2 Policy

This policy is explicitly stated for the Road Traffic Safety management system. It is our clear understanding that all objectives stated in the KTT company policy are applicable for the Road Traffic Safety management as a basis.

2.1 Commitment

It is our declared objective to implement and maintain the highest standards in all company departments and business areas. Therefore ...

- we are committed to fulfill the legal requirements in all our activities and will make every effort to exceed these wherever possible, and economically practicable.
- by means of regular ongoing education and training measures, we foster an awareness and appropriate behavior in our employees in line with our corporate strategy and goals, as well as the defined standards.
- our management team carries the responsibility to ensure that the requirements of the management system are properly understood and lived.
- we obligate subcontractors, suppliers and service providers employed by us to adhere to the standards we have established.

2.2 Objectives

Regarding road traffic Safety our objectives are ...

- healthy employees have a sense of well-being in a road traffic safe work environment.
- all employees are encouraged to take active measures to avoid health and road safety hazards and accidents.
- we commit ourselves to minimize health and road safety risks through a hierarchy of controls and measures.
- we strive toward continuous improvement of road traffic safety conditions for our employees
- the involvement of our employees and the staff council in the active organization of the road traffic safety environment and working conditions is important to us.

This means that we ...

- Ensure the best road safety conditions improves the health and wellbeing of our workers.
 - In mission travel
 - In itinere travel
 - Inside the company facilities
