

Press release

Kapsch TrafficCom secures new contracts for Tolling Roadside Systems in Australia.

Vienna/Melbourne, December 13, 2018 – Kapsch TrafficCom Australia Pty Ltd has been contracted by the CPB Contractors John Holland Joint Venture (CPBJH JV) to deliver the Tolling Roadside System for the West Gate Tunnel Project (WGTP) in Melbourne. The second project has been contracted by the Lendlease Samsung Bougyues Joint Venture (LSB JV) to deliver the Tolling Roadside System for Stage 3A of the WestConnex Program, the M4-M5 Link Main Tunnel Works Project in Sydney. The scope of both contracts comprises design, supply, installation and commissioning of the roadside tolling system for these two significant road infrastructure projects. The total value is above EUR 20 million.

WestConnex M4-M5 Link Main Tunnel, Sydney: For the M4-M5 Link Main Tunnel Works project, Kapsch will deliver LSB JV and, ultimately, the WestConnex Stage 3 motorway operator Sydney Motorway Corporation, the latest cutting-edge tolling technology based on the company's single gantry multi-lane free-flow (MLFF) platform and next-generation stereoscopic vision technology for both Vehicle Detection and Classification (VDC) and Automatic Number Plate Recognition (ANPR). The WestConnex Program of motorway projects is part of an integrated transport plan for Sydney – easing congestion, creating jobs and connecting communities. Once completed, the new motorway will provide crucial support for Sydney's long-term economic and population growth.

West Gate Tunnel Project, Melbourne: For the West Gate Tunnel Project, Kapsch will deliver the latest cutting-edge tolling technology based on the company's single gantry multi-lane free-flow (MLFF) platform and next-generation stereoscopic vision technology for both Vehicle Detection and Classification (VDC) and Automatic Number Plate Recognition (ANPR). The project will deliver a vital alternative to the West Gate Bridge, providing a much needed second river crossing for the city of Melbourne, quicker and safer journeys, and remove thousands of trucks from residential streets.

„Almost 20 years ago Kapsch delivered the world's first multi-lane free flow tolling system in Australia. We are pleased to further expand on the strong partnerships we built over the years and to be playing a crucial part in such important projects again,“ says André F. Laux, Chief Operating Officer at Kapsch TrafficCom.

Kapsch TrafficCom is a provider of intelligent transportation systems in the fields of tolling, traffic management, smart urban mobility, traffic safety and security, and connected vehicles. As a one-stop solutions provider, Kapsch TrafficCom offers end-to-end solutions covering the entire value creation chain of its customers, from components and design to the implementation and operation of systems. The mobility solutions supplied by Kapsch TrafficCom help make road traffic safer and more reliable, efficient, and comfortable in urban areas and on highways alike while helping to reduce pollution.

Kapsch TrafficCom is an internationally renowned provider of intelligent transportation systems thanks to the many projects it has brought to successful fruition in more than 50 countries around the globe. As part of the Kapsch Group, Kapsch TrafficCom has subsidiaries and branches in more than 30 countries. It has been listed in the Prime Market of the Vienna Stock Exchange since 2007 (ticker symbol: KTCG). Kapsch TrafficCom currently has more than 5,200 employees, and generated revenue of approximately EUR 693.3 million in fiscal year 2017/18.
