# New York State Bridge Authority ITS Engineering.

The New York State Bridge Authority ([www.nysba.net](http://www.nysba.net)) operates and maintains the Kingston-Rhinecliff, Newburgh-Beacon, Rip Van Winkle, Mid-Hudson, and Bear Mountain bridges. For over 65 years, these trans-Hudson River facilities have been managed by the Authority and have played an important role in economy growth for Hudson Valley.

Over the past five years, Transdyn/Kapsch TrafficCom has provided the New York State Bridge Authority with Intelligent Transportation System (ITS) engineering and consulting services for the five bridges operated by the Authority.

Kapsch TrafficCom delivers engineering and consultant services for the advancement and development of the Authority's System-Wide Intelligent Transportation Systems Program. Services include ITS planning and design, development of RFP documents, construction management and inspection, project management, and system integration services. The program allows the Authority to use the latest technologies to efficiently operate and maintain their bridges by more securely managing facilities, reducing traffic congestion, and increasing motorist safety.

#### System features

- Planning
- Design
- Systems Integration
- Equipment Procurement
- Program Management Services

#### Kapsch TrafficCom.

Kapsch TrafficCom is a provider of intelligent transportation systems (ITS) in the application fields of road user charging, urban access and parking, road safety enforcement, commercial vehicle operations, electronic vehicle registration, traffic management and V2X cooperative systems. We cover the entire value creation chain of our customers with end-to-end solutions. From components and subsystems to their integration and operation. Our core business is to design, build, and operate electronic toll collection systems for multi-lane free-flow traffic.

#### About Kapsch Group.

Kapsch is one of Austria's most successful technology corporations to specialize in the future-oriented market segments of intelligent transport systems (ITS) and information and communications technology (ICT). Kapsch. Always one step ahead.
