal year from 1 April 2010 to 31 March 2011. No member of the supervisory board attended fewer than half of the meetings. The supervisory board was informed by the managing board on an ongoing basis in writing and verbally as well as in the meetings held jointly with the managing board on the position, development and strategy of the company, and monitored and advised the managing board during the period under review. The chairman of the supervisory board was in regular contact with the chairman of the managing board in order to discuss business development, strategy and risk management within the company.

The annual financial statements of Kapsch TrafficCom AG and the consolidated financial statements, each as of 31 March 2011, as well as the management report on the Company and the Group dated 13 May 2011, which were prepared by the managing board, were audited by the appointed independent auditor PwC INTER-TREUHAND GmbH, Wirtschaftsprüfungs- und Steuerberatungsgesellschaft, Vienna and awarded an unqualified audit opinion. The annual and consolidated financial statements, the managing board's proposal for the distribution of profit and the auditors' reports (including the management letter) as well as the corporate governance report were discussed in detail with the managing board and the independent auditors at a meeting of the audit committee and subsequently presented to the supervisory board. The supervisory board reviewed these documents in accordance with Section 96 of the Austrian Stock Corporation Act (*Aktiengesetz*) and approved the unconsolidated financial statements in line with Section 96 Para. 4 of the Austrian Stock Corporation Act (*Aktiengesetz*). The supervisory board concurs with the managing board's proposal for the distribution of profit.

The audit committee held a total of four meetings during the fiscal year from 1 April 2010 to 31 March 2011 and met the responsibilities as set out in section 92 para 4a of the Stock Corporation Act (*Aktiengesetz*).

The committee for managing board matters held one meeting in the past fiscal year and addressed extending the managing board mandates with Georg Kapsch and Erwin Toplak until 31 March 2014 and concluding a new management contract with Erwin Toplak.

The supervisory board extends its thanks to the members of the managing board and all employees of Kapsch TrafficCom AG for their work in the fiscal year 2010/11.

Vienna, 8 June 2011

Franz Semmernegg
Chairman of the Supervisory Board

The Kapsch TrafficCom Share.

Stock Markets in Fiscal Year 2010/11.

International stock markets. The development of share prices in 2010 was marked by pronounced differences between individual markets and industries. The general market recovery that began during 2009 only continued on a selective basis. The varying performance of the markets is a reflection of the complex environment during the stock exchange year 2010. The mood on the stock exchanges was positively influenced by the unexpectedly strong economic recovery, the continued low-interest policy by central banks and, in particular, the improvement in corporate earnings that by far surpassed analysts' expectations. Performance was essentially subdued by the debt crisis in several euro-zone countries. In the first quarter of 2011, the international stock markets were affected by the events in North Africa, the Near East and Japan.

Vienna Stock Exchange. After recording a plus of 42.5 percent in 2009, the Austrian Traded Index ATX continued its upward trend and gained 16.4 percent in 2010. The prices of Austrian stocks still remain well below the highest levels of previous years. The market capitalization totalled EUR 91.9 billion as of 31 December 2010, and the average monthly stock turnover amounted to EUR 3.1 billion in 2010 (single count). The Vienna Stock Exchange was also heavily influenced by the events in North Africa, the Near East and Japan in the first quarter of 2011.

Kapsch TrafficCom Share in Fiscal Year 2010/11.

In the fiscal year 2010/11, the Kapsch TrafficCom share clearly outperformed the Austrian and international stock markets. The entire year saw a sharp increase in the share price and trading volume. Compared with a fiscal year 2009/10 closing price of EUR 25.26 as at 31 March 2010, the share price significantly increased throughout the fiscal year 2010/11 and closed at EUR 62.50 on 31 March 2011. This corresponds to an increase of 247.4 %, which by far exceeds the 45.2 % plus recorded by the comparative index ATX Prime during the same period.

¹ offer price on 26 June 2007 and opening value for ATX Prime on 26 June 2007, each indexed to 100

Based on a closing price of EUR 62.50 per share as of 31 March 2011 and an unchanged number of 12.2 million shares, Kapsch TrafficCom's market capitalization was EUR 762.5 million. The average daily turnover of the Kapsch TrafficCom share on the Vienna Stock Exchange was approximately EUR 1.24 million (double count), which clearly exceeds the previous year at EUR 0.29 million (double count).

Key Data on the Share		2010/11	2009/10	2008/09	2007/08

Dividend Policy.

Kapsch TrafficCom's policy is to recommend a distribution of dividends that would reflect a payout ratio of approximately one-third of annual profits. The company's ability to pay dividends is determined on the basis of the annual financial statements of Kapsch TrafficCom AG. The timing and amount of such dividends, if any, will depend upon the company's future earnings and prospects, the capital requirements resulting from projects and acquisitions and the company's financial condition and other factors considered relevant by the managing and supervisory boards. In any event, the dividend is subject to the approval of the shareholders' meeting.

For the fiscal year 2010/11, the managing board will make a proposal to the shareholders' meeting on 22 August 2011, calling for the approval of a EUR 1.00 dividend per share for the fiscal year 2010/11 (2009/10: EUR 0.75 per share). Due to the outstanding operational development during the reporting year, the managing board's proposal reflects a payout ratio of approximately 55 % in relation to the profit for the period attributable to equity holders of the Company (2009/10: approximately 28 %) and exceeds the long-term average based on the dividend policy.

Shareholder Structure.

As of 31 March 2011 and unchanged compared to 31 March 2010, approximately 31.6 % of the shares were in free float, whereas the remaining approximately 68.4 % were held by KAPSCH-Group Beteiligungs GmbH. As of 31 March 2011, no other shareholder held more than 5 % of the voting rights in Kapsch TrafficCom.

Core shareholder. KAPSCH-Group Beteiligungs GmbH is a wholly-owned subsidiary of DATAX HandelsgmbH. The shares in DATAX HandelsgmbH are held in equal proportions by Traditio-Privatstiftung, ALUK-Privatstiftung and Children of Elisabeth-Privatstiftung, each a private trust under the Austrian Law for Private Trusts (*Privatstiftungsgesetz*). Each of these private trusts is managed by a separate executive board (*Stiftungsvorstand*) and no person serves on the executive board of more than one of the three private trusts. The beneficiaries of these private trusts are Georg Kapsch and members of his family (*Traditio-Privatstiftung*), Kari Kapsch and members of his family (*ALUK-Privatstiftung*) and Elisabeth Kapsch and members of her family (*Children of Elisabeth-Privatstiftung*).

Free float. Kapsch TrafficCom AG has a widely diversified shareholder structure. In addition to the core shareholder KAPSCH-Group Beteiligungs GmbH (68.4 %), 22.3 % are held by institutional investors with the top ten in the aggregate holding 74.6 % of that share. The share of private investors totals 6.9 %, including the shares held by Erwin Toplak, the COO of Kapsch TrafficCom AG, and 2.4 % are held by other investors including shares in trading positions. Based on information available to the company, the majority of institutional investors comes from Anglo-Saxon countries, the U.K. and Ireland (23.1 %) as well as North America (27.0 %). Austrian institutional investors hold 11.4 % of the shares and the remaining 38.5 % are attributable to investors in Continental Europe (excluding Austria).

Investor Relations.

Professional investor relations have a high priority at Kapsch TrafficCom. This department reports directly to the CEO, but its work is also integrated closely with the head of finance and administration. The goal of investor relations activities at Kapsch TrafficCom is to provide a comprehensive view of the company, thereby facilitating an appropriate valuation of the Kapsch TrafficCom share.

Kapsch TrafficCom held international road shows and participated in investor conferences in Europe and the U.S.A. during the fiscal year 2010/11. The CEO and the investor relations team met with numerous investors throughout the world and discussed the company as well as its development and strategy. The Kapsch TrafficCom website, which represents an important means of communication and provides a wide range of information on the company and its stock, was completely redesigned and expanded in the reporting year.

Memberships and Awards.

VÖNIX Sustainability Index. Sustainability has become a key factor for success in today's business world. In Austria, listed companies that are considered leaders in the areas of social and ecological performance are listed in the VÖNIX (VBV Austrian Sustainability Index). On 22 June 2009 the shares of Kapsch TrafficCom AG were included in the VÖNIX Sustainability Index.

United Nations Global Compact. Kapsch TrafficCom has been a member of United Nations Global Compact (UNGC) since January 2010 and commits to the principles of the world's largest network for corporate social responsibility and sustainable development. The goal of this globe-spanning pact between industry and civil society is to make globalization more socially and environmentally acceptable.

Vienna Stock Exchange Award 2011. In May 2011, Kapsch TrafficCom received the Vienna Stock Exchange Award 2011 in the category "Small and mid caps". The Vienna Stock Exchange Award is a joint initiative of Aktienforum, Cercle Investor Relations Austria (C.I.R.A.), the Austrian National Bank (OeNB), the Austrian Association for Financial Analysis and Asset Management (ÖVFA), the Association of Austrian Investment Companies (VÖIG), the Vienna Stock Exchange and the Representative for Capital Market Development and Corporate Governance. The purpose of this award is to honor companies for their excellent work on the Austrian capital market.

Research Reports.

The regular analysis of the company by reputable domestic and international investment banks maintains the visibility of the Kapsch TrafficCom AG share in the financial community. Kapsch TrafficCom AG is currently covered by six analysts (in alphabetical order): Berenberg (London, UK), Deutsche Bank (Vienna, Austria), Erste Bank (Vienna, Austria), Macquarie Securities Group (Frankfurt, Germany), Raiffeisen Centrobank (Vienna, Austria) and WestLB (Duesseldorf, Germany).

Corporate Bond.

On 3 November 2010, Kapsch TrafficCom AG successfully issued a corporate bond with a tenor of seven years and a volume of EUR 75 million. The substantial demand allowed the bond to be priced at a re-offer spread of mid-swap plus 195 basis points. More than 70 % of the bond were purchased by retail investors, and the remainder were placed with domestic and international institutional investors. The proceeds are intended to finance the acquisition of Mark IV IVHS, the capital requirements of other potential projects and general corporate purposes.

***) What you don't see here: Our 'Incident Detection System' reliably monitors tunnels and roads and automatically detects hazardous situations along the roadside.**

Incident Detection System – When accidents occur, seconds can be crucial. Fast and efficient coordination of the rescue effort is imperative for saving human lives. The Kapsch Incident Detection System uses smart video technology for reliable detection of events and hazardous situations, such as smoke, wrong-way drivers, illegally stopped vehicles or lost cargo, therefore assuring safe operation and traffic flows in tunnels and along roads.

The Company.

Corporate History.

The Kapsch Group was founded in 1892 by Johann Kapsch in Vienna, Austria. In the early 1990s, the Kapsch Group entered the road traffic telematics business. Initially solely acting as a system integrator, selected acquisitions, including the acquisitions of the electronic toll collection division of Bosch Telecom, Germany (1999), and Combitech Traffic Systems AB, Sweden (2000) provided access to an own technology portfolio. Following a reorganization of the Kapsch Group in 2002, Kapsch TrafficCom AG was created by means of a demerger from the former Kapsch AG. Since then Kapsch TrafficCom AG and its subsidiaries form the road traffic telematics division of the Kapsch Group. The company entered the business of tolling systems operations with the foundation of Kapsch Telematic Services GmbH in 2005 and, since then, has covered the entire value creation chain of its customers, from technology to integration and operations as a one-stop shop with its end-to-end solution portfolio.

The Kapsch TrafficCom Group has accelerated its internationalization since 2006 by establishing subsidiaries and representative offices in various countries and by making selected acquisitions, including DPS Automation S.A. in Argentina. In June 2007, Kapsch TrafficCom made an initial public offering to support its global expansion and the controlled growth of the business. The company entered the North American market in 2008 by acquiring the assets of the U.S. TechnoCom Corp. Kapsch TrafficCom purchased a 20.47 % stake in the Norwegian competitor Q-Free ASA in January 2009, which was subsequently diluted to 18.40 % as a consequence of capital increases.

In the fiscal year 2010/11, Kapsch TrafficCom AG acquired a 56.81 % stake in the South African TMT Services and Supplies (Proprietary) Limited. In addition, the Mark IV IVHS businesses in the United States, Canada and Mexico were acquired.

Market.

Kapsch TrafficCom currently addresses the Intelligent Transportation Systems (ITS) market, which comprises the following market segments:

- Electronic toll collection (ETC) systems with technologies that enable drivers to pay toll fees without stopping at tollgates.
- Traffic management systems (TMS) that monitor traffic, optimize signal timing, and regulate the flow of traffic.
- Commercial vehicle operations (CVO) systems which are technologies to enhance motor carrier productivity and safety during interstate transportation.
- Public vehicle transportation management systems (PVTMS) which streamline transit, allow transit companies to locate vehicles and provide safety to commuters.
- Vehicle information systems (VIS) which include a host of applications that enable commuters to have a safe journey.

Intelligent transportation systems are integrated networks of communication technologies, independent modules of sophisticated PC/satellite-based navigation systems and other electronic data sensing, collection and transmission systems that collectively enhance the transportation experience by enabling highly regulated and congestion-free traffic flow, guided, hassle-free, safer and collision-free on-road travel, faster emergency response times, automated and unobtrusive vehicle recognition and tracking, toll collection and fleet management.

Market size. According to Global Industry Analysts, September 2010, the size of the ITS market amounted to USD 11.8 billion in 2010 and is increasing steadily. The largest market segment is traffic management systems, accounting for almost 38 %. The fastest-growing ITS segment is electronic toll collection systems with a compounded average growth rate of 17.1 % between 2000 and 2010; based on a worldwide volume of about USD 2.8 billion, it had a nearly 24 % share of the ITS market in 2010.

Market drivers. Kapsch TrafficCom has identified the following four factors as the main drivers for its current market:

Funding of infrastructure projects. The growth in the number of vehicles requires additional financing to construct new and maintain existing roads. Road user charging offers a constant source of financing and thus helps governments to provide the necessary financing for infrastructure projects. Efficient, in particular electronic toll collection systems offer a significant, constant and sustainable source of additional funds for governments, public authorities and concessionaires, which can be used for the expansion and maintenance of road infrastructures.

Reduction of congestion. Road user charging is largely perceived as an effective solution for reducing high levels of congestion, particularly in metropolitan areas, as mandatory payments for road usage encourage carpooling or the use of public transportation.

Reduction of environmental pollution through road traffic. Efforts to reduce environmental pollution have become a market driver for the introduction of toll collection systems. Such systems encourage reduced or modified vehicle usage and reduce the need to further expand the road network, thereby reducing emissions and pollution levels. Electronic toll collection systems, in particular for the multi-lane free-flow of traffic, also have a proven ability to decrease environmental pollution and carbon dioxide emissions by reducing congestion at toll plazas and not interfering with the traffic flow. Urban toll solutions also help to reduce congestion levels and environmental pollution.

Reduction of road accidents. In particular, traffic management systems are expected to lower accident rates and increase the probability of surviving an accident.

Market Positioning.

Kapsch TrafficCom is an international supplier of superior intelligent transportation systems. Its principle business is the development and supply of electronic toll collection systems, in particular for the multi-lane free-flow of traffic, and the technical and commercial operation of such systems. Kapsch TrafficCom also supplies traffic management systems (TMS). The recently acquired TMT is a specialist for PVTMS in the South African market. In the future, Kapsch TrafficCom will also address the CVO and VIS market segment through its newly introduced 5.9GHz technology.

Products, Systems and Solutions.

Kapsch TrafficCom offers products, systems and services as a one-stop shop and covers the entire value creation chain of customers with its end-to-end solution portfolio. The core expertise of Kapsch TrafficCom includes toll collection systems, the operation of toll collection systems, urban traffic solutions, ITS and telematics solutions as well as products and components for the ITS market.

Toll collection systems. Kapsch TrafficCom develops, integrates, implements, maintains and operates electronic toll collection systems on single-lanes or for the multi-lane free-flow of traffic as well as manual and automatic toll collection systems. These products and systems support the road user charging process in many ways: as part of networks; for individual highway sections or areas; in urban environments or as nationwide systems for heavy traffic or for all vehicles. Both pre-paid and post-paid charging models are supported. The Kapsch TrafficCom systems follow international technical standards and offer outstanding transaction rates, data security and system reliability and a high rate of return, while minimizing risks. The solutions have an open, modular and flexible design.

Electronic toll collection systems for the multi-lane free-flow of traffic. Many years of experience from the implementation of almost 20 systems make Kapsch TrafficCom to an internationally recognized supplier in this field. These systems work without impeding the traffic flow, thereby ensuring maximum throughput and optimal utilization of existing road infrastructure. The systems leverage a variety of technologies in accordance with each toll project's specific requirements, offering a secure, flexible combination of the benefits provided by microwave technology (dedicated short-range communication), satellite positioning (GPS/GNSS, GSM/GPRS) and video technology.

Electronic toll collection systems on single-lanes. Kapsch TrafficCom utilizes modern, high-performance traffic sensors based on a variety of technology platforms (video, laser, etc.), which can be integrated easily and cost-effectively into existing toll collection infrastructures.

Manual and automatic toll collection systems. Kapsch TrafficCom offers systems for conventional road user charging and for manual and automatic toll collection, which can subsequently be upgraded to electronic toll collection systems.

Enforcement systems. As an important part of toll collection systems, enforcement systems constitute an effective and visible deterrent against systematic toll evasion. This safeguards the road operator's income, ensures equality for all road users and preserves the integrity of the system as a whole. Kapsch TrafficCom provides solutions for stationary and mobile enforcement or a combination thereof based on video or laser-scanner technologies.

Central systems. As another important part of toll collection systems, central systems support not only the tolling and enforcement processes, but also the payment processes ranging from the automatic validation of images to fully automatic invoicing and generation of payment reminders. The Kapsch TrafficCom central system has a highly flexible design and may be easily customized to accommodate customer-specific toll collection and charging requirements.

Operation of toll collection systems. Kapsch TrafficCom also operates toll collection systems to support the entire value creation chain of customers. Turnkey solutions minimize risks for road operators and investors and ensure consistent investment security. Kapsch TrafficCom is dedicated to maintaining quality in processes and results across all project phases and stages of the value chain.

Road user services. These services include the planning and implementation of point-of-sale systems, the operation of call centers and the design of suitable web portals to meet the varied information needs of road users in a cost-effective and timely manner.

Payment Solutions. Kapsch TrafficCom payment solutions include comprehensive services from invoicing to reminders and dunning, and support a variety of payment systems, such as cash, credit cards or fleet cards. To enable enforcement of the toll collection process, validation centers are implemented within the scope of an operations project and specific measures for mobile enforcement are provided.

Urban traffic solutions. Road user charging and access control are today regarded as highly effective tools for urban traffic management throughout the world. They contribute to lowering congestion and improving the quality of life by reducing harmful emissions and noise pollution.

City tolling. Kapsch TrafficCom offers an electronic toll collection and enforcement system for city tolling solutions, which is based primarily on automatic video recognition of license plates in conjunction with microwave communication. This solution is geared to the demands of urban environments and accommodates traffic congestion, stop and go traffic and undisciplined driving behavior (such as weaving and overtaking). Moreover, it provides versatile support for zone- or time-based pricing models.

Dynamic zones. This fully automatic Kapsch TrafficCom system enables urban traffic to be managed in accordance with changing traffic patterns and/or particulate matter concentrations. It makes each individual road user aware of the impact of his or her behavior on the environment and also permits highly responsive traffic management.

Dynamic parking. Kapsch TrafficCom offers solutions which enable local governments to introduce fully automatic time-based solutions for road parking. Charges are dependent upon the period a vehicle spends within a defined zone. This makes the entire process of calculating charges and monitoring payment simpler, more transparent and more reliable for both local government agencies and road users.

ITS and telematic solutions. Kapsch TrafficCom telematic solutions improve road safety and support the efficient use of existing infrastructure. The increasingly broadened solution portfolio is primarily based on incident detection systems, video-based traffic sensors and a multifunctional telematics platform.

Incident detection systems. These systems make it possible to reliably identify key events or exceptional situations, such as congestion, accidents, or dangerous driving. As a result, they promote the reliable and safe flow of traffic, especially in critical areas such as tunnels.

Telematic platform. This platform comprises a modular software system that can be deployed alongside electronic toll collection solutions. It provides a multifunctional basis for a variety of telematic applications for urban planning, traffic management, road safety and mobility services.

Products and components for the ITS market. With a network of research and development centers, Kapsch TrafficCom develops core technologies and components for road user charging and telematic applications. Products include on-board units, roadside infrastructure (such as transceivers) or cameras as well as enforcement and central systems.

On-board units. State-of-the-art programming stations are available for the personalization of on-board units, and mobile readers for the mobile enforcement of on-board units. These products are designed for ease-of-configuration with standardized interfaces, maintenance-free operation and user friendliness.

References, Customers and Selected Projects.

Customers around the world rely on the products, systems, solutions and services of Kapsch TrafficCom – from Austria and the Czech Republic, to the U.S.A., Canada, Chile, Australia and South Africa. Customers include public sector organizations, private concessionaires and leading system integrators. The numbers not only speak for themselves – they speak for Kapsch TrafficCom: 260 customer references in 41 countries, almost 44 million delivered on-board units and more than 18,000 toll lanes.

Europe. A nationwide electronic truck tolling system was launched in Austria on 1 January 2004. Kapsch TrafficCom was responsible for the entire turnkey system: the planning, design and implementation of the roadside infrastructure, the development of application software and the design and production of on-board units, system integration, implementation and start-up of the entire system, the coordination of subcontractors and the project roll-out.

In the Czech Republic, Kapsch TrafficCom was awarded a contract for the design, development, integration, installation, implementation, operation and maintenance of the nationwide electronic truck tolling system that started commercial operation on 1 January 2007. The project was completed in the record time of just nine months.

In Poland, an electronic toll collection system on an existing road network that initially covers 1,750 kilometers is in implementation.

In Italy, Kapsch TrafficCom has deployed urban traffic solutions in, among other cities, Rome, Bologna, Piacenza, Genoa, Livorno, Arezzo, Ravenna, Lecce and Salerno.

Americas. In North America, the recently acquired Mark IV IVHS has enabled many landmark ITS deployments including: the non-stop, all-electronic toll road on Highway 407 ETR in Canada; interoperability between truck electronic preclearance systems and toll collection (PrePass); and the E-ZPass® system of the 24 toll authorities in 14 states who comprise the E-ZPass® Group in the northeastern region of the United States. E-ZPass® is a regional ETC system that can be used throughout the Northeast and Midwest of the United States.

In South America, Kapsch TrafficCom has established three electronic toll collection systems on highways in Chile: Costanera Norte, Autopista Central and Vespucio Norte Express. All three systems include technologies for vehicle detection and classification (VDC) and vehicle detection and registration (VDR).

Africa. KapschTrafficCom was responsible for the introduction of Africa's first electronic toll collection system on the Platinum Toll Highway in South Africa in 2002. In 2009, Kapsch TrafficCom was awarded the contract for the implementation and operation of an electronic toll collection system for the multi-lane free-flow of traffic in the Gauteng province. This project is currently in the realization stage.

Asia-Pacific region. In Melbourne, Australia, Kapsch TrafficCom implemented the world's first electronic toll collection systems for the multi-lane free-flow of traffic on an urban highway in 1999, including systems for vehicle detection and classification and for vehicle registration. Moreover, Kapsch TrafficCom has introduced other such systems in Australia: on the Western City Orbital and Eastlink in Melbourne, on the Hills Motorway (M2) in Sydney and the Clem 7 tunnel in Brisbane.

In India, Kapsch TrafficCom implemented an electronic toll collection system (manual toll collection with electronic microwave communication) on highway No. 8 in New Delhi, India, including the largest toll plaza in Asia with 36 lanes, in 2007.

Research and Development, Innovation and Quality.

Research and Development. The Kapsch TrafficCom Group has a network of research and development centers in Vienna and Klagenfurt (Austria), Jönköping (Sweden), Bologna (Italy), Buenos Aires (Argentina), Toronto (Canada), Carlsbad (California, U.S.A.) and Capetown (South Africa). These research and development centers are organized as competence centers. All research and development activities are coordinated from the headquarters in Vienna.

Research and development activities are a high priority for the Kapsch TrafficCom Group in pursuing its strategic goals. The knowledge of entirely new technologies and their possible applications based on national and international standards forms the foundation for successful business developments and enables the entry into new markets. Successful research and development is the foundation for the sustained improvement of existing products and systems as well as the continuous reduction of production, installation, operating and maintenance costs, all of which are essential for maintaining a technological and competitive advantage.

The Kapsch TrafficCom Group focuses its activities primarily on new, innovative applications and applied research and development for all types of ITS solutions. The research and development activities are complemented in some areas by joint projects and close cooperation with universities, public and private institutes and technology and research companies.

Innovation. Kapsch TrafficCom defines its mission as consistently creating competitive advantages and benefits for its customers and partners, while ensuring that the company lives up to its responsibility to the environment. The objective of Kapsch TrafficCom is global leadership in quality and innovation for ITS solutions.

Kapsch TrafficCom wins over and retains customer confidence through a strict focus on customer requirements. The company works to achieve long-lasting partnerships with satisfied customers through optimal service. Kapsch TrafficCom is committed to a permanent and integrated innovation process that reflects its market position as a leading innovator and secures this position over the long-term.

Quality. The Kapsch TrafficCom quality processes are based on ISO 9001 and meet the requirements of the V-Model, a project management method to identify the improvement potential originally stemming from IT. The company follows an integrated management system for health and safety, security, environment and quality (HSSEQ), with quality certified according to ISO 9001, environment certified according to ISO 14001 and health and safety certified according to OHSAS 18001. Kapsch TrafficCom is also certified for IT-service-management according to ISO 20000. All processes are documented in line with the respective norms and frequently audited.

Employees.

The table below shows the allocation of employees within the Kapsch TrafficCom Group as of 31 March during the last five years:

	31 March 2011	31 March 2010	31 March 2009	31 March 2008	31 March 2007
Breakdown by function					
Intelligent transportation systems	2,024	879	785	647	553
Manufacturing and logistics (Kapsch Components GmbH & Co KG)	143	144	161	177	221
Total by function	2,167	1,023	946	824	774
Breakdown by region					
Europe:					
Austria	605	528	519	497	475
Sweden	134	122	110	97	89
Western Europe	15	13	10	1	0
Central and Eastern Europe (excluding Austria)	195	152	148	128	108
Latin America	196	132	112	80	94
Asia and Africa	845	38	14	12	2
Australia and New Zealand	12	11	10	9	6
U.S.A. and Canada	165	27	23	0	0
Total by region	2,167	1,023	946	824	774

Training and education. Kapsch TrafficCom places great importance on the continued training and education of its employees. This involves not only promoting professional education, but also providing seminars and workshops for personality development and teamwork skills. Training sessions tailored to the particular needs of employees are offered within the framework of the Kapsch Academy. Selected employees are prepared for their future tasks in a management trainee program. The Group has implemented a job rotation program to promote the international exchange of staff between the various locations.

Profit participation plan. Kapsch TrafficCom is aware of the employees' contribution to its success and acknowledges this through a profit participation plan that allows employees to share in the profit of the Kapsch TrafficCom Group. The Kapsch TrafficCom Group rewards the commitment of its employees with a 5 % share in profit. Country-specific upper limits have been established to ensure that this distribution reflects local purchasing power. Every employee is entitled to participate in this program, which is independent of the person's salary or wage.

External pension fund. Kapsch TrafficCom makes contributions to an external pension fund for employees of group companies in Austria under a defined contribution scheme. The amount of the payments is based on the individual employee's income and the return on sales of the entity.

Working environment. The core corporate values – dynamism, respect, responsibility, family, discipline, performance, transparency and freedom – and their manifestation in everyday working activities contribute to a good working environment.

Corporate Strategy.

The primary objective of Kapsch TrafficCom is to strengthen its position as an internationally recognized supplier of superior intelligent transportation systems and, in particular, as a provider of technical and commercial operation services. Striving for global quality and innovation leadership in the rapidly growing market, Kapsch TrafficCom is always a step ahead with its focus on the following principal strategies:

Capitalize on the growth in the global market as well as exploit new and further market opportunities.

Kapsch TrafficCom intends to participate in the strong growth expected in the global ITS market and sees significant opportunities for the implementation and operation of systems across the world. The company intends to capitalize on its leading position and increase its market share in the regions where it already has a strong presence. In addition, Kapsch TrafficCom intends to continue and intensify the regional expansion of its multinational footprint into selected new markets. Kapsch TrafficCom also plans to target new growth opportunities and will participate in selected tenders for tolling projects of various scales on all continents.

In particular, Kapsch TrafficCom will participate in the tenders for further nationwide toll collection systems and, with its “Kapsch Area”, has a cost efficient hybrid solution that combines the advantages of microwave technology (dedicated short-range communication) and satellite technologies (GPS/GSM), thereby meeting specific customer requirements (e.g., all-road and all-vehicle tolling) in larger nationwide electronic toll collection systems. Kapsch TrafficCom intends to provide additional services and applications in connection with the electronic vignette, which the company believes may replace traditional paper vignettes over time.

Kapsch TrafficCom considers strategic acquisitions or joint ventures if such steps could more efficiently drive growth in selected geographical regions or could strengthen or expand the company’s technological know-how. The company is currently examining the further expansion of its business into the North American market. Kapsch TrafficCom also intends to expand its offering of ITS applications in a concerted and gradual manner.

Permanently targeting technological leadership. Kapsch TrafficCom intends to leverage its technological leadership in order to further broaden and enhance its product and service portfolio.

Taking advantage of the newest technologies in practical applications is an integral part of the strategy and a key success factor for Kapsch TrafficCom. The networked international research and development centers of Kapsch TrafficCom are therefore constantly searching for new, forward-looking applications.

Expand the position as a commercial operator of toll collection systems. Kapsch TrafficCom plans to expand its position as a commercial operator of toll collection systems and, in particular, intends to build on its experience from the successful commercial operation of the nationwide electronic truck tolling system in the Czech Republic.

The company plans to constantly increase the volume of recurring revenues through new projects where Kapsch TrafficCom is also responsible for the commercial operation, the technical operation of systems and the supply of supplemental equipment and components for the extension of installed systems.

***) What you don't see here: Our video-based 'Automatic Number Plate Recognition' not only supports toll collection, but can assist federal and state authorities to fight crime.**

Automatic Number Plate Recognition (ANPR) Traffic Surveillance System – Authorities increasingly use video-based number plate recognition systems to improve public safety. The Kapsch ANPR Traffic Surveillance System can aid in the search and location of stolen vehicles or vehicles used in criminal acts, such as bank robberies. In flowing traffic, the system automatically and discreetly matches the license plate numbers of travelling vehicles to a list of vehicles sought by the respective authority.

Sustainability.

Resource scarcity, demographic change, global warming, greater environmental awareness in transportation, investments in infrastructure, new requirements by our customers – all these developments call for long-term and responsible business activities. Kapsch TrafficCom has taken up these challenges and is dedicated to the issue of sustainability.

The Kapsch TrafficCom AG sustainability report, which was published for the first time in 2009/10, is intended to make the progress and future objectives in this area more transparent. The target group for this report consists of our stakeholders, who are and will be actively integrated into the process. This represents an essential foundation for a sustainability management system that is – in line with the corporate philosophy – always a step ahead.

The focal points follow the claim of Kapsch TrafficCom: always future-oriented – always innovative – always performance-oriented – always aware of its responsibilities – always close to its customers, **always one step ahead.**

Climate protection. The Kapsch TrafficCom products make valuable contributions to climate protection. The use of electronic toll collection systems keeps vehicles from standing and waiting at toll stations, which reduces CO₂ emissions by the vehicles. For the future, Kapsch TrafficCom is working intensively on linking these products with renewable energies. In addition, the company is actively reducing the indirect emissions caused by its production. Accordingly, the ventilation, climate control and lighting of the production and logistics hall at the subsidiary Kapsch Components were optimized in 2010 to reduce 175 tons of carbon dioxide per year.

Resource consumption. Kapsch TrafficCom AG constantly strives to use fewer resources in the creation of products and to increase the rate of recycling. These efforts are supported by awareness-raising measures and the reduction of waste through the partial use of compostable packaging. In addition, products with environmentally-oriented quality seals (eco label, Forest Stewardship Council – FSC) have preference in procurement.

Employee development and diversity. Committed employees represent the greatest capital of Kapsch TrafficCom AG. For this reason their development, diversity and equal opportunities are important to the company. An attractive range of career options, a great working climate and special promotion programs result in a low fluctuation rate and high average term of employment of over 10 years with the company.

Sustainable innovation. Kapsch TrafficCom makes an important contribution to a sustainable future with superior intelligent transportation systems. The company constantly invests in the development of innovative and environmentally friendly products, such as compostable product packaging or the operation of toll stations on the basis of photovoltaic modules and windmills. Research and development expenditures in the 2010/11 fiscal year amounted to EUR 37.3 million, which corresponds to approximately 10 % of sales or approximately 76 % of EBIT.

Energy consumption and efficiency. Kapsch TrafficCom strives to minimize the direct environmental footprint of its production and administration activities. For example, it always pays attention to energy efficiency when investing in new production plants. At the subsidiary Kapsch Components, production optimization saved 856,290 kWh of electricity per year – a success that was recognized with an energy efficiency award.

Product responsibility. The processes of the Kapsch TrafficCom AG quality management system are based on ÖNORM EN ISO 9001:2000 and also satisfy additional quality requirements. In addition, Kapsch TrafficCom operates an integrated quality management system and follows the general guidelines for environmental protection, general safety and workplace safety. Kapsch TrafficCom AG and its subsidiary Kapsch Components are certified in environmental management according to ISO 14001. Additional certifications are in planning.

Anti-corruption and compliance. As part of the internal risk management, all business units over which Kapsch TrafficCom AG has primary influence are audited with regard to their corruption risks and the first and second management level employees are trained in anti-corruption policy and anti-corruption processes. During the reporting period covered by the sustainability report, there were no corruption incidents or complaints due to anticompetitive behavior or the formation of a cartel or monopoly. There were also no reported discrimination incidents in the areas of human rights, promotion of diversity and enforcement of equal opportunities.

Work safety and employee health. A safe workplace and healthy employees are very important to the company, which is why two Austrian locations are certified according to the Occupational Health and Safety Assessment Series (OHSAS) 18001. In addition, the company has implemented a number of initiatives and programs to promote employee health.

Supply chain management. Kapsch TrafficCom expects high standards in performance and integrity from all its partners. Supplier relationships are based on a high quality level, and the company expects its business partners to comply with applicable laws, industry rules and contractual conditions. As part of its social responsibility efforts, Kapsch TrafficCom places particular value on complying with recognized standards, e. g. for the protection of human rights, workplace safety, environmental protection, anti-corruption principles and the prohibitions on child labor and forced labor.

Stakeholder dialog. Kapsch TrafficCom communicates extensively with its stakeholders through a wide range of personal, written and electronic communication.

Regional value creation. As an internationally active company, Kapsch TrafficCom AG understands that regional value creation gives rise to opportunities for both the company and the business environment. The men and women employed by the subsidiaries of the Kapsch TrafficCom Group come primarily from the local region, which allows for the use of the shared language as a valuable asset. When possible, materials and supplies are purchased from the respective local regions.

Outlook, challenges, goals. In the future, the Kapsch TrafficCom AG sustainability report will be published annually – in line with the membership of United Nations Global Compact (UNCG) – to show the progress on these issues. The next steps will be the development of a sustainability strategy which will form the basis for the definition of the most important action areas and the processes to meet these objectives.

The issue of sustainability will be firmly anchored in the Kapsch TrafficCom Group to best approach the challenges of tomorrow and remain, as ever, always one step ahead.

***) What you don't see here: Our 'Traffic Flow Analysis' helps to better control the traffic of today and better plan the roads of tomorrow.**

Traffic Flow Analysis – Thorough assessment of road utilization is an essential prerequisite for optimizing existing roads and planning new road infrastructure. Based on data supplied by the toll collection infrastructure, Kapsch Traffic Flow Analysis gives traffic planners and road operators a powerful analysis tool to understand traffic movements, such as identifying the main routes through a country, how much traffic is going from A to B, and which routes are taken, or the percentage of transit traffic on a route.

Business Segments and Subsidiaries.

Business Segments.

Kapsch TrafficCom categorizes its business into the three segments Road Solution Projects (RSP), Services, System Extensions, Components Sales (SEC), and Others (OTH).

Road Solution Projects (RSP). This segment includes projects with an aggregate volume in excess of EUR 3 million. Generally, such systems are awarded in tender processes by public authorities or private sector concessionaires. The tolling systems can be designed to cover individual road sections as well as nationwide road networks.

The types of projects realized by this segment result in significant fluctuations in revenues, cost of materials and other production services, staff costs as well as other operating expense and, in certain projects (such as the nationwide electronic truck tolling system in the Czech Republic), also in project financing costs. The segment RSP shows the one-time effects from the realization of new projects. The business in this segment is characterized by a significant volatility in revenues and operating results from period to period depending on whether individual projects are in the preparation, commencement or subsequent implementation phase.

Services, System Extensions, Components Sales (SEC). Once a system is implemented, Kapsch TrafficCom is typically responsible for its technical operation and maintenance. This segment is also responsible for supplying supplemental equipment and components (such as on-board units and transceivers) for the extension and the upgrade (such as the upgrade of manual to automatic or electronic toll collection) of existing systems. Since 2005, Kapsch TrafficCom also offers the commercial operation of systems. The segment SEC also includes smaller scale projects with an aggregate volume of less than EUR 3 million that are often not awarded in tender processes.

The segment SEC represents the company's recurring activities. The business in this segment is characterized by relatively stable revenue streams over a certain period, since these services are provided mainly based on medium- or long-term service and framework agreements. Kapsch TrafficCom expects its service offering will generate a continuous stream of revenues in this segment going forward, in particular through the services rendered for the commercial operation of the nationwide electronic truck tolling system in the Czech Republic.

Others (OTH). The segment Others includes the non-core business activities of the Kapsch TrafficCom Group that are conducted by its subsidiary Kapsch Components GmbH & Co KG. In this segment, engineering solutions, electronic manufacturing and logistics services are rendered to affiliated entities and third parties.

Total revenues amounted to EUR 388.6 million in the fiscal year 2010/11, which represents an increase of 80 % compared to the same period of the previous year (fiscal year 2009/10: EUR 216.0 million).

The segment Services, System Extensions, Components Sales (SEC) contributed 57 % to total revenues at EUR 223.3 million, an increase of 38 % compared to the same period of the previous year (fiscal year 2009/10: EUR 161.9 million).

The top five markets in the segment SEC were the Czech Republic at EUR 80.9 million (corresponding to 36 % of the total segment SEC revenues), Austria at EUR 32.6 million (15 %), South Africa at EUR 32.0 million (14 %), U.S.A. at EUR 17.2 million (8 %) and France at EUR 12.0 million (5 %). At EUR 48.6 million, 22 % of the total revenues of the segment SEC were generated outside the top five markets.

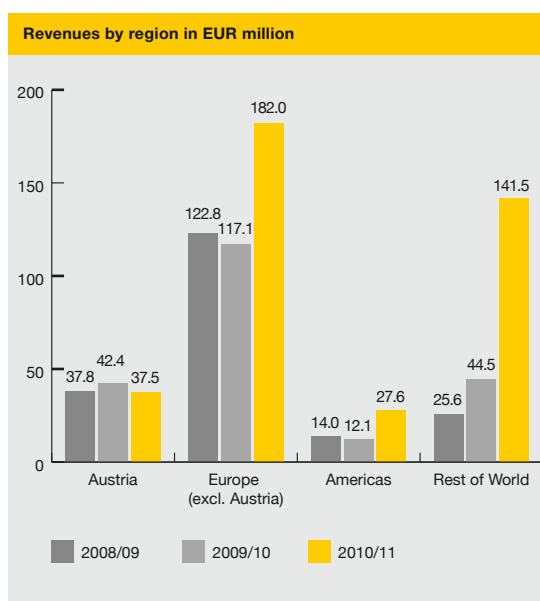

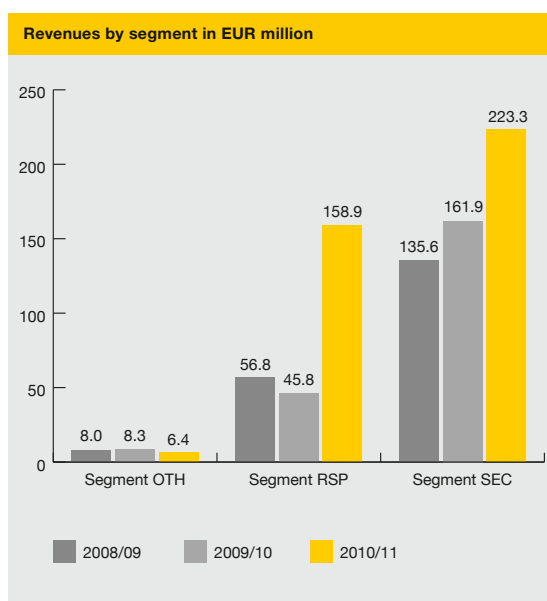

The segment Road Solution Projects (RSP) contributed 41 % to total revenues at EUR 158.9 million, which is an increase of 247 % compared to the same period of the previous year (fiscal year 2009/10: EUR 45.8 million).

The top five markets in the segment RSP were South Africa at EUR 88.7 million (corresponding to 56 % of the total segment RSP revenues), Poland at EUR 39.7 million (25 %), Czech Republic at EUR 21.0 million (13 %), Australia at EUR 7.5 million (5 %) and Chile at EUR 0.7 million (1 %). At EUR 1.3 million, less than one percent of the total revenues of the segment RSP were generated outside the top five markets.

The segment Others (OTH) contributed 2 % to total revenues at EUR 6.4 million, which reflects a decrease of 23 % compared to the same period of the previous year (fiscal year 2009/10: EUR 8.3 million). The top market was Austria at EUR 4.9 million (corresponding to 77 % of the total revenues of the segment OTH).

An analysis of the fiscal year 2010/11 by geographic region shows that Austria generated revenues of EUR 37.5 million (corresponding to 10 % of the total revenues), Europe (excluding Austria) EUR 182.0 million (47 %), the Americas EUR 27.6 million (7 %) and the Rest of the World EUR 141.5 million (36 %).

By country, the top five markets in the fiscal year 2010/11 were South Africa with revenues of EUR 120.7 million (corresponding to 31 % of the total revenues), the Czech Republic with EUR 102.0 million (26 %), Poland with EUR 39.7 million (10 %), Austria with EUR 37.5 million (10 %) and the U.S.A. with EUR 17.9 million (5 %). At EUR 70.8 million, 18 % of the total revenues were generated outside the top five markets.

Kapsch TrafficCom AG and its Subsidiaries.

The parent company Kapsch TrafficCom AG holds, with the exception of the subsidiaries listed in note 32 to the consolidated financial statements, directly or indirectly 100 % of the shares in the fully consolidated subsidiaries. The company also has representative offices in São Paulo, Brazil and Beijing, China as well as a branch office in Zagreb, Croatia. Kapsch Components GmbH & Co KG is the sole general partner (*Komplementär*) of Kapsch Components KG.

***) What you don't see here: Our 'OBU-Based Access & Payment' makes it possible for vehicles equipped with an OBU to use toll roads or ferries without the need for tickets or cash.**

OBU-Based Access & Payment – In-vehicle on-board units for tolling represent an ideal method for accessing services and making cash-free payments. For example, they can be used for accessing and paying for parking facilities without a ticket and without cash. Other applications include payments at petrol stations, on ferries or at secured truck parking facilities along highways.

Management Report.

KapschTrafficCom AG on the Consolidated Financial Statements as of 31 March 2011.

1 Economic climate

1.1 General economic situation

Global Economy

Following the financial and economic crisis, world trade has increased again since the start of 2009 and has largely been able to regain pre-crisis levels. Real global trade is expected to increase by 10 % per year in 2011 and 2012 as well. The global economy also improved as a result of very expansive monetary and fiscal policy. The global gross domestic product rose by 4.5 % year-on-year, but slowed over the course of 2010. The International Monetary Fund (IMF) has forecasted growth of 4.4 % for 2011, and expects the global economy to continue growing by 4.5 % in 2012.

From a regional perspective, the economic upturn has been very uneven. In the emerging markets, such as in Asia, recovery was observed earlier than in the industrial countries, such as the euro zone in particular. However, the expansion in Asia is now showing a slight decline, which can be attributed to the end of the significant inventory build-up following the crisis as well as attempts by China and other emerging countries to slow growth in order to prevent their economies from overheating and to counteract rising inflationary pressure. Asian and Latin American economies will continue to grow in 2011 and 2012, lending a noticeable impetus to the global economy.

In the euro region, very large differences exist between the individual countries. High-export and internationally competitive nations such as Germany and the Scandinavian countries exhibited positive growth figures for 2010, while the situation in Southern European countries and in Ireland appeared somewhat worse. The problematic national budgets of these euro countries are leading to an abrupt increase in lending rates and continue to put the European Currency Union to a hard test. In the interests of solidarity, the EU has resolved to provide EUR 110 billion of support to Greece and EUR 85 billion to Ireland. It is also assumed that Portugal will need between EUR 80 billion and EUR 90 billion.

The oil price has risen again significantly in recent months due to the flare up of unrest in North Africa and the Near East and stood at roughly USD 110 per barrel Brent as of mid May. Raw materials prices are likewise increasing due to high demand. The price of gold is also rising, ending the reporting period at approx. USD 1.525 per Troy ounce.

2010 was a turbulent year for the financial markets. The European sovereign debt crisis and the relaxation of monetary policy by the US Federal Reserve dominated the international markets. The euro lost ground against the US dollar in the first half of 2010, but the euro exchange rate recovered again in the second half of the year. Demand for low-risk investments in German and American bonds increased.

The final weeks of the fiscal year 2010/11 were dominated by the terrible catastrophe in Japan. Following the massive destruction caused by the earthquake and tsunami, the threat of a nuclear disaster has largely been the focus of attention.

The consequences for the global economy are still difficult to estimate. Japan is faced with its largest reconstruction effort since World War II. The required investments and restoration of the destroyed infrastructure could mean a short-term boost to the Japanese economy. However, Japan is one of the few major economic powers with a strong focus on exports, and this leads to fears of massive economic losses due to production downtimes as well as the radioactive contamination of agricultural products and ocean water. According to economists, the direct consequences on the global economy should remain within limits.

The overall outlook for the global economy justifies the expectation that investors could remain in a risk-averse posture. The high national debts of the developed countries and rising raw materials prices will have a significant impact on growth.

U.S.A.

The economy in the United States developed positively during 2010. The gross domestic product of the U.S.A. increased by 2.7 % in 2010, and indicators point toward a continuation of this positive trend. GDP growth of 2.2 % is forecasted for the year 2011 and a further increase in growth to 2.9 % for 2012.

Measures to stabilize the economy as well as extensive intervention by the US Federal Reserve (Fed) during the year 2010 are allowing banks to repair their balance sheets. Expansive monetary policy and the buyback of government bonds by the Fed have kept the USD exchange rate low. At the end of 2010, the euro was at 1.34 US dollars, while on 31 March 2011 it was 1.42 US dollars. Since the end of 2010, the Fed has held to a historically low interest rate between 0.0 % and 0.25 %. Experts expect the prime rate will be kept low over the short-term and the relaxed monetary policy will be maintained.

The labor market has recovered slightly in recent months, but is still characterized by delayed development. The unemployment rate remains high and was at 9.0 % in January 2011. In 2011, unemployment is expected to average between 8.8 % and 9.0 %. Developments in the areas of industrial production and exports are positive. Private consumer spending remained expansive despite belt-tightening, which can be attributed in part to the increased prices of food and fuel. Forecasts indicate that the consumption and real estate boom seen prior to the crisis will not return quickly. In particular, the recovery in the real estate market has remained very weak to date. No noticeable improvement is in sight for the construction industry as well.

Emerging Markets

The rapid implementation of government economic stimulus programs has boosted the emerging markets in the last two years. Emerging countries such as China and India have even seen a surplus of capital.

China exhibited GDP growth of 10.5 % in 2010. Although the government took measures to counteract the risk of currency appreciation and rising inflationary pressure, growth amounting to 9 % per year is expected for the years 2011 and 2012.

Japan made the turnaround in 2010 and was able to achieve an increase of 3.6 % in its gross domestic product. As a result of the recent natural catastrophes, serious estimates regarding future developments are almost impossible, and the opinions of experts also diverge extensively in this area.

Europe

Following the global crisis, recovery was also observed in the euro countries during 2010. The gross domestic product in the euro zone rose by 1.7 %, and stable growth of 1.5 % is expected for the years 2011 and 2012. Industry in the euro region was able to exceed production forecasts, and the volume of new orders also developed positively. At the start of the 4th quarter of 2010, the industrial capacity utilization of 77.6 % was far above the low of the previous year (69.6 %) but still fell short of the long-term average of 81.2 %.

In general, an analysis of the current economic situations in the euro countries shows significant differences.

The competitive export countries of the euro region, such as Germany and the neighbors with which it has strong economic relationships, such as Austria and Slovakia, are profiting from the massive growth in the emerging markets (in particular, from China). Germany, for instance, proved to be the economic motor for Europe in 2010 with growth of 3.6 %, and there are good prospects for continued stable growth in 2011 as well. Alongside the positive effects from the rise in global trade, German economic growth also benefits from the low interest rates in the euro zone. As a result, the country has been spared tax hikes and cost-cutting measures, benefiting companies and further promoting consumption.

Other euro countries have encountered great difficulties in controlling their national debts and lag behind in terms of growth. High public spending and austerity packages can be seen in Greece, Ireland, Portugal and Spain, and the economies of these countries are stagnating. Portugal is even in a recession at this time.

In recent months, all the nations of Europe have banded together to overcome this crisis through joint action. To this end, a comprehensive plan was passed for opposing the debt crisis in the euro region, stabilizing the economic and monetary union and improving competitiveness. The new crisis fund for high-debt euro countries was recently raised to EUR 700 billion. As of 2013, this money should be made available as credit financing under favorable conditions to euro countries that are unable to get their national budgets under control on their own despite austerity programs. Almost all EU states are helping to finance this rescue fund through cash contributions and guarantees. Strict criteria, including massive cost-cutting measures, must be met in order to take advantage of this aid.

Although the EU began to assist Greece at the start of 2010 – in total, roughly EUR 110 billion should have been approved – the budget deficit for 2010 was again higher than expected at 10.5 %. Ireland requested assistance at the end of 2010 and received a loan of roughly EUR 85 billion.

The situation in Portugal also intensified in the spring of 2011. The goals for the budget deficit in 2010 were clearly missed at 9.1 %, and political turbulence has ensued since that time. The unemployment rate (11.2 % in January 2011) and inflation (roughly 3.5 % in February 2011) also rose considerably. At the start of April 2011, after receipt of a significantly worse rating and a correspondingly massive interest rate increase for Portuguese government bonds, the country requested assistance from the EU rescue fund. Estimates of the required aid run to EUR 80-90 billion.

In addition to the crisis fund, adherence to the stability package has once again received greater attention throughout the entire euro region. The new debt of a country may not exceed 3 % and the total debt level must be lower than 60 % of the GDP. If these criteria are not met, a deficit process must be followed by which 0.2 % of the GDP must be set aside as a pledge for improving the debt. If the debt situation does not improve, this pledge is treated as a penalty. The euro countries are also called upon to more closely coordinate their tax, pension and social policies in order to avoid differences in competitiveness.

Overall, the economic recovery in the euro region has been astonishingly robust despite the rising price of oil and continued debt problems.

The new EU countries were able to achieve GDP growth of 1.9 % in 2010 (2009: -3.3 %). Indicators point to continued GDP growth of 2.6 % in 2011 while growth as high as 3.6 % is expected for 2012. Poland, the Czech Republic, Slovakia and Hungary have enjoyed good economic growth.

Inflation in the EU (EU-27) increased in 2010 primarily due to rising energy prices and was at 2.8 % in February 2011. To counteract this, the European Central Bank raised the prime rate from 1 % to 1.25 % at the start of April 2011, and another increase is expected over the course of 2011. The 3-month Euribor rate was 1.23 % on 31 March 2011.

The unemployment rate in the EU (EU-27) remained at a high level of 9.5 % in February 2011, only 0.1 % lower than the previous year. This figure also varies widely between the individual countries. The Netherlands, Luxembourg and Austria have the lowest rates, while the highest unemployment rates are reported by Spain, Lithuania and Latvia. Latvia, however, was also able to demonstrate the greatest reduction in unemployment, followed by Estonia and Sweden. The largest increase was reported by Greece and Ireland.

Austria

The Austrian GDP increased by 2.0 % in 2010, which can be primarily attributed to the strong growth in exports (2010: +12.3 %) and rising investments. The GDP growth forecast for 2011 was recently revised upward to 2.5 %, and growth of 2.0 % is expected for 2012 as well.

Positive export developments can be attributed to the strong economic growth in Germany, which was in turn positively influenced by growing demand from Asia. Austria's exporters also profited from increasing exports to Switzerland, Russia and the U.S.A.. According to forecasts, Austrian goods exports are expected to grow by 7 % in 2011 and 6.4 % in 2012.

Consumption by private households remained a stable pillar of the economy in 2010 due to high real growth (tax reform, expansion of social transfers and low inflation). Consumer spending by private households increased by 1.1 % in 2010. Trade also profited from the positive development in consumer spending, making possible an increase of 2.8 % in value creation.

In 2011, it is expected that net real per capita income will decline somewhat due to lower salary conditions in the public sector and a slight increase in the inflation rate. Net real wages should recover somewhat in 2012.

In February 2011, the inflation rate reached its highest level since September of the previous year. The Europe-wide harmonized consumer price index jumped to 3.1 % and exerted a damping effect on economic growth. This increase can be attributed above all to increased prices for fuels, heating oil and food. Approximately 0.4 % of this increase originates from the raising of indirect taxes for budget consolidation. On the other hand, core inflation, which excludes energy and unprocessed foods, remained low.

Overall, the Austrian economy is recovering very well compared with the rest of the world. Following on the economic stimulus programs, the austerity package and tax reforms were implemented relatively quickly and have already begun to show the desired effects, demonstrating that they were correctly dimensioned. It has been possible to keep many employees in their jobs by reducing working hours. In addition, innovative ideas helped Austrian companies successfully ride out the crisis.

However, the continued growth of the Austrian economy is subject to a number of uncertainties and risks. The EU countries are faced with the great challenge of overcoming the debt crisis and ensuring the stability of the monetary union in Europe. The unrest in the Near East and North Africa has led to increased oil prices and negatively impacted inflation. It remains to be seen how the situation in North Africa will develop. Due to the low trade volume with Japan, experts believe the catastrophe there will have only a negligible impact on the Austrian economy, with the exception of delivery bottlenecks. The potential influence of this situation on the global economy and thereby directly on Austria remains difficult to assess from today's perspective.

The development of the unemployment rate remains positive. Unemployment has continued to fall, reaching 6.9 % in March 2011 according to the national calculation and 4.3 % according to the Eurostat definition. This places Austria alongside the Netherlands in the top ranks of the EU-27 countries (average of 9.6 %). According to the most recent forecasts, the unemployment rate should stabilize further, and an annual average of 4.1 % is expected for 2011 and 4.0 % for 2012.

1.2 Development of the market for intelligent transportation systems

To allow for easier comparisons, the Kapsch TrafficCom Group makes use of the internationally prevailing terms for the intelligent transportation systems market. The study "Intelligent Transportation Systems – A global strategic business report" from Global Industry Analysts, September 2010, describes the ITS market as a diversifying market with the following, widely differing application and product segments.

Electronic toll collection (ETC) systems with technologies that enable drivers to pay toll fees without stopping at tollgates.

Traffic management systems (TMS) that monitor traffic, optimize signal timing, and regulate the flow of traffic.

Commercial vehicle operations (CVO) systems which are technologies to enhance motor carrier productivity and safety during interstate transportation.

Public vehicle transportation management systems (PVTMS) which streamline transit, allow transit companies to locate vehicles and provide safety to commuters.

Vehicle information systems (VIS) which include a host of applications that enable commuters to have a safe journey.

According to Global Industry Analysts, the size of the ITS market amounted to USD 11.8 billion in 2010 and is increasing steadily. The largest market segment is traffic management systems, accounting for almost 38 %. The fastest-growing ITS segment is electronic toll collection systems with a compounded average growth rate of 17.1 % between 2000 and 2010; at a worldwide volume of about USD 2.8 billion, it had a share on the ITS market of roughly 24 % in 2010.

Market situation and market forces

Funding of infrastructure projects. Independent of the economic recession, the worldwide increase in road traffic is the most important growth factor for the ITS market. According to analyses by the EU (European Union 2010, "Energy and Transport in Figures"), commercial traffic increased by 2.3 % per year and in total by 33.7 % between 1995 and 2008. Commercial road traffic increased by 2.9 % per year and by 45.7 % in total. While the recent economic crisis triggered a fall in the volume of goods transport, this has already been largely compensated for by the subsequent upswing. Despite political pressure, goods transport could not be shifted significantly from road to rail or ship transport. This growth increases the financing burden for road infrastructure enormously, which in turn fosters greater demand and a high growth potential for ITS applications and the market segment electronic toll collection systems, in particular.

In 2005, the trans-European road network (TEN-V) with a total length of 84,700 km comprised one-fourth of the primary street network but carried 40 % of the total commercial traffic. It is predicted that TEN-V will be expanded by 4,800 km per year up to 2020, of which 3,500 km will consist of existing roads. Major investments will be required in the new member states and along the corridor routes to these countries. The European Union estimates investments of EUR 600 billion will be required by 2020. The long-term forecasts for traffic growth continue to remain high.

In addition to dedicated short-range communication (DSRC) systems (microwave technology) according to the Comité Européen de Normalisation (CEN) 5.8GHz standard, the use of satellite-based systems (satellite technology) has been expanding, depending on the application requirements. Significant growth potential also exists in the area of video-based systems for automatic number plate recognition (ANPR) for tolling and enforcement in urban environments

The high financing requirements for the preservation of road infrastructure are leading to new business models and private concessionaire models in the U.S.A.. Standard & Poor's research estimates an annual demand of USD 92 billion for the preservation of highways and bridges and a further USD 125.6 billion for their improvement. While the standardized tolling technology based on 5.8GHz DSRC microwave is used in Europe, electronic toll collection systems in North America are based on proprietary protocols in the 915 MHz band. It is expected that a new communication protocol standard based on 5.9GHz will gradually replace the existing technology in the U.S.A. over the coming years. In addition to the toll application, the communication standard 5.9GHz WAVE (Wireless Access in the Vehicular Environment) is intended for car-to-car communication and for applications that increase traffic safety as well as additional ITS solutions for traffic information, traffic management and entertainment. These developments will also make it possible for European manufacturers to gain a foothold in the North America, which is also an important growth market for Kapsch TrafficCom.

Reduction of congestion and environmental pollution through road traffic. To reduce traffic congestion and environmental pollution, city charging systems and environmental zones (low emission zones) are deployed in several major cities. Environmental pollution can be viewed as another key driver for the ITS market and also for electronic toll collection systems. In large conurbations and capital cities, in particular, there is a growing need for electronic systems to control and reduce traffic. This topic is politically very sensitive, and the development of this segment within electronic toll collection systems is therefore not as fast as originally expected. Traffic safety devices to monitor compliance with traffic regulations are another field of application in cities. Examples include systems to monitor traffic violations at junctions (e.g. jumping red lights) as well as systems to detect speeding. These applications, which fall under the traffic management system segment, enjoy fast-growing potential on the market both in and between cities, and for municipal authorities they often pave the way for larger and more extensive ITS solutions such as city charging.

The increasing traffic volume can be considered a global trend. Especially in Asia, an increased demand for electronic toll lanes is expected for the replacement and expansion of toll systems previously based on more traditional methods. India has one of the largest road networks in the world, amounting to 3.4 million km in 2004. Only 2 % is made up of highways, but these carry 40 % of the commercial traffic. Between 1992 and 2002, 52,000 km of highways were built in China and an additional 200,000 km are planned for the coming years.

Reduction of road accidents. Traffic management systems are particularly expected to increase the probability of surviving accidents and reduce accident rates.

2 Economic situation of the Group

2.1 Business development

The fiscal year 2010/11 was the most successful year in the history of the Kapsch TrafficCom Group. Historic highs were achieved both for revenue and EBIT. The expansion strategy was consequently continued in order to further extend the market positions in selected countries. The presence of the Kapsch TrafficCom Group in South Africa and North America was strengthened through company acquisitions. In Poland, organic growth was generated by an order for implementing and operating the nationwide truck toll system.

On 1 April 2010, Kapsch Telematic Services GmbH, Vienna, acquired the majority of shares in Payvend F&P A/S, Copenhagen, Denmark. The company was then renamed Kapsch Telematic Services Solutions A/S, Copenhagen, Denmark.

On 8 April 2010, the Kapsch TrafficCom Group purchased the majority of shares in TMT Services and Supplies (Pty) Ltd., Cape Town, South Africa. The Group thereby also obtained a local partner that is a leader in the ITS segment traffic management systems and can contribute its expertise and services to the South African Gauteng project. TMT Services and Supplies (Pty) Ltd. engages in projects for traffic and parking monitoring in several South African cities, including speed monitoring in Johannesburg and in the Mpumalanga province. Over the course of fiscal year 2010/11, the new subsidiary also received a contract to deliver and operate an automatic fare collection system for the bus fleet of the city of Johannesburg that corresponds to roughly EUR 18 million.

The U.S., Canadian and Mexican business of MARK IV IVHS was taken over on 30 November 2010. This brings the largest provider of components for electronic toll systems based on the existing 915 MHz technology in North America into the Kapsch TrafficCom Group. The newly acquired subsidiaries are exclusive suppliers of the E-ZPass® Group, a consortium of 24 toll authorities in 14 US states. Projects are also running with customers in Canada and Mexico. In addition to current customer relationships, this takeover offers the ideal basis for participating in the expected technology migration from 915 MHz to 5.9 GHz WAVE. Initial demo and pilot projects based on the 5.9 GHz technology have already been implemented in the U.S.A. by the Kapsch TrafficCom Group.

Transport Telematic Systems LLC, Abu Dhabi, United Arab Emirates, was founded on 30 March 2011 together with a local partner.

In a move that further highlights the planned growth course, a 4.25 % corporate bond with a volume of EUR 75 million and a tenor of seven years was successfully issued on 3 November 2010.

The ongoing implementation of the project in South Africa and the project acquired in October 2010 for building a nationwide truck tolling system in Poland dominated the past fiscal year.

The contract awarded by the South African National Roads Agency Ltd (SANRAL) in September 2009 for the implementation and operation of an electronic toll collection system for the multi-lane free-flow of traffic in the Gauteng province was in the implementation phase during the reporting period. After transferring the toll collection system as agreed in fiscal year 2011/12, the technical and commercial operation will be handled by the South African subsidiary. In a separate tender process for the delivery of over 1.8 million on-board units, the Kapsch TrafficCom Group was also able to win a large share of the contract amounting to over 1.5 million units.

With the signing of a contract on 2 November 2010 for the implementation and operation of a nationwide electronic truck tolling system in Poland, the Kapsch TrafficCom Group was able to further expand its leading position in the European market. The first construction phase encompasses the existing road network of roughly 1,750 km and the technical as well as commercial operation up to 2018 with an order value of approximately EUR 560 million. The commissioning will take place in fiscal year 2011/12. The Polish contract partner GDDKiA (General Directorate for National Roads and Highways) expects an expansion of the road network to 7,600 km by 2018.

In the Czech Republic, tolls are collected on 1,350 km of highways and expressways. 249 tolls stations and over 541,000 on-board units are currently in operation. The average toll transaction rate was increased from 99.0 % in calendar year 2009 to 99.3 % in calendar year 2010.

In Austria, roughly 2,200 km of highways and expressways are tolled with a fully electronic toll collection system for trucks heavier than 3.5 tons permissible total weight. Since 2004, Kapsch TrafficCom has delivered the entire central and roadside infrastructure for 490 toll stations as well as approximately 1 million on-board units (GO Boxes). The average toll transaction rate in Austria remained at the previous year's high level of 99.88 %.

Thanks to the outstanding system performance, contractually established bonus payments were earned in both the Czech Republic and Austria.

2.2 Earnings situation

The highest revenue since the founding of the Kapsch TrafficCom Group was generated in fiscal year 2010/11. Revenue of EUR 216.0 million in fiscal year 2009/10 was improved by 172.6 million, representing an increase of 79.9 %, to EUR 388.6 million in fiscal year 2010/11. EBIT in the reporting period was EUR 48.9 million, an increase of EUR 24.3 million that almost doubled the EUR 24.5 million recorded in the previous fiscal year (+99.2 %). This led to an improvement in the EBIT margin from 11.4 % in the previous year to 12.6 % in the reporting year.

Revenue in the segment Road Solution Projects (RSP) reached EUR 158.9 million, or 246.7 % above the previous year's value of EUR 45.8 million. The most important factors for this development were the ongoing implementation of the South African Gauteng project, the start of the project obtained in October 2010 for construction of a nationwide electronic truck toll system in Poland and the completion of the traffic management system in the Czech Republic. The segment RSP now represents 40.9 % of total sales (2009/10: 21.2 %).

For the first time after two fiscal years, the segment RSP once again made a positive contribution of EUR 0.1 million to profit (2009/10: EUR -20.9 million). This can be primarily attributed to the projects in South Africa and Poland. Operating results continue to be impaired by the periodic costs allocated to this segment, the continued expenditures for entry into new markets (in particular costs connected with the acquisition of MARK IV IVHS, including the ancillary acquisition costs that are no longer capitalizable), the costs connected with the tender process for construction of a nationwide electronic truck toll system in France and upfront costs for pending tender processes.

The segment Services, System Extensions, Components Sales (SEC) saw an improvement in sales amounting by EUR 61.4 million, increasing from EUR 161.9 million to EUR 223.3 million. This corresponds to a gain of 37.9 %. The primary factors driving this increase were the revenue of TMT Services and Supplies (Pty) Ltd., Cape Town, South Africa, taken over in April, which was reported for the first time in fiscal year 2010/11, the revenue from the U.S., Canadian and Mexican business of MARK IV IVHS, taken over in December, the contribution from the South African Gauteng project and expansions to the nationwide truck toll system in the Czech Republic. Sales of on-board units reached a record volume of 5.2 million delivered units, representing an increase of 46.9 % over the previous year. Sales in the U.S.A., South Africa, Turkey, France and Portugal proved particularly positive. The fiscal year 2010/11 once again saw an improvement of revenue in the segment SEC, which amounted to 57.5 % of total revenue in fiscal year 2010/11 (2009/10: 75.0 %).

The EBIT in the segment SEC was EUR 48.3 million (2009/10: EUR 45.3 million), resulting in an EBIT margin of 21.6 % (2009/10: 28.0 %). The comparably high profit contribution in the previous fiscal year was attributable to the retroactive clarification of the assumption of costs for the transaction billing for the nationwide electronic truck toll system in the Czech Republic which became effective in the fiscal year 2009/10.

Revenue in the segment Others (OTH) fell from EUR 8.3 million in fiscal year 2009/10 to EUR 6.4 million in the past fiscal year. This decline can be attributed largely to the difficult economic environment in this special manufacturing area.

Despite the lower revenue, EBIT reached EUR 0.4 million (2009/10: EUR 0.2 million). The EBIT margin thus increased from 2.3 % to 6.7 % in fiscal year 2010/11.

Revenue by segment		2010/11		2009/10		+/- %	2008/09	
Road Solution Projects (RSP)								
Revenue (% of total revenue)	in million EUR	158.9	(41 %)	45.8	(21 %)	>100 %	56.8	(28 %)
EBIT	in million EUR	0.1		-20.9		<-100 %	-1.7	
Services, System Extensions, Components Sales (SEC)								
Revenue (% of total revenue)	in million EUR	223.3	(57 %)	161.9	(75 %)	38 %	135.6	(68 %)
EBIT	in million EUR	48.3		45.3		7 %	31.7	
Others (OTH)								
Revenue (% of total revenue)	in million EUR	6.4	(2 %)	8.3	(4 %)	-23 %	8.0	(4 %)
EBIT	in million EUR	0.4		0.2		>100 %	-1.0	

At 47 %, the largest share of total revenue was generated in the region of Europe. This increase of EUR 64.9 million can be attributed largely to the projects in Poland and the Czech Republic as well as the growth in component sales in France, Portugal and Turkey. Revenue in the rest of the world increased by EUR 97.0 million (>100 %). The projects in South Africa represented key factors here. Revenue in Austria fell by EUR 4.9 million since no significant expansions to the existing nationwide truck toll system took place during the past fiscal year. The region of America saw a revenue increase of EUR 15.5 million (>100 %). An increase was achieved in the U.S.A. and Canada due to the acquisition of the MARK IV IVHS companies, while lower sales in Chile negatively impacted the growth in this area.

Revenue by region		2010/11		2009/10		+/- %	2008/09
Austria (% of total revenue)	in million EUR	37.5	(10 %)	42.4	(20 %)	-12 %	37.8 (19 %)
Europe (excl. Austria) (% of total revenue)	in million EUR	182.0	(47 %)	117.1	(54 %)	55 %	122.8 (61 %)
Americas (% of total revenue)	in million EUR	27.6	(7 %)	12.1	(5 %)	>100 %	14.0 (7 %)
Rest of the World (% of total revenue)	in million EUR	141.5	(36 %)	44.5	(21 %)	>100 %	25.6 (13 %)

The cost of materials and other production services rose from EUR 98.0 million to EUR 191.3 million in fiscal year 2010/11, which reflects an increase of EUR 93.2 million. Compared with the previous year, the share of costs for materials and other production services in relation to revenue changed from 45.4 % to 49.2 %. This can be attributed primarily to the higher share of external deliveries for the projects in South Africa (Gauteng and Johannesburg), the construction of the nationwide truck toll system in Poland and the expansion projects in the Czech Republic.

Compared with the previous year, staff costs increased by EUR 26.8 million, rising from EUR 59.7 million to EUR 86.5 million in fiscal year 2010/11. At the same time, the average number of employees grew by 648 persons, changing from 973 to 1,621 in the past fiscal year. The integration of the newly acquired companies and the staff requirements connected with the technical and commercial operation projects obtained in South Africa and Poland represent the most important factors here. The staff cost ratio (staff costs in relation to total revenue) was reduced from 27.6 % in the previous year to 22.3 %.

Depreciation and amortization expenses increased by EUR 6.1 million compared with the previous year (2009/10: EUR 7.5 million; 2010/11: EUR 13.6 million), resulting primarily from the company mergers. Other operating expenses rose from EUR 42.3 million to EUR 63.4 million in fiscal year 2010/11, for an increase of EUR 21.1 million. Increased expenses arose primarily in the form of legal and consulting costs, travel costs, office expenditures, maintenance costs and licensing and patent costs. These increases resulted, on one hand, from the integration of the newly acquired companies and, on the other, from the project-related expenses.

In fiscal year 2010/11, financial result amounted to EUR -7.6 million (2009/10: EUR 4.1 million). The lower finance income can be attributed largely to reduced interest effects in long-term receivables and the decline in exchange rate gains. Finance costs rose considerably as a result of the exchange rate losses, which mainly related to not-realized exchange rate losses. Furthermore the interest expenses relating to the corporate bond burdened the financial result.

The profit before income taxes was EUR 41.3 million, which is EUR 2.6 million lower than the previous year's value. In the previous year, this item was largely influenced by a required reclassification of the shares held in Q-Free ASA, Norway, from associated companies to other investments. This balance sheet change led to an accounting gain of EUR 14.0 million that was recognized in profit and loss, thereby massively increasing the profit before taxes in fiscal year 2009/10.

Despite the negative factors affecting the financial and tax results, profit for the period amounted to EUR 28.4 million (2009/10: EUR 36.5 million).

2.3 Assets and liabilities

The balance sheet total of the Kapsch TrafficCom Group was EUR 450.1 million on 31 March 2011 (31 March 2010: EUR 295.1 million). Equity was EUR 191.5 million, resulting in an equity ratio of 42.5 % (31 March 2010: 57.0 %).

Non-current assets rose from EUR 101.4 million to EUR 159.7 million as at 31 March 2011. The largest changes were observed in the areas of intangible assets and property, plant and equipment, and resulted almost exclusively from the acquisition of companies. The other financial assets and investments declined due to the negative exchange rate development of the shares in the Norwegian Q-Free ASA.

Current assets increased from EUR 193.7 million to EUR 290.4 million as at 31 March 2011. The increases in trade receivables as well as in inventories resulted predominantly from the large projects in South Africa and Poland as well as the newly acquired companies.

Non-current liabilities increased to EUR 117.4 million (31 March 2010: EUR 37.6 million). The largest change took place in non-current financial liabilities due to the successful issuing of the company bond with a volume of EUR 75.0 million, a tenor of seven years and an interest rate of 4.25 %.

Current liabilities amounted to EUR 141.2 million on the balance sheet date (31 March 2010: EUR 89.2 million). Trade payables and other current liabilities and deferred income exhibited an increase that originated primarily from the large projects in South Africa and Poland as well as the newly acquired companies. Current financial liabilities increased by EUR 13.8 million compared with the end of the previous fiscal year.

2.4 Financial position

Net cash flow from operating activities declined to EUR -11.7 million in fiscal year 2010/11 (2009/10: EUR 46.5 million). The changes in net current assets resulting from the increase in trade receivables and inventories as well as the payment of income taxes could not be compensated by the increased operating result.

Net cash flow from investing activities amounted to EUR -60.9 million in the past fiscal year (2009/10: EUR -15.3 million) and was influenced by the payments for purchasing Kapsch Telematic Services Solutions A/S, Copenhagen, Denmark, TMT Services and Supplies (Pty) Ltd., Cape Town, South Africa, and MARK IV IVHS.

Net cash flow from financing activities was EUR 65.5 million (2009/10: EUR -48.4 million) and was positively affected primarily by the issuing of the corporate bond.

As a result of outflows from operating and investing activities, cash and cash equivalents decreased to EUR 42.0 million on the balance sheet date (31 March 2010: EUR 47.7 million).

2.5 Non-financial performance indicators

Reliability and accuracy of installed ETC systems. The toll transaction rate is a figure for assessing the accuracy and reliability of a tolling system. It shows the number of successful transactions in relation to all potential toll collection transactions of vehicles equipped with a functioning on-board unit. A high toll transaction rate translates to maximum toll revenue.

In 2010, the average toll transaction rate of the existing truck tolling system in Austria amounted to approximately 99.9 %, placing it at an ever higher level as in 2009. During the same period, the average performance rate of the nationwide electronic tolling system in the Czech Republic was approximately 99.31 %, up 0.3 % from 99.0 % in 2009. The calculation of the average performance rate is based on methods agreed upon with the respective customer, meaning that comparisons between the average performance rates achieved in different projects are only possible on a limited basis.

Staff. The average number of employees in the Kapsch TrafficCom Group in the fiscal year 2010/11 was 1,621, a 67 % increase against an average of 973 in the fiscal year 2009/10. As of 31 March 2011, the Group had a workforce of 2,167 (2,054 salaried and 113 non-salaried employees).

The Group places great importance on the continued training and education of its employees. This involves not only promoting professional education and training, but also providing seminars and training sessions for developing one's own personality and teamwork skills. The group companies make contributions to an external pension fund on behalf of their employees which are based on the length of employment and company profits. In addition, the Group maintains a profit participation program that offers the staff an opportunity to share in the profits of the Kapsch TrafficCom Group.

Kapsch TrafficCom AG is certified pursuant to OHSAS 18001 for occupational health and safety and has implemented the necessary measures in its internal processes.

Environment. Valid certifications are held for quality management pursuant to ISO 9001 and environmental management pursuant to ISO 14001. In the future the Group will strive to fulfill its responsibilities toward environmental protection even more extensively, particularly with regard to the efficient and responsible use of natural resources.

Corporate social responsibility

Kapsch TrafficCom has taken up the call for long-term and responsible business activities and is dedicated to sustainability on an economic, ecologic and social level. Sustainability reports will be published regularly in the future to show the progress on a group level and the continuing establishment of predefined objectives.

Living up to its socio-political responsibility, the entire Kapsch Group – organized by Kapsch AG – supports a number of contemporary art and cultural institutions and projects, and also initiates its own projects in this field. Selected training initiatives and extensive social measures complement this approach, which the company considers to be an obligation both in and outside the Group. The employees of the Kapsch TrafficCom Group hold this long-term commitment to social responsibility in high regard.

Music. A key element of this commitment covers sponsoring activities related to the Vienna Concert Hall (*Wiener Konzerthaus*). This cultural institution has an excellent reputation far beyond Austria's borders. The Kapsch Group has been the main sponsor of the Vienna Concert Hall since 1992. The Modern Vienna festival – one of the world's best known festivals of contemporary music – has been supported by Kapsch since its launch in 1989.

Visual arts. Promoting less known artists is of particular concern to the Kapsch Group. In particular, young domestic and international artists are assisted by sponsorship campaigns. One example is the photo calendar that Kapsch Group has supported since 1994. The calendar is presented annually in late fall in a private exhibition.

Educational institutions. As a company that is driven by technology and innovation, Kapsch TrafficCom is constantly interested in establishing contacts as early as possible with the best engineering talents. Since 2005, the Kapsch Group has supported *Universitäre Gründerservice Wien GmbH* which aims to support and accompany young entrepreneurs in the implementation of ideas relating to key business concepts.

Social activities. Kapsch TrafficCom takes pride in supporting selected social projects at home and abroad. One example of the numerous projects is ICEP – the Institute for Cooperation in Development Projects, whose activities help to improve the circumstances of people in developing countries. With the specific advancement of migration and integration, Kapsch TrafficCom contributes to social justice, the positive development of society and safety over the long-term.

2.6 Risk management

As a technology company, Kapsch TrafficCom Group operates in an ever-changing environment. Risks are therefore part of its day-to-day business. For the company, risk means the possibility of deviating from company objectives, meaning that the definition of risk encompasses both positive (opportunities) as well as negative (risks) deviations from planned objectives.

Risk management system

Risk management has been positioned as a separate function within the finance department of Kapsch TrafficCom AG. Under the responsibility of a central risk manager, the risk management system comprises institutionalized processes for collecting and analyzing all relevant opportunities and risks pertaining to the Group's projects and provides the basis for the timely planning and implementation of control measures. In the 2010/11 fiscal year risk management was developed into a company-wide opportunity and risk management system. In addition to project risks, Enterprise Risk Management also analyses strategic, technological, organizational, financial, legal and IT risks, reporting to management on a regular basis. The primary objective in this context is not to avoid risks but to deal with risks in a controlled and deliberate manner and to recognize and realize opportunities as they arise over time in order to make a valuable contribution to the management of the company.

The material risks faced by the Group and the respective risk management measures are briefly explained below:

Industry-specific risks

Volatility of new orders. A major portion of the revenues of the Kapsch TrafficCom Group are generated in the segment Road Solution Projects (RSP). In this segment, the Group regularly participates in tenders for the implementation and operation of large electronic toll collection systems. On the one hand, there is a risk that tenders in which the Group participates or plans to participate could be delayed or withdrawn, for instance as a result of political changes, appeals or legal actions by unsuccessful bidders. On the other hand, a risk exists that Kapsch TrafficCom Group may not win its bids for new projects due to technological, financial, formal or other reasons. Continuing revenues from maintenance agreements and from technical operations also depend on the successful participation in tenders for systems.

In the past, the revenues of the Kapsch TrafficCom Group have been heavily influenced by the realization of implementation projects in the given fiscal year. Significantly higher revenues were recorded, in particular, in 2003 (implementation of a nationwide electronic truck tolling system in Austria) and 2006/07 (implementation of a nationwide electronic truck tolling system in the Czech Republic). In the 2010/11 fiscal year sizeable revenue was generated from implementing an electronic toll system in South Africa as part of the Gauteng Project, and from starting to implement a nationwide electronic truck tolling system in Poland.

The strategy of the Kapsch TrafficCom Group is aimed at reducing the volatility of revenues from single large projects through increased geographic diversification and increased diversification of the product portfolio as well as sustained growth in the share of maintenance and operations of systems.

Risks of project execution. In connection with the installation of systems, Kapsch TrafficCom Group is usually contractually obligated to provide performance guarantees. Since electronic toll collection systems and other ITS solutions are frequently sophisticated and technologically complex systems that must be implemented within a short period, system and product defects

or missed deadlines may occur due to the limited time available. The failure to meet guaranteed performance levels or deadlines usually results in penalties and/or compensation, sometimes also compensation for lost toll revenues. Significant deadline overruns also frequently trigger contractual clauses, which enable clients to terminate contracts prematurely. A significant delay in a project, failure to achieve guaranteed performance levels or failure to implement a project would also reduce the chances of success in future tenders for systems. There is also the risk that Kapsch TrafficCom Group cannot execute projects in line within the set cost budgets.

Kapsch TrafficCom Group employs risk management methods and risk management procedures in order to guard against risks associated with projects.

Long-term contracts with public authorities. In many cases, the system contracts are awarded by public agencies. Framework agreements and service contracts in connection with tolling projects may include terms and conditions that are not negotiable in a tender process and that may be disadvantageous to the Kapsch TrafficCom Group. Moreover, in the case of long-term contracts, the margins earned can also differ from the original calculations due to changes in costs. Liabilities arising from contracts concluded by the Group may include liabilities regarding customers' loss of profit, product liabilities and other liabilities. While the Kapsch TrafficCom Group aims to include appropriate limitations to its liability in contracts, it is still impossible to guarantee that all contracts contain sufficient limitations to the Group's liability or that these limitations can be enforced under applicable law.

Strategic risks

Innovation leadership. The leading market position of the Kapsch TrafficCom Group is, to a large extent, based on its ability to develop state-of-the-art, efficient and reliable systems, components and products. In order to maintain its technological leadership, the Kapsch TrafficCom Group invests a considerable portion of its revenues in research and development activities. However, if the Group does not succeed in developing new systems, components and products, this can be detrimental to its competitive position. Since its innovation leadership is based largely on technology, internal know-how and intellectual property, the global increase in product piracy and reverse engineering may have negative effects on the Group. In addition, any failures in protecting these technologies may have a negative impact on the Group's competitive position. Moreover, it is possible that systems, components, products or services could infringe on the intellectual property rights of third parties.

The Kapsch TrafficCom Group places great importance on the protection of technologies and the company's internal know-how, e.g. through patents and non-disclosure agreements with other parties. In order to avoid legal action and court proceedings, the Kapsch TrafficCom Group constantly monitors potential intellectual property rights infringements.

Acquisition and integration of companies as a part of the Group's growth. One of the strategic objectives of the Kapsch TrafficCom Group is to grow internationally both by organic means and through selected acquisitions and joint ventures. In the implementation of this strategy, the Group has acquired and integrated companies around the world. However, a number of challenges remain in connection with this growth strategy in order to realize the desired synergies and objectives.

Country risk. The strong expansion of business activities in Eastern Europe and non-European countries has exposed the Kapsch TrafficCom Group to a heightened political risk. Significant and unforeseeable political changes can exert a major influence on the ability to implement or operate ITS projects in these countries and also affect the availability and accessibility of funds. There may also be interference with the property rights of the Kapsch TrafficCom Group or problems with business practices and activities.

Financial risks

Foreign exchange risk. The Group maintains branches, offices and subsidiaries in several countries outside the euro zone. A considerable portion of revenues and costs are denominated in the currencies of the respective foreign companies rather than in euros. Although the Group aims to hedge the net currency position of the individual contracts as necessary, currency fluctuations may result in exchange rate losses that may influence the consolidated financial statements (transaction risk). In addition, risks arise from the conversion of the separate financial statements of international companies into the Group currency, the euro (translation risk). Fluctuations in exchange rates may also result in a change in the competitive position of the Kapsch TrafficCom Group.

Interest rate risk. Within the framework of project financing, the Group regularly agrees to variable interest rates that are tied to market interest rates (Euribor, Pribor etc.). This exposes the Kapsch TrafficCom Group to interest rate risks. The Kapsch TrafficCom Group utilizes appropriate financial instruments to hedge against interest rate risks when these risks are significant.

Liquidity risk. Sufficient financial resources must be available to ensure that the Kapsch TrafficCom Group can meet its payment liabilities at any time. The availability of medium and long-term financing is required to carry out large-scale projects (such as implementing a nationwide toll collection system under delayed payment terms from the client) and for acquiring other businesses. Additionally, implementing large-scale projects often requires the provision of significant bank guarantees to secure bid obligations (bid bonds) or to secure possible warranty claims (performance bonds).

In financing agreements the Kapsch TrafficCom Group is subject to the customary restrictions in terms of its business policy, e.g. when drawing additional loans, using assets as collateral or providing guarantees for third parties. The availability of financing and bank guarantees depends on market conditions as well as the net assets and financial position of the Kapsch TrafficCom Group and the results of operations. A lack of liquid assets (even if the Group is otherwise solvent), of financing or of bank guarantees can have an extremely adverse impact on the net assets and financial position of the Kapsch TrafficCom Group and the results of operations. The issuing of a seven-year, EUR 75 million corporate bond in November 2010 helped the Kapsch TrafficCom Group to again improve its liquidity.

Credit risk. The Kapsch TrafficCom Group is exposed to the risk of non-payment by customers. The credit ratings of new and existing customers are checked on a regular basis. Many of the key customers of the Kapsch TrafficCom Group are public authorities, especially in connection with implementing and/or operating nationwide or regional toll collection systems. There is also a risk that the counterparties (including financial institutions assumed to have good credit ratings) of both original and derivative financial instruments cannot meet their payment obligations when due. A payment default or the recognition of impairment charges to receivables can be extremely detrimental for the net assets and financial position of the Kapsch TrafficCom Group and the results of operations.

Personnel risks

The success of the Kapsch TrafficCom Group depends heavily on key personnel with many years of experience in the industry. Moreover, the Group's ability to recruit qualified staff, integrate them into the company and retain them over the long-term is crucial in its current growth phase. The loss of key personnel and difficulties in the recruitment of personnel may adversely affect the success of the Group.

Kapsch TrafficCom Group has implemented a number of measures to counteract personnel risks, such as incentive schemes, training opportunities, etc.

Legal risks

A variety of regulations and legal requirements must be observed in connection with participating in public tenders, establishing infrastructure for ITS solutions (such as tolling stations) and operating toll collection systems. Working out applicable legal regulations and adhering to applicable legal regulations and requirements can result in considerable administrative and technical expense. The failure to meet regulations or official requirements can lead to severe penalties and also reduce the possibility of (successfully) taking part in tenders or continuing with the given business activity.

In connection with the acquisition of shares in Q-Free ASA, Norway, in January 2009, Norwegian authorities have initiated investigation proceedings against Kapsch TrafficCom AG and Kapsch Aktiengesellschaft. Kapsch TrafficCom AG disagrees with the basis for these allegations and believes that any adverse impact on the financial position of Kapsch TrafficCom AG will not be material. Kapsch TrafficCom AG intends to vigorously defend against the allegations.

IT risks

As a technology group, the Kapsch TrafficCom Group is exposed to typical IT risks relating to security, confidentiality and the availability of data. For this reason, Kapsch TrafficCom AG has implemented an IT risk management system designed according to the corporate risk and IT security application method (CRISAM) and has been certified pursuant to ISO 27001 (information security management). The Kapsch TrafficCom Group is also certified according to ISO 20000 "IT service management" (similar to ITIL) for the operation of toll systems.

Summary assessment of the Group's risk situation

From a current perspective, no risks have been identified that could endanger the continued operations of the Kapsch TrafficCom Group. Increasing geographic expansion, the diversification of the product portfolio and an increased share of recurring revenues (further growth in the segment Services, System Extensions, Components Sales) are planned to further reduce the concentration of risks in the future.

2.7 Internal Control System (ICS)

The Corporate Law Amendment Act (URÄG 2008) adopted the 8th EU Directive into Austrian law. Under this legislation, companies with a capital market orientation are henceforth obliged to include in their group management reports not only an outline of their risk management systems but also of the main features of their ICS with regard to the financial reporting process.

Kapsch TrafficCom AG started to analyze and document its existing internal processes for financial reporting on an ongoing basis in the fiscal year 2009/10. The results obtained so far were presented at the quarterly meetings of the audit committee for assessment and discussion.

The International Financial Reporting Standards (IFRS) Group Accounting Manual represents the cornerstone for financial accounting and reporting throughout the whole Kapsch Group. The manual is published and regularly updated by the Kapsch Group and contains the essential financial and reporting procedures based on IFRS. Group-wide guidelines and work instructions represent another important pillar of the internal control system.

The central elements of the ICS process include regular compliance checks according to the principle of dual control, the segregation of duties and defined actions for monitoring the effectiveness and efficiency of operating activities, the reliability of financial reporting and the compliance with relevant legal regulations. The ICS guidelines of Kapsch TrafficCom AG follow the basic structure of the internationally recognized standards for internal control systems (COSO – Internal Control and Enterprise Risk Managing Frameworks of the Committee of Sponsoring Organizations of the Treadway Commission).

The accounting for all group transactions is handled by a variety of software solutions. In a number of countries, the accounting has been outsourced to locally-based tax accountants due to the size of the subsidiaries. Companies submit reporting packages to the

head office on a quarterly basis which contain all accounting data pertaining to the statement of comprehensive income, balance sheet and cash flow statement. The data is then transferred into the central consolidation system (Hyperion financial management). This financial information is verified on group-wide basis by the central Kapsch TrafficCom controlling department and subsequently forms the basis for the quarterly reports issued by the Kapsch TrafficCom Group in accordance with IFRS.

The supervisory board is kept informed of business developments by the managing board during regular meetings by way of consolidated presentations consisting of segment reporting, earnings development analyses containing comparisons of current figures with figures from the budget and the previous period as well as select financial figures, forecasts, group financial statements and developments in the number of employees and order inflow.

In keeping with the decentralized structure of the Kapsch TrafficCom Group, local management is responsible for the implementation and monitoring of the internal control system. The managing directors of the individual subsidiaries are responsible for establishing and designing internal control and risk management that meets the needs of the given company in view of accounting procedures, as well as for ensuring compliance with the group-wide rules and guidelines in this respect. The head of finance for the Kapsch TrafficCom Group, the central controlling department and the internal audit department subsequently verify compliance with these audit procedures by local management, and the results are regularly reported to the audit committee.

2.8 Research and development

The Kapsch TrafficCom Group has a network of research and development centers in Vienna and Klagenfurt (Austria), Jönköping (Sweden), Bologna (Italy), Buenos Aires (Argentina), Toronto (Canada), Carlsbad (California, U.S.A.) and Capetown (South Africa). As of 31 March 2011, the Kapsch TrafficCom Group employed approximately 350 (31 March 2010: approximately 230) research and development engineers in its research and development activities, including internal R&D project management, quality assurance/ testing, production engineering, documentation, international device certifications, standardization activities as well as support for all IPR/patent issues.

Research and development activities are a high priority for the Kapsch TrafficCom Group in pursuing its strategic goals. The knowledge of entirely new technologies and their possible applications based on national and international standards forms the foundation for successful business developments and enables the entry into new markets. The current focus is on countries such as the U.S.A., South Africa, South America and meanwhile also Russia.

Major development efforts of the last fiscal year consisted of specifying and developing a new, generic and scalable roadside platform that integrates all major sensor systems into a single, common software platform. The main goals of this work include eliminating overlapping development work by different R&D centers and offering the international sales force the basis for a more flexible, adaptable and customer-specific approach in system sales. This new sensor platform is currently in its end-testing phase and will be put into operation for the first time as part of the project in South Africa. The main initiatives in the component business area lay in developing new and lower-cost on-board unit generations for CEN/DSRC microwave and GPS/GNSS satellite tolling as well as new WLAN-based 5.9 GHz technologies to support the business development approach in the U.S.A., which is still ongoing. These technologies are currently in the standardization process and will be used in road safety systems as well as tolling systems in the U.S.A. and in Europe.

Successful research and development is the foundation for the sustained improvement of existing products and systems as well as the continuous reduction of production, installation, operating and maintenance costs, all of which are essential for maintaining a technological and competitive advantage.

Research costs are recognized as expenses. The same applies to development costs, unless the IFRS criteria for classification as intangible assets are met. Since the income statement is structured by expense type, the research and development costs are reported under various income statement items, in particular under the cost of materials and other production services, staff costs and other operating expenses. In the fiscal year 2010/11, the Kapsch TrafficCom Group invested approximately EUR 37.3 million (2009/10: EUR 24.9 million) in research and development, representing approximately 10 % of revenue.

2.9 Disclosures pursuant to Section 267 UGB in connection with Section 243a UGB

1. The registered share capital of Kapsch TrafficCom AG amounts to EUR 12.2 million and is fully paid in. It is divided into 12.2 million no-par value ordinary bearer shares.
2. There are no restrictions relating to the exercise of voting rights or the transfer of shares.
3. As of 31 March 2011, approximately 31.6% of the shares of Kapsch TrafficCom AG were in free float. As of 31 March 2011, KAPSCH-Group Beteiligungs GmbH held approximately 68.4 % of the shares. KAPSCH-Group Beteiligungs GmbH is a wholly-owned subsidiary of DATAX HandelsgmbH, whose shares are equally held by Traditio-Privatstiftung, ALUK-Privatstiftung and Children of Elisabeth-Privatstiftung, each a private foundation under the Austrian Private Foundation Act (*Privatstiftungsgesetz*). As of 31 March 2011, no other shareholder held more than 5 % of the voting rights in Kapsch TrafficCom AG.
4. None of the shares convey special control rights.
5. There are no restrictions regarding the execution of the voting rights by employees with a stake in the company.
6. There are no special provisions on the appointment and removal of members of the managing board and the supervisory board.
7. The company has authorized capital (*genehmigtes Kapital*) of EUR 0.8 million. The subscription rights of the shareholders have been excluded with respect to this authorized capital. The managing board may, with the approval of the supervisory board, make use of the existing authorized capital within five years of the date on which the relevant authorization adopted at the general meeting of 15 May 2007 was recorded in the commercial register.
8. No agreements have been entered into which become effective when a takeover bid for shares in the company is launched.
9. There are no agreements between Kapsch TrafficCom AG and members of the managing board or the supervisory board or employees which become effective when a takeover bid for shares in the company is launched.

2.10 Outlook and targets

With a view to the fiscal year 2011/12, the company's outlook on market developments over the long-term is optimistic even in a changed economic environment. Essential events will be the implementation and the start of operations of the systems in South Africa and Poland. In the U.S., the company expects the decision of the pending tender for the award of the E-Z Pass® Group contracts. In addition, the coming fiscal year will be driven by the preparation for the tenders expected in Hungary, Slovenia and Denmark as well as the by integration of MARK IV IVHS.

2.11 Material events after the balance sheet date

Financing activities

In April 2011, a revolving line of credit expiring on 31 December 2011 was contracted by the Group with a maximum amount of EUR 40 million (thereof EUR 20 million drawn at the date of this report) in connection with the tolling project in Poland.

Company foundation

On 1 April 2011, Kapsch Telematic Services FLLC, Minsk, Belarus was founded.

Notes to the consolidated financial statements.

General information.

Kapsch TrafficCom Group is an international supplier of superior intelligent transportation systems (ITS).

The business activities of the Kapsch TrafficCom Group are subdivided into the following three segments:

- Road Solution Projects
- Services, System Extensions, Components Sales
- Others

The segment Road Solution Projects relates to the installation of ITS solutions.

The segment Services, System Extensions, Components Sales relates to the sale of services (maintenance and operation) and components in the area of ITS solutions.

The segment Others relates to non-core business activities conducted by Kapsch Components GmbH & Co KG. In this segment, Kapsch TrafficCom Group offers engineering solutions, electronic manufacturing and logistics services to affiliated entities and third parties.

Group structure.

DATAX HandelsgmbH, Vienna, is the ultimate parent of Kapsch Group. Until June 2007 KAPSCH-Group Beteiligungs GmbH, Vienna, a wholly-owned subsidiary of DATAX HandelsgmbH, had been the sole shareholder of the parent company Kapsch TrafficCom AG. Under an initial public offering in June 2007 and as a result of further changes in share ownership in the fiscal year ending 31 March 2009, KAPSCH-Group Beteiligungs GmbH reduced its share to 68.42 %.

Consolidated group.

The parent company, Kapsch TrafficCom AG, is a joint stock corporation incorporated and domiciled in Vienna, Austria. The address of its registered office is 1120 Vienna, Am Europlatz 2. Since 26 June 2007 the shares of the parent company have been listed in the Prime Market segment of the Vienna Stock Exchange.

The following subsidiaries are part of the consolidated group:

- Kapsch TrafficCom AG, Vienna
- Kapsch TrafficCom Construction & Realization spol. s r.o., Prague, Czech Republic
- Kapsch TrafficCom Ltd., Manchester, United Kingdom
- Kapsch Components GmbH & Co KG, Vienna
- Kapsch Components GmbH, Vienna
- ArtiBrain Software Entwicklungsgesellschaft mbH, Vienna
- Kapsch-Busi S.p.A., Bologna, Italy

*) Companies newly established in the fiscal year 2010/11

**) Acquisition in the fiscal year 2010/11

The consolidated financial statements of Kapsch TrafficCom AG as of 31 March 2011 prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU and with section 245a (1) of the Austrian Commercial Code (UGB) have been translated into English. In case of different interpretations the German original is valid.

Accounting and measurement.

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below:

1 Basis of preparation

Pursuant to §245a UGB, the consolidated financial statements as of 31 March 2011 have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU). Presentation currency is the euro (EUR). The consolidated financial statements as of 31 March 2011 are prepared under the historical cost convention, with the exception of available-for-sale securities and derivative financial instruments, which are measured at fair value at the balance sheet date. The preparation of the consolidated financial statements in conformity with IFRS requires the use of estimates and assumptions which influence the amount and presentation of assets and liabilities reported at the balance sheet date, and income and expenses recorded during the reporting period. Although these estimates are made by the management board to the best of its knowledge and are based on current transactions, actual figures may differ from these estimates. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are material to the consolidated financial statements are disclosed in Note 21.

a) New and amended standards and interpretations that have been adopted by the EU and applied for the first time in the fiscal year:

IFRS 3 (revised) "Business combinations" and consequential amendments to IAS 27 "Consolidated and separate financial statements" are effective prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 July 2009. The revised standard was applied to business combinations occurring on or after 1 April 2010. The major change concerns the accounting for acquisitions of less than 100 percent of the shares in a company. The option to recognize the goodwill from an acquisition under the full goodwill method, i.e. including the amount of the share attributable to the non-controlling shareholders, was introduced. In addition, acquisitions and/or partial sales of shares without loss of control are to be reported directly in equity as transactions between shareholders. The full incidental acquisition costs are to be reported as expenses. Except for the incidental acquisition costs in the fiscal year ending 31 March 2011 for the acquisition of Mark IV IVHS (see Note 28), amounting to EUR 2.8 million and from now on reported as expenses, the first time adoption of the revised standards did not have any material impact on the Group's assets, financial position and earnings.

All other new regulations (standards, amendments to standards, interpretations) mandatory for the first time in the fiscal year had no material impact on the consolidated financial statements.

b) Standards, interpretations and amendments to published standards that have not yet been applied:

IFRS 9 "Financial instruments" was issued in November 2009. This standard is the first step in the process to replace IAS 39, "Financial instruments: recognition and measurement". IFRS 9 introduces new requirements for classification and measuring financial assets and is likely to affect the Group's accounting for its financial assets. The standard is not applicable until 1 January 2013 but is available for early adoption. However, the standard has not yet been endorsed by the EU. At present, the date of endorsement is uncertain. The Group is yet to assess IFRS 9's full impact. However, initial indications are that it may affect the Group's accounting for its available-for-sale debt investments, as IFRS 9 only permits the recognition of fair value gains and losses in other comprehensive income if they relate to equity investments that are not held for trading. Fair value gains and losses on available-for-sale debt investments, for example, will therefore have to be recognized directly in profit or loss.

A number of amendments to standards and interpretations, as well as a new interpretation have already been published, but have either not yet been adopted by the European Union or have been adopted by the European Union, but are not yet mandatory. The impact of these regulations on the consolidated financial statements of the Company is not material or cannot be adequately assessed and, therefore, is not presented in detail.

The consolidated financial statements were prepared by the management board on the undersigned date and released for publication. The entity financial statements of the parent company, which have been included in the consolidated financial statements after adoption of the applicable accounting standards, have not yet been approved by the supervisory board. The supervisory board and, in the event of presentation to the general meeting of shareholders, the general meeting of shareholders could amend the entity financial statements in a way that might affect the presentation of the consolidated financial statements.

2 Consolidation

a) Subsidiaries

Subsidiaries are all entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

On an acquisition-by-acquisition basis, the Group recognizes any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognized directly in the profit for the period.

Goodwill is tested annually for impairment, as well as when there are indications of impairment. If an impairment requirement is identified, goodwill will be reduced immediately by the amount of the impairment. Impairment losses on goodwill are not reversed. Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

Inter-company transactions, balances and unrealized gains on transactions between Group companies are eliminated. Unrealized losses are also eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

b) Transactions and non-controlling interests

The Group treats transactions with non-controlling interests as transactions with equity owners of the Group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income are reclassified to profit or loss where appropriate.

c) Associates

Associates are accounted for by the equity method. Associates are companies in which the Group has significant influence, but not control, generally accompanied by a shareholding of between 20 % and 50 % of the voting rights. The Group's share of its associates' post-acquisition profits or losses is recognized in the income statement and its share of post-reserve movements is recognized in reserves. Goodwill on acquisition of associates is included in the investment in associates, net of any impairment losses.

The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the associate.

Significant unrealized gains from transactions between the Group and associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

3 Currency translation

a) Translation of financial statements in foreign currencies

In accordance with IAS 21, financial statements of foreign subsidiaries which are included in the consolidated financial statements are translated as follows:

Income statements of foreign subsidiaries are translated into the Group's functional currency at average exchange rates of the reporting periods, balance sheets at the prevailing mean exchange rate at the balance sheet date. Exchange differences arising from the translation of the net investment in foreign entities are recognized in shareholders' equity under "currency translation differences". When a foreign operation is sold, such exchange differences are recognized in the income statement as part of the gain or loss on disposal of shares in foreign entities.

Goodwill and fair value write-ups arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

b) Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the income statement. Non-cash items in the balance sheet are translated at historical exchange rates, non-cash items which were recognized at their lower net realizable value are translated at the exchange rate prevailing at the time of measurement.

4 Financial instruments and risk management

Material financial instruments presented in the balance sheet include “cash and cash equivalents”, “securities”, “financial assets and investments”, “receivables and payables” and “loans”. For the accounting and measurement policies applicable for these items refer to the explanation of the respective balance sheet item.

The Group’s activities expose it to a variety of financial risks, particularly foreign exchange risk, interest rate risk and credit risk. The Group’s risk management focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group’s financial performance. The Group does not employ hedge accounting as envisaged by IAS 39.

a) Foreign exchange risk

Foreign exchange risk is the risk arising from fluctuations in the value of financial instruments, other balance sheet items (e. g. receivables and payables) and/or cash flows due to exchange rate fluctuations.

In particular, foreign exchange risk exists where business transactions are made or could arise in the normal course of business in a currency other than the company’s functional currency (referred to as foreign currency below).

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the Czech Crown. Customer orders are invoiced mainly in the respective local currencies of the group companies. Only in case the Group expects to be exposed to significant foreign exchange risk, major orders denominated in foreign currencies are hedged by forward foreign exchange contracts.

If the exchange rate of the stated currencies as of 31 March 2011 (31 March 2010) had changed by the percentage rate (“volatility”) stated below, the profits before tax, provided all other variables had remained unchanged, would have been higher or lower, respectively, by the following amounts.

Currency	Volatility	Hypothetical impact on result in TEUR	
		2010/11	2009/10
AUD	10 %	152	–
CAD	10 %	468	–
CZK	10 %	1,850	2,991
PLN	10 %	581	–
SEK	10 %	441	672 ^{*)}
USD	10 %	435	149
ZAR	10 %	846	160

*) prior year figure adjusted

b) Interest rate risk

Interest rate risk is the risk arising from fluctuations in the value of financial instruments, other balance sheet items (e. g. receivables and payables) and/or cash flows due to fluctuations in the market interest rates.

For fixed-interest balance sheet items, the risk comprises the present value risk. In case the market rate for the financial instrument fluctuates, either a profit or a loss may result if the financial instrument is sold prior to maturity.

For variable-interest balance sheet items, the risk relates to the cash flow. With variable-interest financial instruments, adjustments in the interest rates may result from changes in the market rates. Such changes would entail changes in interest payments. As a result of the corporate bond with a fixed interest rate issued in November 2010, variable-interest (both short-term and long-term) financial liabilities account only for a minor part of financial interest balance sheet items. If the market interest rate had been 100 basis points higher (lower) as of 31 March 2011, this, as in the prior year, would not have had a material impact on the result of the Group. At the balance sheet date, no financial derivatives were used to hedge the interest rate risk.

c) Credit risk

As part of the Group's risk management policy, the Group only deals with recognized creditworthy third parties, and implements policies to ensure that the Group sells to customers with appropriate credit histories. In addition, the Group monitors its receivables balances on an ongoing basis in order to limit its exposure to bad debts. Certain of the Group's policies limit the amount of its credit exposure to any financial institution, depending on the rating of the institution. With the exception of the tolling projects in the Czech Republic, South Africa and Poland (see Note 18), there is no concentration of credit risk relating to trade receivables, since the Group generally has a large number of customers worldwide. Based on the Group's experiences, the default risk for trade receivables can be considered low.

d) Liquidity risk

Prudent liquidity risk management shall involve securing the availability of sufficient cash and cash equivalents as well as the possibility of funding through the availability of adequate credit lines. Providing for adequate liquidity is statutory for every company under the Austrian commercial code. The Group provides for its liquidity through available credit lines.

e) Capital management

The objectives of the Group with respect to capital management, on the one hand, include securing its going concern in order to be able to provide the equity holders with dividends and the other stakeholders with appropriate services, and on the other hand, maintaining an optimal capital structure.

The Group monitors its capital based on net gearing, calculated from the ratio of net debt (net assets) to equity. Net debt (net assets) includes non-current and current financial liabilities less cash and cash equivalents, bank balances and current securities.

in TEUR	2010/11	2009/10
Non-current financial liabilities	74,112	10,060
Current financial liabilities	23,083	9,237
Total financial liabilities	97,195	19,297
Cash on hand and at banks	42,001	47,743
Current securities	8,037	6,898
Net assets (+)/debt (-)	-47,157	35,344
Equity	191,513	168,249
Net gearing	25 %	n.a.

The change over the prior year is primarily due to the corporate bond issued in November 2010 (see Note 21).

5 Research and development costs

Research expenditure is recognized as an expense as incurred. Costs incurred on development projects (relating to the design and testing of new or improved products) are recognized as intangible assets when the following criteria are fulfilled:

- a) it is technically feasible to complete the intangible asset so that it will be available for use or sale;
- b) management intends to complete the intangible asset and use or sell it;
- c) there is an ability to use or sell the intangible asset;
- d) it can be demonstrated how the intangible asset will generate probable future economic benefits;
- e) adequate technical, financial and other resources to complete the development and to use or sell the intangible asset are available; and
- f) the expenditure attributable to the intangible asset during its development can be reliably measured.

Other development expenditures that do not meet these criteria are recognized as an expense. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period. Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use on a straight-line basis over its useful life, not exceeding three years.

Development assets are tested for impairment annually in accordance with IAS 36.

6 Intangible assets

Acquisition costs of computer software, industrial property and similar rights are capitalized and amortized systematically on a straight-line basis over their useful lives ranging from 4 to 30 years. Acquired customer contracts (tolling contracts) are amortized from 2 to 10 years. The carrying amount of each intangible asset is tested for impairment when a triggering event occurs.

7 Other financial assets

a) Securities

Financial assets recognized under non-current assets and other short-term financial assets include only available-for-sale securities. Available-for-sale securities are carried at fair value. Unrealized gains and losses arising from the changes in fair value are recognized in equity under a separate item.

The difference arising on the sale of financial assets between the proceeds and the carrying amounts is taken through profit or loss. Additionally, the amount recognized in equity is taken through profit or loss. All acquisitions and sales are recognized at the respective date of the transaction, transaction costs are included in acquisition costs.

At each balance sheet date the Group, assesses whether there is objective evidence of impairment of each significant individual financial asset or group of financial assets. If such evidence exists, the Group accounts for that impairment and the amounts previously recognized in equity are removed from equity and recognized in profit or loss. The amount of the impairment is measured as the difference between the carrying amount and the present value of the estimated future cash flows.

If in subsequent periods the fair value of the impaired financial instruments increases and that increase can be directly related to an event occurring after the impairment was recognized in profit or loss, the Group reverses the impairment loss. In case of debt instruments the reversal is recognized in profit or loss, in case of equity instruments it is recognized directly in equity.

b) Other investments

Other available-for-sale investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are carried at cost less impairment.

At each balance sheet date, the Group assesses whether there is objective evidence that a financial asset or a group of financial assets is impaired.

c) Derivative financial instruments at fair value through profit or loss

Derivative financial instruments are accounted for as stand-alone derivatives and are measured at fair value through profit or loss. Changes in the fair value of these derivative financial instruments are recognized immediately in the income statement under "other gains/losses net".

8 Property, plant and equipment

Property, plant and equipment is carried at cost less accumulated depreciation. Depreciation is charged on a straight-line basis over the expected useful lives of the assets.

The useful lives range between 3 to 26 years for plants and buildings on leasehold land, 4 to 20 years for technical equipment and machinery and 3 to 10 years for other equipment, factory and office equipment.

Impairment is charged for the difference between the recoverable amount and the carrying amount of an asset. The recoverable amount represents the higher of fair value less cost to sell or value in use of an asset. For purposes of impairment testing, the assets are grouped down to the lowest level where separate cash flows are identifiable.

The difference between the proceeds from the sale of property, plant and equipment and their carrying amount is taken through profit or loss and recognized in the operating result.

9 Leases

a) Finance leases – accounting for leasing agreements from the lessee's perspective

Leasing agreements by which the Group as lessee assumes substantially all risks and rewards associated with the use of an asset are accounted for as finance leases.

The respective assets are capitalized under non-current assets at the lower of the net present value of minimum lease payments or the fair value of the leased asset and are depreciated over their expected useful lives or shorter lease term, if applicable. The difference between the minimum lease payments and the accrued net present value is recognized as deferred interest expense. The interest component is spread over the term of the lease using the effective interest rate method.

b) Operating leases – accounting for leasing agreements from the lessee's perspective

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

10 Government grants

Government grants with regard to assets relate to purchased non-current assets (technical equipment) and are deferred and taken through profit or loss over the estimated useful life of the respective asset.

Other government grants received as compensation for expenses or losses already incurred are immediately taken through profit or loss.

11 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the weighted average cost method. The cost of finished goods and work in progress comprises design costs, raw materials, direct labor, other direct costs and related production overheads (based on normal operating capacity). It excludes borrowing costs. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

12 Construction contracts

The Group accounts for construction contracts in accordance with IAS 11. When the outcome of a construction contract can be estimated reliably and it is probable that the contract will be profitable, contract revenue is recognized over the period of the contract. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense immediately. The construction progress is represented by the ratio of costs incurred by the balance sheet date and the estimated total costs for the respective project.

The carrying amount results from comparing the total of accumulated costs incurred by the balance sheet date plus the profit calculated according to the percentage of completion method (prorated) or loss (in full) on the respective construction contract to the invoiced amounts. The balance is recognized either under current assets (amounts due from customers for contract work) or under current liabilities (amounts due to customers for contract work).

13 Trade receivables

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less allowance for bad debt. An allowance for bad debt is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of the allowance is recognized in the income statement.

14 Cash and cash equivalents

For the presentation of the cash flow statement, cash and cash equivalents include cash in hand, deposits held at call and other cash at banks. Overdrafts are recognized in the balance sheet under current financial liabilities.

15 Other provisions

Provisions are set up when the Group has a present legal or constructive obligation to third parties as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made.

Provisions for warranties, liabilities for construction flaws, serial and systems problems mainly serve as coverage for obligations for free repairs and replacement deliveries, in accordance with the general sales and delivery conditions or due to individual agreements and are measured using rates based on past experience regarding direct labor and material costs incurred, overheads, replacement deliveries or rebates. A provision is recognized for the best estimate of the costs of defects to be rectified under the warranty for products sold before the balance sheet date.

16 Employee benefits

The Group provides various post-employment benefits to employees and other long-term benefits either based on individual agreements or in accordance with local labor law provisions.

For the calculation of liabilities arising from pension obligations and termination benefits in accordance with IAS 19, the projected unit credit method is used. According to this method, post-employment costs for employee benefits are recognized in the income statement in such a way that scheduled costs are spread over the employees' years of service on the basis of an expert opinion by a qualified actuary, who completely remeasures the schemes annually. The obligation for pension payments and termination benefits is calculated as the present value of future benefits using an interest rate based on the average yield on industrial bonds of the same maturity. Actuarial gains and losses exceeding the corridor (= up to 10 % of benefit obligation or 10 % of plan assets, if any, at beginning of period) are charged to the income statement over the average remaining service of the active staff.

Contributions paid by the Group under a defined contribution pension scheme are charged to the income statement under staff costs in the period in which they occur.

For the calculation of liabilities arising from obligations for anniversary bonuses in accordance with IAS 19, the projected unit credit method is used. Anniversary bonuses are special lump-sum payments stipulated in the Collective Agreement and dependent on compensation and years of service. Eligibility is determined by a certain number of service years. The calculation of liabilities arising from obligations for anniversary bonuses is performed in the same way as to the calculation for liabilities arising from termination benefits, however without taking the corridor method into consideration.

17 Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss, it is not accounted for. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Temporary differences mainly arise in connection with depreciation (amortization) periods of non-current assets, provisions for pension benefits, other post-employment benefits, differences regarding the measurement of receivables and payables and tax loss carry-forwards.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not be reversed in the foreseeable future.

In March 2005, the major Austrian group companies of the entire Kapsch Group formed a tax group according to Sec. 9 of the Austrian Corporate Income Tax Act. The group taxation regime applies for the respective entities effective from the tax year 2005 (i.e. fiscal year 2004/05). Tax group leader is KAPSCH-Group Beteiligungs GmbH, the parent of this group. Principally, this entity is the only entity which has tax receivables or tax liabilities. Tax group members, such as the Austrian companies in the Kapsch TrafficCom Group, merely reflect receivables or liabilities with the tax group leader and not with tax authorities. Any tax loss incurred by a member of the tax group prior to the effective date of the tax group is not available for utilization by the leader of the tax group. Such tax losses are only available for utilization against future taxable income by the entity in which they initially arose.

Accordingly, deferred taxes arising in entities which are members of the tax group and where the right of set off of taxable income and losses exists are shown as “deferred tax assets – due from group leader” or “deferred tax liabilities – due to group leader”. Those deferred tax effects arising in periods prior to the formation of the tax group or representing tax losses from periods prior to the formation of the tax group are shown as deferred tax assets or deferred tax liabilities.

18 Liabilities

Liabilities are recognized at amortized cost using the effective interest rate method. Liabilities denominated in foreign currencies are measured at the current rate at the balance sheet date. Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost using the effective interest rate method. Borrowing costs are charged to the income statement in the period in which they are incurred.

19 Contingent liabilities

Contingent liabilities occur for two reasons. For one, they comprise possible obligations that arise from past events and whose existence will be confirmed by uncertain future events that are at least partly beyond an entity's control. For another, they comprise present obligations that fail to meet general or special recognition standards (i.e. the amount of settlement of an obligation cannot be measured with sufficient reliability or an outflow of resources to settle the obligations is not deemed probable).

The Group discloses contingent liabilities unless the possibility of an outflow of resources embodying economic benefits is remote and a liability does not have to be recognized pursuant to IFRS.

20 Revenue recognition

In accordance with IAS 18, revenue is recognized in the income statement upon delivery when the significant risks and rewards of ownership of the goods are transferred to the customer, net of discounts and eliminated sales within the Group. Sales of services are recognized in the accounting period in which the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided.

Revenue for construction contracts is recognized in accordance with the “percentage-of-completion method”, provided the conditions under IAS 11 are met.

Other revenue is recognized by the Group as follows:

- Revenue from expenses recharged is recognized on the basis of the accumulated amounts in accordance with the respective agreements.
- Interest income is recognized on a time-proportion basis using the effective interest method.

21 Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results.

In particular estimates and assumptions regarding revenue recognition have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next fiscal year.

The Group uses the percentage-of-completion method in accounting for its construction contracts. Use of the percentage-of-completion method requires the Group to estimate the expected profit mark-up for the construction contract. Sensitivity analyses on assumptions made by management indicate that no material effect is to be expected, if the actual final results should deviate by 10 % from estimates. The analysis of assumptions made in the past as well as of actual profit mark-ups showed that the estimates had been reliable up to now.

Further areas where assumptions and estimates are significant to the consolidated financial statements include capitalized goodwill, inventories, deferred taxes and provisions for warranties. Sensitivity analyses of the assumptions made by management in connection with capitalized goodwill, inventories, deferred taxes and provisions for warranties indicate that no material effect will arise if the actual final outcomes were to differ by 10 % from the estimates made. Sensitivities for the acquired goodwill (break-even interest rate) are detailed in Note 13.

22 Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is responsible for allocating resources to the operating segments and assessing their performance. The management board has been identified as the chief operating decision-maker.

Notes to the consolidated financial statements.

Figures in the disclosure notes are presented in Euro thousands (TEUR) unless otherwise stated.

1 Segment Information

Operating segments

The Group reports three main operating segments (see section "General Information"):

- Road Solution Projects (RSP)
- Services, System Extensions, Components Sales (SEC)
- Others (OTH)

The segment results for the fiscal year ended 31 March 2011 are as follows (in EUR million):

	Road Solution Projects	Services, System Extensions, Components Sales	Others	Consolidated Group
Revenue	158.9	223.3	6.4	388.6
Operating result	0.1	48.3	0.4	48.9

The segment results for the fiscal year ended 31 March 2010 are as follows (in EUR million):

	Road Solution Projects	Services, System Extensions, Components Sales	Others	Consolidated Group
Revenue	45.8	161.9	8.3	216.0
Operating result	-20.9	45.3	0.2	24.5

The segment assets and liabilities as of 31 March 2011 and capital expenditure, depreciation and amortization and other non-cash-effective expenses for the period then ended are as follows (in EUR million):

	Road Solution Projects	Services, System Extensions, Components Sales	Others	Consolidated Group
Assets	138.6	215.4	3.4	357.5
Investments in associates	0.0	0.0	0.0	0.0
Unallocated assets				92.6
Total assets	138.6	215.4	3.4	450.1
Liabilities	56.2	87.9	1.5	145.5
Unallocated liabilities				113.1
Total liabilities	56.2	87.9	1.5	258.6
Capital expenditure	0.0	7.0	0.0	7.0
Depreciation and amortization	1.6	11.8	0.2	13.6
Other non-cash-effective expenses	0.0	0.9	0.0	0.9

The segment assets and liabilities as of 31 March 2010 and capital expenditure, depreciation and amortization and other non-cash-effective expenses for the period then ended are as follows (in EUR million):

	Road Solution Projects	Services, System Extensions, Components Sales	Others	Consolidated Group
Assets	66.2	121.1	4.6	191.9
Investments in associates	0.0	0.0	0.0	0.0
Unallocated assets				103.2
Total assets	66.2	121.1	4.6	295.1
Liabilities	33.2	69.8	1.3	104.3
Unallocated liabilities				22.6
Total liabilities	33.2	69.8	1.3	126.8
Capital expenditure	0.8	4.0	0.0	4.8
Depreciation and amortization	1.8	5.3	0.4	7.5
Other non-cash-effective expenses	0.0	0.4	0.0	0.4

The breakdown of revenue by customer who contributed more than 10 % to the revenue for the year is as follows. In addition, the respective segments are shown (in EUR million):

	2010/11			2009/10		
	Revenue	Road Solution Projects	Services, System Extensions, Components Sales	Revenue	Road Solution Projects	Services, System Extensions, Components Sales
Customer 1	99.7	X	X	78.6	X	X
Customer 2	98.7	X	X	9.0	X	X
Customer 3	39.7	X		0.0		

Information by region

Revenue is segmented by the location of the customer and balance sheet figures by the location of the Company.

The figures for the fiscal year ended 31 March 2011 are as follows (in EUR million):

	Austria	Europe (excl. Austria)	Americas	Rest of World	Consolidated Group
Revenue	37.5	182.0	27.6	141.5	388.6
Non-current non-financial assets	13.2	46.9	41.4	6.6	108.1

The figures for the fiscal year ended 31 March 2010 are as follows (in EUR million):

	Austria	Europe (excl. Austria)	Americas	Rest of World	Consolidated Group
Revenue	42.4	117.1	12.1	44.5	216.0
Non-current non-financial assets	15.8	13.9	14.5	0.1	44.4

2 Other operating income

	2010/11	2009/10
Income from the sale of non-current assets	72	2
Income from costs recharged	62	43
Sundry operating income	7,431	10,895
	7,564	10,939

Sundry operating income mainly relates to research funding awards received and to the assumption of costs of transactions billed for the nationwide electronic truck tolling system in the Czech Republic.

3 Change in finished and unfinished goods and work in progress

	2010/11	2009/10
Change in unfinished goods and work in progress	-235	3,217
Change in finished goods	7,697	1,918
	7,462	5,135

4 Costs of materials and other production services

	2010/11	2009/10
Cost of materials	82,315	32,066
Cost of purchased services	108,940	65,975
	191,256	98,041

5 Staff costs

	2010/11	2009/10
Wages	2,345	2,197
Salaries and other remunerations	67,026	43,317
Expenses for social security and payroll-related taxes and contributions	15,181	12,484
Expenses for termination benefits (see Note 23)	573	569
Expenses for pensions (see Note 23)	556	502
Contributions to pension funds and other external funds (see Note 23)	264	164
Fringe benefits	517	468
	86,462	59,702

As of 31 March 2011, the number of staff amounted to 2,167 persons (31 March 2010: 1,023 persons) and averaged 1,621 persons in the fiscal year 2010/11 (2009/10: 973).

6 Amortization of intangible assets and depreciation of property, plant and equipment

	2010/11	2009/10
Depreciation of property, plant and equipment	6,595	5,145
Amortization of intangible assets	7,020	2,340
	13,615	7,485

Low-value assets are capitalized as property, plant and equipment or intangible assets and written off in the year of acquisition.

7 Other operating expenses

	2010/11	2009/10
Rental expenses	8,470	7,094
Legal and consulting fees	13,096	7,252
Allowance and write-off of receivables	584	371
Marketing and advertising expenses	6,086	8,671
Travel expenses	7,243	4,353
Maintenance	3,752	1,538
Communication and IT expenses	5,641	3,407
Training costs	1,652	855
Losses on disposal of non-current assets	282	35
Insurance costs	2,181	720
License and patent expenses	3,155	1,167
Office expenses	3,563	886
Taxes and charges	280	245
Adjustment provision for warranties	-489	504
Commissions and other fees	2,488	994
Transport costs	954	842
Automobile expenses	2,586	1,583
Other	1,869	1,815
	63,391	42,333

The item "Other" includes membership dues and bank charges as well as other administrative and selling expenses.

8 Financial result

	2010/11	2009/10
Interest and similar income:		
Interest income	1,034	454
Income from securities	139	223
Income from interest accretion of long-term receivables	437	1,825
Gains from the disposal of financial assets	18	7
Currency translation differences	2,869	6,752
	4,498	9,260
Interest and similar expenses:		
Interest expense	-3,417	-2,642
Expense from interest accretion of long-term payables	-362	-701
Losses on disposals and write-down of financial assets, investments and securities	0	-79
Expenses from other investments	-469	-22
Expenses from currency hedging	-1,340	-1,219
Currency translation differences	-6,530	-471
	-12,117	-5,135
	-7,619	4,125

The consolidated financial statements of Kapsch TrafficCom AG as of 31 March 2011 prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU and with section 245a (1) of the Austrian Commercial Code (UGB) have been translated into English. In case of different interpretations the German original is valid.

9 Income taxes

	2010/11	2009/10
Current taxes	-10,329	-7,915
Deferred taxes (see Note 22)	-2,496	516
Total	-12,826	-7,399
Thereof income/expense from group taxation	-102	112

The reasons for the difference between the arithmetic tax income/expense based on the Austrian corporate income tax rate of 25 % and the recognized tax income/expense are as follows:

	2010/11	2009/10
Profit before income taxes	41,261	43,910
Arithmetic tax expense based on a tax rate of 25 % (2009/10: 25 %)	-10,315	-10,977
Unrecognized deferred tax assets on current losses	-1,421	-183
Derecognition of deferred tax assets recognized on prior year losses	-1,179	0
Different foreign tax rates	383	109
Tax allowances claimed and other permanent tax differences	-929	162
Income and expenses not subject to tax and other differences	636	3,490
Recognized tax expense	-12,826	-7,399

For further information on deferred tax assets and liabilities see Note 22.

10 Other comprehensive income

2010/11	Before taxes	Tax expense/ income	After taxes
Fair value gains/losses on available-for-sale financial assets:			
Unrealized gains/losses in the current period	-2,277	-259	-2,536
Currency translation differences	4,294	0	4,294
Fair value changes recognized in equity	2,017	-259	1,758

2009/10	Before taxes	Tax expense/ income	After taxes
Fair value gains/losses on available-for-sale financial assets:			
Unrealized gains/losses in the current period	2,776	-758	2,018
Gains/losses recognized in the income statement	69	0	69
Currency translation differences	3,799	0	3,799
Fair value changes recognized in equity	6,644	-758	5,886

11 Additional disclosures on financial instruments by category

	2010/11	2009/10
Available-for-sale financial assets:		
Other non-current financial assets and investments	34,490	38,937
Other current financial assets	8,037	6,898
	42,527	45,835
Loans and receivables:		
Other non-current assets	9,018	8,481
Trade receivables	79,329	83,999
Cash and cash equivalents	42,001	47,743
	130,348	140,223
Financial liabilities at (amortized) cost:		
Non-current financial liabilities	74,112	10,060
Other non-current liabilities	10,423	9,353
Trade payables	72,531	41,332
Current financial liabilities	23,083	9,237
	180,149	69,982

Financial instruments are recognized in the income statement with the following net results:

	2010/11	2009/10
Available-for-sale financial assets	-312	128
Loans and receivables	-2,189	8,559
Financial liabilities at (amortized) cost	-5,118	-4,562
	-7,619	4,125

12 Property, plant and equipment

	Land and buildings	Technical equipment and machinery	Construction in progress	Other equipment, factory and office equipment	Total
Carrying amount as of 31 March 2009	4,416	6,745	25	5,701	16,887

Accumulated amortization	-8,553	-14,933	0	-23,485
Carrying amount as of 31 March 2011	122	40,224	48,341	88,687

The addition in goodwill results from the acquisitions of TMT Services and Supplies (Pty) Ltd., Cape Town, South Africa, the U.S.-American, Canadian and Mexican operations of Mark IV IVHS (see Note 28) and from subsequent earn-out payments for the acquisition of Kapsch TrafficCom Argentina S.A., Buenos Aires, Argentina. The remaining goodwill results from the acquisition of Kapsch TrafficCom AB, Jönköping, Sweden, the “Mobility Solutions” business of TechnoCom Corporation, Encino, U.S.A., the acquisition of Kapsch-Busi, S.p.A, Bologna, Italy, and the acquisition of Kapsch TrafficCom, Argentina S.A., Buenos Aires, Argentina.

For the purpose of impairment testing, goodwill was allocated to two cash-generating units (CGU) (“**Road Solution Projects**” and “**Services, System Extensions, Components Sales**”). The following assumptions were made:

	Road Solution Projects	Services, System Extensions, Components Sales
The carrying amount of goodwill allocated to the CGU	TEUR 38,084	TEUR 10,256
The carrying amount of intangible assets with indefinite useful lives allocated to the CGU	TEUR 0	TEUR 0
Determination of recoverable amount of CGU	Value in use	Value in use

Cash-generating unit “Road Solution Projects”:

Key assumptions for determining expected cash flows of the CGU:

- The Management has based its determination on the assumption that after the successful implementation of tolling systems, in particular in Austria, the Czech Republic, Switzerland, Australia, South America, South Africa and Poland, demand for tolling systems will increase, in particular as a result of tight public budgets.
- The planning for the segment Road Solution Projects is based on projects in the Czech Republic, South Africa, U.S.A., Australia and Poland as well as on the fact that tenders in several countries are already in progress.
- 4 years of detailed planning
- 15.4 % (2009/10: 14.3 %) discount rate before tax
- Due to the growth potential of this business unit, the cash flows beyond the four-year period of detailed planning were accounted for at a continuous growth rate of 4.0 % (2009/10: 4.0 %) in the determination of value.

Effects of changes in key assumptions on the recoverable amount:

- Management has based its determination on the assumption that realistically possible changes in key assumptions on which the recoverable amount is based will not result in the carrying amount of goodwill of the CGU exceeding the recoverable amount of the CGU. The break-even interest rate is 20.1 %.

Cash-generating unit “Services, System Extensions, Components Sales”:

Key assumptions for determining expected cash flows of the CGU:

- The Management has based its determination on the assumption that the Group will remain the preferred supplier for operation, maintenance and supply of components for tolling projects installed in previous years.
- The planning for the segment Services, System Extensions, Components Sales is based on ongoing maintenance for existing tolling systems in Austria, Switzerland, the Czech Republic, Australia, South America, South Africa and Poland, on the commercial operation in the Czech Republic, South Africa and Poland as well as on component orders for customers worldwide, particularly in the U.S.A., Canada, Mexico, Australia, Turkey, Spain, Portugal, Denmark, France, Greece, Chile, Thailand, South Africa and Poland.
- 4 years of detailed planning
- 15.1 % (2009/10: 13.7 %) discount rate before tax
- Due to the growth potential of this business unit, the cash flows beyond the four-year period of detailed planning were accounted for at a continuous growth rate of 4.0 % (2009/10: 4.0 %) in the determination of value.

Effects of changes in key assumptions on the recoverable amount:

- The Management has based its determination on the assumption that realistically possible changes in key assumptions on which the recoverable amount is based will not result in the carrying amount of goodwill of the CGU exceeding the recoverable amount of the CGU. The break-even interest rate is 45.6 %.

Development costs relate to expenses which in accordance with IAS 38 are capitalized and amortized over 3 years once the assets are available for commercial use. Additional research and development costs of the Group in the fiscal year 2010/11 amounted to EUR 37,3 million (2009/10: EUR 24.9 million). In the fiscal year 2010/11, EUR 14,9 million thereof (2009/10: EUR 7.4 million thereof) was project-specific development costs and charged to the customer. The remaining amount of EUR 22,4 million (2009/10: EUR 17.5 million) was recognized as an expense.

14 Shares in associates

Shares in associates developed as follows:

	2010/11	2009/10
Carrying amount as of 31 March of prior year	0	12,302
Share in result	0	1,205
Addition	0	104
Currency translation differences	0	760
Effects from disproportional capital increases	0	69
Fair value adjustment on the date of losing significant influence according to IAS 28.18	0	14,038
Reclassification to "other non-current financial assets and investments"	0	-28,479
Carrying amount as of 31 March of fiscal year	0	0

In January 2009, the Group acquired an investment in the amount of 20.47 % in Q-Free ASA, Norway. In the third quarter of the fiscal year ending 31 March 2010, the share of Kapsch TrafficCom AG was diluted to below 20 % as a result of a capital increase at Q-Free ASA. This made a reclassification to the item "other non-current financial assets and investments" necessary (see Note 15). The accounting profit arising at the time of the dilution was recognized in income in accordance with IAS 28.18.

15 Current and non-current financial assets

	2010/11	2009/10
Other non-current financial assets and investments	34,490	38,937
Other current financial assets	8,037	6,898
	42,527	45,835

Other non-current financial assets and investments	Available-for-sale securities	Available-for-sale investments	Other	Total
Carrying amount as of 31 March 2009	3,437	347	0	3,784
Currency translation differences	0	0	417	417
Addition from reclassification	0	28,479	0	28,479

Additions	69	0	505	574
Change in fair value	-103	-3,313	0	-3,416
Write-down	0	-343	-157	-500
Disposals	0	0	-1,625	-1,625
Carrying amount as of 31 March 2011	3,483	24,916	6,092	34,490

Other current financial assets	Available-for-sale securities	Other	Total
Carrying amount as of 31 March 2009	3,946	0	3,946
Additions	0	0	0
Disposals	0	0	0
Change in fair value	2,952	0	2,952
Carrying amount as of 31 March 2010	6,898	0	6,898
Additions	0	0	0
Disposals	0	0	0
Change in fair value	1,139	0	1,139
Carrying amount as of 31 March 2011	8,037	0	8,037

As of 31 March 2011, available-for-sale securities relate to government and bank bonds as well as shares in investment funds. As of 31 March 2011, the other investments classified as available-for-sale mainly relate to a 18.40 % investment in Q-Free ASA, Norway (see Note 14). These financial assets are measured at fair value based on quoted market prices (level 1 pursuant to IFRS 7). Unrealized gains and losses are recognized in other comprehensive income of the period (see Note 10).

In the fiscal year 2010/11, other non-current financial assets mainly relate to a fixed-term investment in the amount of TEUR 5,597 (2009/10: TEUR 6,697). The fixed-term investment is pledged as a collateral for guarantees issued by the Group.

16 Other non-current assets

	2010/11	2009/10
Truck tolling system Czech Republic	9,017	8,480
Other	1	1
	9,018	8,481

Other non-current assets relate to trade receivables (long-term) that are due from the Czech Ministry of Transport for the installation of the Czech truck tolling system. As in the prior year, they fall due between 1 and 5 years as of the balance sheet date.

Long-term receivables were discounted on the basis of cash flows using an interest rate of 4.14 % to 5.00 % (for the part which was funded by external loans) and an interest rate for alternative investments of 2.89 % (for that part which was funded by internal cash flows of the Group). Thus, the fair values approximate the carrying amounts.

Gross cash flows of other non-current assets are as follows:

	2010/11	2009/10
Up to 2 years	7,705	7,338
Between 2 and 3 years	1,753	1,554
More than 3 years	1	0
	9,459	8,892

Long-term receivables in the amount of TEUR 0 (2009/10: TEUR 8,480) were pledged as collateral to banks (see Note 21).

17 Inventories

	2010/11	2009/10
Purchased parts and merchandise, at acquisition cost	13,520	9,079
Unfinished goods and work in progress, at production cost	9,062	9,297
Finished goods, at production cost	26,903	19,206
	49,485	37,582

Individual inventory items were written down, where necessary, to their net realizable values. The write-downs of inventories amount to TEUR 9,793 (2009/10: TEUR 7,029).

18 Trade receivables and other current assets

	2010/11	2009/10
Trade receivables, less allowance for bad debt	79,329	83,999
Gross amount due from customers for contract work	84,225	7,301
Receivables from tax authorities (other than income tax)	10,030	2,779
Other receivables and prepaid expenses	17,301	7,370
	190,885	101,448

Allowances for bad debt developed as follows:

	2010/11	2009/10
Balance as of 31 March of prior year	587	278
Addition resulting from company acquisition	207	0
Addition	421	425
Utilization	-27	0
Disposal	-108	-115
Balance as of 31 March of fiscal year	1,079	587

Maturity structure of trade receivables and other current assets:

	2010/11	2009/10
Not yet due	176,618	81,753
Overdue, but not impaired:		
Less than 60 days	12,059	16,061
More than 60 days	3,288	4,221
	191,965	102,035

The fair values in the next fiscal year approximate the carrying amounts. Except for the tolling project in the Czech Republic, there is no concentration of credit risk with respect to trade receivables, as the Group generally has a large number of customers worldwide. Trade receivables (current) relating to the installation of the Czech truck tolling system in the amount of TEUR 4,361 (2009/10: TEUR 17,712) and to the operation and maintenance of the system in the amount of TEUR 27,907 (2009/10: TEUR 23,117) are due from Ředitelství silnic a dálnic ČR (RSD), a company of the Czech Republic.

Trade receivables in an amount of TEUR 7,353 (2009/10: TEUR 17,712) were pledged as collateral to banks (see Note 21).

Amounts due from customers for contract work are as follows:

	2010/11	2009/10
Construction costs incurred plus recognized gains	136,707	7,301
Less amounts billed and prepayments received	-52,481	0
	84,225	7,301

As of 31 March 2011, amounts due from customers for contract work relate to the tolling project in South Africa in the amount of TEUR 43,273 and to the tolling project in Poland in the amount of TEUR 39,692.

19 Cash and cash equivalents

	2010/11	2009/10
Cash on hand	65	20
Deposits held with banks	41,935	47,723
	42,001	47,743

The carrying amounts of this item also represent cash and cash equivalents at the end of the reporting period as presented in the cash flow statement.

20 Share capital

	2010/11	2009/10
Carrying amount as of 31 March of fiscal year	12,200	12,200

The registered share capital of the Company amounts to EUR 12,200,000. The share capital is fully paid in. The total number of shares issued is 12,200,000. The shares are ordinary bearer shares and have no par value.

21 Current and non-current financial liabilities

	2010/11	2009/10
Current		
Loans for acquisitions	10,000	0
Other current loans	13,083	9,237
	23,083	9,237
Non-current		
Loans for acquisitions	0	10,000
Corporate bond	73,796	0
Other	316	60
	74,112	10,060
Total	97,195	19,297

In November 2010, Kapsch TrafficCom AG issued a corporate bond with a volume of EUR 75 million, a maturity of 7 years and an interest rate of 4.25 %. Considering offsetting capital expenses according to IFRS, the addition of non-current financial liabilities was TEUR 73,732 and led to an effective interest rate of 4.54%.

The other non-current financial liabilities mature in 1 to 5 years.

The fair values and the gross cash flows of non-current financial liabilities are as follows:

	2010/11	2009/10
Carrying amount	97,195	19,297
Fair value	92,227	18,736
Gross cash flows:		
Up to 1 year	23,083	9,237
Between 1 and 3 years	9,754	10,543
Between 3 and 5 years	6,273	0
More than 5 years	78,442	0
	117,551	19,779

Interest rates on current and non-current financial liabilities are as follows:

	2010/11	2009/10
Total financial liabilities:		
Carrying fixed interest rates	79,579	1,937
Carrying variable interest rates	17,616	17,360
	97,195	19,297
Average interest rates:		
Short-term loans	1.65–2.25 %	1.67–3.25 %
Loans for acquisitions	3.53 %	3.19 %
Corporate bond	4.54 %	–
Other	2.50 %	2.50 %

Other non-current assets amounting to TEUR 0 (2009/10: TEUR 8,480), trade receivables (current) amounting to TEUR 7,353 (2009/10: TEUR 17,712) as well as 9.9 million shares in Q-Free ASA were pledged as collateral for guarantees issued by banks and for loans granted. A bill of exchange amounting to TEUR 1,425 (2009/10: TEUR 1,425) was issued for an export promotion credit.

22 Deferred tax assets/liabilities

	2010/11	2009/10
Deferred tax assets – due from tax group leader	1,880	1,302
Deferred tax assets – non-tax group	6,230	8,348
	8,110	9,650
Deferred tax liabilities – due to tax group leader	1,794	1,812
Deferred tax liabilities – non-tax group	14,082	1,471
	15,876	3,284
Balance	-7,766	6,366

Deferred taxes due to tax loss carry-forwards and other temporary differences deductible in the future are recognized only to the extent of their potential realization. In these consolidated financial statements, tax loss carry-forwards in the amount of TEUR 14,087 (2009/10: TEUR 2,080) have not been recognized, because it was uncertain whether there would be sufficient taxable profits available against which to offset them. All other deferred tax assets have been recognized in the respective group companies as future deductible items. Deferred tax assets are normally realized after more than 12 months.

Deferred tax assets/liabilities are attributable to the following positions:

	31 March 2009	Addition resulting from company acquisition	Taken through profit or loss	Taken through equity	Currency translation differences	31 March 2010
Deferred tax assets						
Tax loss carry-forwards	2,804	0	584	0	25	3,413
Provisions disallowed for tax purposes	1,140	0	695	0	33	1,868
Depreciation disallowed for tax purposes	40	0	-42	0	2	0
Other	4,258	0	-19	-20	150	4,369
	8,242	0	1,218	-20	210	9,650
Deferred tax liabilities						
Special depreciation/amortization of non-current assets	0	0	0	0	0	0
Other	1,871	0	702	738	-27	3,283
	1,871	0	702	738	-27	3,283
Total change	6,371	0	516	-758	237	6,366

	31 March 2010	Addition resulting from company acquisition	Taken through profit or loss	Taken through equity	Currency translation differences	31 March 2011
Deferred tax assets						
Tax loss carry-forwards	3,413	0	-195	0	1	3,219
Provisions disallowed for tax purposes	1,868	0	-817	0	26	1,077

Other	3,283	12,798	-496	285	3	15,874
	3,283	12,798	-494	285	3	15,876
Total change	6,366	-11,407	-2,496	-259	30	-7,766

23 Liabilities from post-employment benefits to employees

Amounts recognized in the balance sheet:

	2010/11	2009/10
Termination benefits	5,912	5,561
Pension benefits	10,403	8,755
	16,315	14,316

Termination benefits

The obligation to set up a provision for termination benefits is based on the respective labor law.

Retirement benefits

Liabilities for retirement benefits recognized at the balance sheet date relate to retirees only. All pension agreements are based on past service cost and are, except for the pension plans acquired in the course of the business combination Mark IV IVHS, not covered by external plan assets (funds). In addition, contributions are paid to an external pension fund for employees of the Group (see Note 5).

For the valuation of termination benefits and pension benefit obligations including plan assets an interest rate of 5 % (2009/10: 5 %) was used, and for compensation increases a rate of 3 % (2009/10: 3 %). In addition, the calculation was based on the earliest possible statutory retirement age, including transition provisions and using the mortality tables AVÖ 2008-P (2009/10: AVÖ 2008-P) by Pagler & Pagler. Pension increases were estimated at 2-3 % (2009/10: 2-3 %).

The following amounts are recognized in the income statement as expenses for termination benefits:

	2010/11	2009/10
Current service cost	182	183
Interest expense	322	305
Actuarial losses	70	81
Total, included in staff costs (Note 5)	573	569
Change in liabilities recognized in the balance sheet:		
Carrying amount as of 31 March of prior year	5,561	5,294
Total expense according to the table above	573	569
Payments	-223	-302
Carrying amount as of 31 March of fiscal year	5,912	5,561
Actuarial present value of obligations (defined benefit obligation)	7,094	6,516
Unrecognized actuarial gains/losses	-1,183	-954
Amount recognized in the balance sheet	5,912	5,561

The following amounts are recognized in the income statement as expenses for retirement benefits:

	2010/11	2009/10
Current service cost	4	0
Interest expense	533	502
Actuarial adjustment	17	0
Gains from external plan assets	1	0
Total, included in staff costs (Note 5)	556	502
Change in liabilities recognized in the balance sheet:		
Carrying amount as of 31 March of prior year	8,755	8,920
Addition resulting from business combinations	2,024	0
Total expense according to the table above	556	502
Payments	-720	-667
Total	10,616	8,755
Fair value of plan assets	-213	0
Carrying amount as of 31 March of fiscal year	10,403	8,755
Actuarial present value of obligations (defined benefit obligation)	11,877	9,998
Unrecognized actuarial gains/losses	-1,261	-1,243
Fair value of plan assets	-213	0
Amount recognized in the balance sheet	10,403	8,755

24 Other non-current liabilities

	2010/11	2009/10
Truck tolling system Czech Republic	6,185	5,021
Other	4,238	4,332
	10,423	9,353

Other non-current liabilities relate to trade payables (non-current) in the amount of TEUR 6,185 (2009/10: TEUR 5,021) due to subcontractors for the installation of the Czech truck tolling system. As in the prior year, these liabilities are due in more than 1 year and less than 5 years as of the balance sheet date. These non-current liabilities were discounted on the basis of cash flows using discount rates that correspond to those rates applied in discounting non-current receivables from the Czech truck tolling system (see Note 16). Thus, the fair values approximate the carrying amounts.

Other non-current liabilities mainly relate to a liability in the amount of TEUR 3,500 (2009/10: TEUR 3,500) from a put option for shares in Kapsch-Busi S.p.A, Bologna, Italy, and to the non-current portion of a contingent payment obligation in the amount of TEUR 574 (2009/10: TEUR 755) from the acquisition of the "Mobility Solutions" business of TechnoCom Corporation, Encino, U.S.A., in the fiscal year ending 31 March 2009.

The gross cash flows of other non-current liabilities are as follows:

	2010/11	2009/10
Less than 2 year	9,151	4,394
Between 2 and 3 years	1,450	4,910
More than 3 years	405	305
	11,006	9,610

25 Other liabilities and deferred income

	2010/11	2009/10
Amounts due to customers for contract work	300	1,679
Prepayments received	205	1,746
Non-current employee liabilities	13,381	9,790
Liabilities to tax authorities (other than income tax)	1,556	3,400
Other liabilities and deferred income	21,439	9,318
	36,881	25,933

Amounts due to customers for contract work are as follows:

	2010/11	2009/10
Construction costs incurred plus recognized gains	-202	-13,872
Less amounts billed and prepayments received	503	15,551
	300	1,679

26 Provisions

	2010/11	2009/10
Non-current	686	583
Current	4,722	6,845
	5,408	7,428

The provisions changed as follows:

	31 March 2009	Addition resulting from company acquisition	Addition	Utilization/ disposal	Currency translation differences	31 March 2010
Obligations from anniversary bonuses	524	1	78	-20	0	583
Other	0	0	0	0	0	0
Non-current provisions, total	524	1	78	-20	0	583
Warranties	1,820	0	1,029	-653	165	2,361
Losses from pending transactions and rework	934	0	0	-224	0	710
Legal fees, costs of litigation and contract risks	3,228	0	36	-2,473	99	891
Other	4,640	0	9,382	-11,260	120	2,883
Current provisions, total	10,623	0	10,447	-14,609	384	6,845
Total	11,147	1	10,525	-14,629	384	7,428

	31 March 2010	Addition resulting from company acquisition	Addition	Utilization/ disposal	Currency translation differences	31 March 2011
Obligations from anniversary bonuses	583	0	52	-29	0	605
Other	0	98	0	-14	-3	81
Non-current provisions, total	583	98	52	-44	-3	686
Warranties	2,361	45	100	-1,163	136	1,480
Losses from pending transactions and rework	710	0	0	-710	0	0
Legal fees, costs of litigation and contract risks	891	0	55	461	35	1,442
Other	2,883	51	1,761	-2,910	15	1,800
Current provisions, total	6,845	96	1,916	-4,322	186	4,722
Total	7,428	194	1,969	-4,366	183	5,408

The provision for anniversary bonuses relates to non-current entitlements by employees based on collective labor agreement provisions. The valuation was based on an interest rate of 5 % (2009/10: 5 %), the earliest possible statutory retirement age including transition provisions and using the mortality tables AVÖ 2008-P (2009/10: AVÖ 2008-P) by Pagler & Pagler, increases in salary were considered at 3 % (2009/10: 3 %).

As manufacturer, dealer and service provider the Group issues product warranties at the time of sale to its customers. Usually, under the terms of the warranty contract, the Group has the obligation to repair or replace manufacturing or software defects that become apparent within the period under guarantee.

In case the Group expects warranty claims on products sold or services rendered during the period under guarantee, a corresponding provision will be set up in the financial statements. Based on the expectation that the majority of the expenditure will be incurred in the short or medium term, the best estimate for the cost of warranty is used for the recognition of the provision. Likewise, historical data is taken into account in the calculation of the amount of the provision. According to past experience, it is probable that there will be claims under the warranties.

Other provisions mainly include provisions for commissions and bonuses, credits receivable, discounts granted to customers and legal and consulting fees.

27 Contingent liabilities, other commitments and operating lease commitments

The Group's contingent liabilities primarily result from large-scale projects. Other commitments mainly relate to contract and warranty bonds, bank guarantees, performance and bid bonds and sureties.

Details of contingent liabilities and other commitments are as follows:

	2010/11	2009/10
Contract, warranty, performance and bid bonds		
City Highway Santiago	0	263
City Highway Sydney and Melbourne	2,306	2,881
Truck Tolling System Austria	12,500	12,500
Truck Tolling System Czech Republic	9,414	10,046
Tolling project Poland	24,656	0
Tolling projects South Africa: Gauteng, Marian Hill, Huguenot	120,208	117,084
Other	967	1,069
	170,051	143,844
Bank guarantees	1,975	2,419
Sureties	544	30
	172,570	146,293

For details of securities for above mentioned contingent liabilities and other commitments see Note 15 and Note 21. In addition, various assets of Kapsch TrafficCom AB, Jönköping, Sweden, amounting to TEUR 10,075 are pledged in favour of a Swedish bank in order to secure contingent liabilities.

Operating lease commitments:

The future payments from non-cancellable obligations from rental and operating lease contracts are presented below:

	2010/11	2009/10
Up to 1 year	8,969	6,304
Between 1 and 5 years	25,198	16,550
Over 5 years	12,860	11,146
	47,027	34,000

28 Business combinations

Kapsch Telematic Services Solutions A/S, Copenhagen, Denmark (formerly Payvend F&P A/S).

On 1 April 2010, Kapsch Telematic Services GmbH, Vienna, acquired 60 % of the shares in Payvend F&P A/S, Copenhagen, Denmark at a purchase consideration of TEUR 750. Subsequently, the company was renamed to Kapsch Telematic Services Solutions A/S, Copenhagen, Denmark.

Purchase consideration	750
Less share of fair value of net assets acquired	750
Goodwill	0

	Fair value	Carrying amount of the seller
Intangible assets	1,667	1,667
Liabilities, other liabilities and deferred income	-417	-417
Net assets acquired	1,250	1,250
Thereof controlling interest (60 %)	750	
Thereof non-controlling interest (40 %)	500	

The acquired company contributed revenue of TEUR 9 and a net income of TEUR -234 to the Group's result of the period from 1 April 2010 to 31 March 2011.

TMT Services and Supplies (Pty) Ltd., Cape Town, South Africa.

Kapsch TrafficCom AG, Vienna, through a subsidiary, acquired 51.43 % of the increased share capital of TMT Services and Supplies (Pty) Ltd., Cape Town, South Africa, as part of a capital increase on 8 April 2010. The consideration paid in connection with the capital increase amounted to a total of ZAR 75 million. This investment was increased to 56.81 % by an additional purchase of shares on 30 August 2010. The business combination involves the entities TMT Services and Supplies (Pty) Ltd., Cape Town, South Africa, SafeTCam (Pty) Ltd., Cape Town, South Africa, Traffic Software Solutions (Pty) Ltd., Cape Town, South Africa, TMT Services and Supplies (Gauteng) (Pty) Ltd., Cape Town, South Africa, Electronic Tolling Operations (Pty) Ltd., Cape Town, South Africa, Crestwave 61 (Pty) Ltd., Cape Town, South Africa, Crestwave 63 (Pty) Ltd., Cape Town, South Africa, TMT Services and Supplies (North) (Pty) Ltd., Cape Town, South Africa and Berrydust 51 (Pty) Ltd., Cape Town, South Africa.

For the remaining share of 43.19 %, a put-option has been granted to the minority shareholders by the Group.

Purchase consideration (including contingent elements)	7,885
Less share of fair value of net assets acquired	6,420
Goodwill	1,465

Assets and liabilities resulting from the acquisition are shown as follows (provisionally determined):

	Fair value	Carrying amount of the seller
Intangible assets	6,683	403
Property, plant and equipment	1,267	1,267
Receivables and other assets	4,577	4,577
Cash and cash equivalents	7,170	7,170
Liabilities, other liabilities and deferred income	-7,215	-5,456
Net assets acquired	12,483	7,961
Thereof controlling interest (51.43 %)	6,420	
Thereof non-controlling interest (48.57 %)	6,063	

The acquired company contributed revenue of TEUR 34,204 and a net income of TEUR 5,125 to the Group's result for the period from 8 April 2010 to 31 March 2011. If the acquisition had occurred on 1 April 2010, there would not have been a significant change in revenue or profit of the Group.

MARK IV IVHS, U.S.A., Canada, Mexico.

Kapsch TrafficCom AG agreed on 5 November 2010 (signing) to acquire the business of MARK IV IVHS, part of MARK IV, LLC (U.S.), in the U.S., in Canada and in Mexico. Closing date for this acquisition was 30 November 2010. This business combination involves the entities Kapsch TrafficCom IVHS Technologies Holding Corp., Sterling, U.S.A., Kapsch TrafficCom IVHS Holding Corp., Sterling, U.S.A., Kapsch TrafficCom IVHS Inc., Sterling, U.S.A., Mark IV Holdings B.V., Amsterdam, Netherlands, Kapsch TrafficCom IVHS Corp., Mississauga, Canada, and Kapsch TrafficCom IVHS, S.A. de C.V., Mexico City, Mexico.

Purchase consideration (including contingent elements)	55,071
Less share of fair value of net assets acquired	31,595
Goodwill	23,476

Assets and liabilities resulting from the acquisition are shown as follows (provisionally determined):

	Fair value	Carrying amount of the seller
Intangible assets	32,647	0
Property, plant and equipment	4,011	2,561
Receivables and other assets	15,716	15,716
Cash and cash equivalents	4,255	4,255
Liabilities, other liabilities and deferred income	-25,034	-14,411
Net assets acquired	31,595	8,121

The business acquired contributed TEUR 19,327 to the revenue of the Group. If the acquisition had occurred on 1 April 2010, there would have been an increase in the revenue of the Group of TEUR 38,650. It is not possible to indicate the effects on the group result of the period, as the seller was under creditor protection pursuant to "Chapter 11" in the prior period and the necessary results attributable to the assets and liabilities transferred in the course of the business combination were not available.

29 Related parties

The following transactions were performed with related parties:

Auditor's Report.

Report on the Consolidated Financial Statements.

We have audited the accompanying consolidated financial statements of Kapsch TrafficCom AG, Vienna, for the fiscal year from 1 April 2010 to 31 March 2011. These consolidated financial statements comprise the consolidated balance sheet as of 31 March 2011, the consolidated statement of comprehensive income, the consolidated cash flow statement and the consolidated statement of changes in equity for the year ending 31 March 2011, and the notes to the consolidated financial statements.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, and with the legal provisions applicable in Austria. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable under the circumstances.

Auditor's Responsibility and Description of Type and Scope of the Statutory Audit

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with laws and regulations applicable in Austria and Austrian Standards on Auditing, as well as in accordance with International Standards on Auditing (ISA) issued by the International Auditing and Assurance Standards Board (IAASB) of the International Federation of Accountants (IFAC). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate under the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

Our audit did not give rise to any objections. Based on the results of our audit, in our opinion the consolidated financial statements comply with legal requirements and give a true and fair view of the financial position of the Group as of 31 March 2011 and of its financial performance and its cash flows for the financial year from 1 April 2010 to 31 March 2011 in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

Comments on the Management Report for the Group.

Pursuant to statutory provisions, the management report for the Group is to be audited as to whether it is consistent with the consolidated financial statements and whether the other disclosures in the management report for the Group do not give rise to a misstatement of the Group's financial position. The auditor's report also has to contain a statement as to whether the management report for the Group is consistent with the consolidated financial statements and whether the disclosures pursuant to Section 243a UGB are appropriate.

In our opinion, the management report for the Group is consistent with the consolidated financial statements. The disclosures pursuant to Section 243a UGB are appropriate.

***) What you don't see here: Our 'Hazardous Goods Transport Tracking' keeps hazardous goods transports in sight to ensure the maximum level of safety.**

Hazardous Goods Transport Tracking – Thousands of hazardous materials transports take place every day, often in densely populated areas. Accidents involving vehicles carrying dangerous goods can have potentially disastrous consequences. The GNSS-based toll collection system from Kapsch provides an ideal infrastructure for continuous tracking of hazardous material transports and monitoring transports according to defined routes, corridors and exclusion areas. In event of an incident, a monitoring center can communicate rapidly with responders, providing precise information on the nature of the hazard and the exact location of the truck.

Kapsch TrafficCom is an international supplier of superior Intelligent Transportation Systems (ITS). Its principle business is the development and supply of electronic toll collection systems, in particular for the multi-lane free-flow of the traffic, and the technical and commercial operation of such systems. Kapsch TrafficCom also supplies traffic management systems, urban traffic solutions and selected ITS and telematic applications. With 260 references in 41 countries on all 5 continents, and with almost 44 million on-board units delivered and more than 18,000 lanes equipped, Kapsch TrafficCom has positioned itself among the internationally recognized suppliers of electronic toll collection systems worldwide. Kapsch TrafficCom is headquartered in Vienna, Austria, and has subsidiaries and representative offices in 25 countries.
