Kapsch.

KTC: Leading entity of the Kapsch Group.

➢ Kapsch founded in Vienna in 1892
➢ Electronic industry
➢ Strong brand in Austria
➢ Three key entities
  ▪ Kapsch TrafficCom - KTC (Intelligent Transportation Systems)
  ▪ Kapsch BusinessCom (ICT solutions for enterprises)
  ▪ Kapsch CarrierCom (Telematics and telecommunications solutions for rail and urban public transport operators, carrier networks and energy supply companies)
➢ Family owned Group (only KTC listed)
➢ Group revenues >EUR 1bn

KTC: Tradition meets Future.

125 years in the ever-changing technology industry are a proof of the sustainable business approach and the entrepreneurial spirit within the family-owned Kapsch Group.

This, together with the professionalism, structures and transparency required from a listed company, are key success factors for Kapsch TrafficCom.

**Strategy.**

*Profitable and sustainable growth.*

**Top-line growth**
- Secure and expand the toll collection business
- Reduce the cluster risk
- Growth resulting from a broad range
- Growth in existing and new markets
- Acquisitions

- Revenues to increase in both segments, with higher rates of growth for IMS.

**Profitability**
- Price pressure in ETC:
  - Larger number of smaller projects with lower profitability
  - Current and upcoming large tenders — price pressure
- EBIT margin in IMS to gradually improve:
  - Non-recurring nature of costs for the integration of KTT
  - After KTT integration: better positioning, higher efficiency
- Synergies between KTT and Kapsch TrafficCom

- EBIT margin in ETC comfortably >10%.
- In the medium term IMS EBIT margin of about 8% seems possible.
- Group EBIT margin of 10% (mid term).

**Sustainability**
- Long-term & sustainable management: 125 years of history
- Sustainable business model
- Innovation: open approach
- Patents
- Employees: lifelong learning
- Working environment
- Engaging with stakeholder groups

- R&D and innovation with open approach.

The growth of net investments to EUR 12.3mn resulted primarily from the acquisition and integration of KTT.

Free cash flow was again positive at EUR 42.6mn, but was below the 2015/16 value of EUR 90.7mn. Main reasons: working capital, higher net investments.

In spite of several acquisitions and the payment of dividends, Kapsch TrafficCom was able to conclude the fiscal year with a net credit (EUR 19.6mn).

The assumption of a promissory note bond (balance sheet extension), acquisitions (effect in equity) and dividend payment led to a reduction of the equity ratio to 35%.

Revenue share of IMS increased from 16.0% to 27.8%.
> Continue to grow the top line

- **ETC**
  - Good potential in the USA
  - Hope for greater momentum in Asia
  - In EMEA, focus on nation-wide toll collection systems, e.g. in Poland, the Czech Republic and Bulgaria

- **IMS**
  - As KTT integration has been completed, stronger focus on sales
  - Greatest attention to the CHARM project
  - Matrix organization should improve cooperation between the Regions and the Solution Centers as well as with customers

> Profitability: no great leaps in terms of EBIT

- Price effects from secured projects in Czech Republic and Austria
- IMS should achieve a positive EBIT
- Legal expenses from IP-related dispute with a competitor in the US

> Balance sheet

- Repayment of the corporate bond will influence both financial results and equity ratio
Outlook.
Beyond FY 2017/18.

Revenue should increase in both segments, with higher rates of growth for IMS
- Further expansion of the toll collection business
- Reducing the cluster risk – growing the portfolio of smaller contracts
- Growth resulting from a broad range
- Growth in existing and new markets
- Acquisitions

Falling EBIT margin in ETC, however it will continue to be comfortably higher than 10%
- Larger number of smaller projects. They tend to have lower profitability compared with large ones because they lack scaling effects
- Price pressure is to be anticipated for current and upcoming tenders for large projects

EBIT margin in IMS to gradually improve; first achieve a balanced result, in the medium term an EBIT margin of about 8% seems possible
- (Almost) non-recurring nature of costs for the integration of KTT taken over in 2016
- Better positioning and more efficient processes following the integration
- Synergies between KTT and Kapsch TrafficCom in both customer acquisition as well as in terms of costs

Mid-term EBIT margin for the Group of about 10%
What makes Kapsch TrafficCom unique?

- Ability to develop tailored solutions – proven track record
- Close to our customers
- Domain know-how
- Integrated, one-stop-shop
- Global player
  - Best practice
  - Risk diversification
- A leading position in our core business
- Size and financial stability
- Listed (transparency, access to capital)
- No principal-agent-conflict as one main shareholder is the CEO
  - Long-term view; sustainable measures not sacrificed for short-term profits
