OBU-4040-0xA, -1xA

On Board Unit for Heavy Goods Vehicles.

The OBU-4040 is a compact DSRC On Board Unit intended for use in road tolling schemes for heavy vehicles where the driver shall be able to check the status of the unit and also declare the current vehicle axles configuration or class. The unit supports DSRC functionality according to European standards and specifications.

The OBU-4040 is compliant with harmonized EFC specifications and standards such as A1, CESARE/ PISTA, CARDME and EN 15509, and it also supports other ITS applications such as AVI, parking and access.

The unit supports communication with overhead mounted roadside units, and it furthermore also fulfills the demanding requirements for communication with enforcement vehicles or side-mounted enforcement stations.

The user memory can be structured in several DSRC applications, and data security and integrity is ensured by the high degree of integration in combination with efficient cryptographic functions based on the DES and AES algorithms.

The user interface, comprising a push button and four LEDs, enables the user to declare the current vehicle axles

configuration. It also provides a possibility to check the functional status of the unit.

Further feed-back to the driver is provided by the built-in buzzer with pre-configured buzzer sounds that can be activated by the DSRC roadside system.

The OBU-4040 is installed in a snap-in bracket that is mounted by the user to

the inside of the vehicle windscreen.

The unit can be customized with a pad printed logotype, and further information, such as serial or account numbers, is laser printed on the casing.

Optionally, the unit includes functionality to detect when the unit is opened or tampered with.

Installation in a heavy vehicle using the bracket OBU-4091-00A (at the lower and center part of the windscreen)
Depth of OBU from windscreen: 31mm

Features.

- > Product Range:
 - > OBU-4040-00A, with LED symbol "X"
 - > OBU-4040-01A, with LED symbol "X", tamper detection
 - > OBU-4040-10A, with LED symbol "S"
- > Fully proven in demanding communication scenarios including mobile and fixed enforcement stations
- > Compliant with CEN DSRC standards
- > Compliant with EFC interoperability specifications and standards
- > User interface for status check and declaration of vehicle class / no of vehicle axles
- > Optional branding by pad print

Technical features.

Casing

- > Plastic material PC/ASA
- > Colour windscreen side: White
- > Colour cabin side: Black, Grey or White

Weight

- > 35 g

Size

- > 70 x 48 x 17 mm (excluding bracket)

Enclosure

- > IP40, Ref: IEC 60529

Power supply

- > 3V Lithium battery
- > Typical lifetime: more than 6 years

User memory

- > RAM/Flash
- > Capacity: 4 Kbytes

MMI

- > Buzzer (sound level: 55 dBA @ 1m)
- > Configurable buzzer tunes
- > Push button
- > 3 green LEDs "2", "3", "4"
- > 1 green/red LED "X" or "S"
- > Push button and LEDs can be configured to declare vehicle class/no of vehicle axles

Accessories

- > Snap-in bracket OBU-4091-00A with pre-mounted adhesive
- > Bracket colour: White
- > The OBU can be supplied in a customised package including e.g; bracket, cleaning tissue and user manual

Customisation of casing

- > Optional pad-print on cabin and/or windscreen side
- > Laser printed serial number in text and barcode on windscreen side.

DSRC compliance

In accordance with:

- > EN 12253, physical layer
- > EN 12795, data link layer
- > EN 12834, application layer
- > EN 13372, DSRC profiles 0/1 L1-B
- > ISO 14906, EFC Application Interface
- > ISO 17264, AVI Application Interface
- > EN 15509, EFC Interoperable Application Profile
- > EN 16312, AVI Interoperable Application Profile
- > ISO 21719, personalisation of OBE
- > GSS 3.2 global specification for short range communication

Mean Time Between Failure (MTBF)

- > 600,000 hours
- Ref: Bellcore Issue 6 Method I Case 3

Environmental conditions

- > Temperature range, storage: +5 °C to +40 °C
Ref: IEC 60721-3-1, class 1K21
- > Temperature range, operation: -25 °C to +70 °C
Ref: IEC 60721-3-5, class 5K2
(Tested in +85 °C due to impact from solar radiation)
- > Humidity: Max 95 % relative humidity, non condensing
Ref: IEC 60721-3-5, class 5K2

Vibration

- > Random: 3 m²/s³ 10–200 Hz, 1 m²/s³ 200–500 Hz
Ref: IEC 60721-3-5, class 5M3

Shock

- > Half-sine 300 m/s², duration 6 ms
Ref: IEC 60721-3-5, class 5M3

Free fall

- > 1,000 mm, each face

Conformance

- Compliant with the following EU directives
- > RED 2014/53/EU
 - > RoHS 2011/65/EU
 - > WEEE 2012/19/EU
